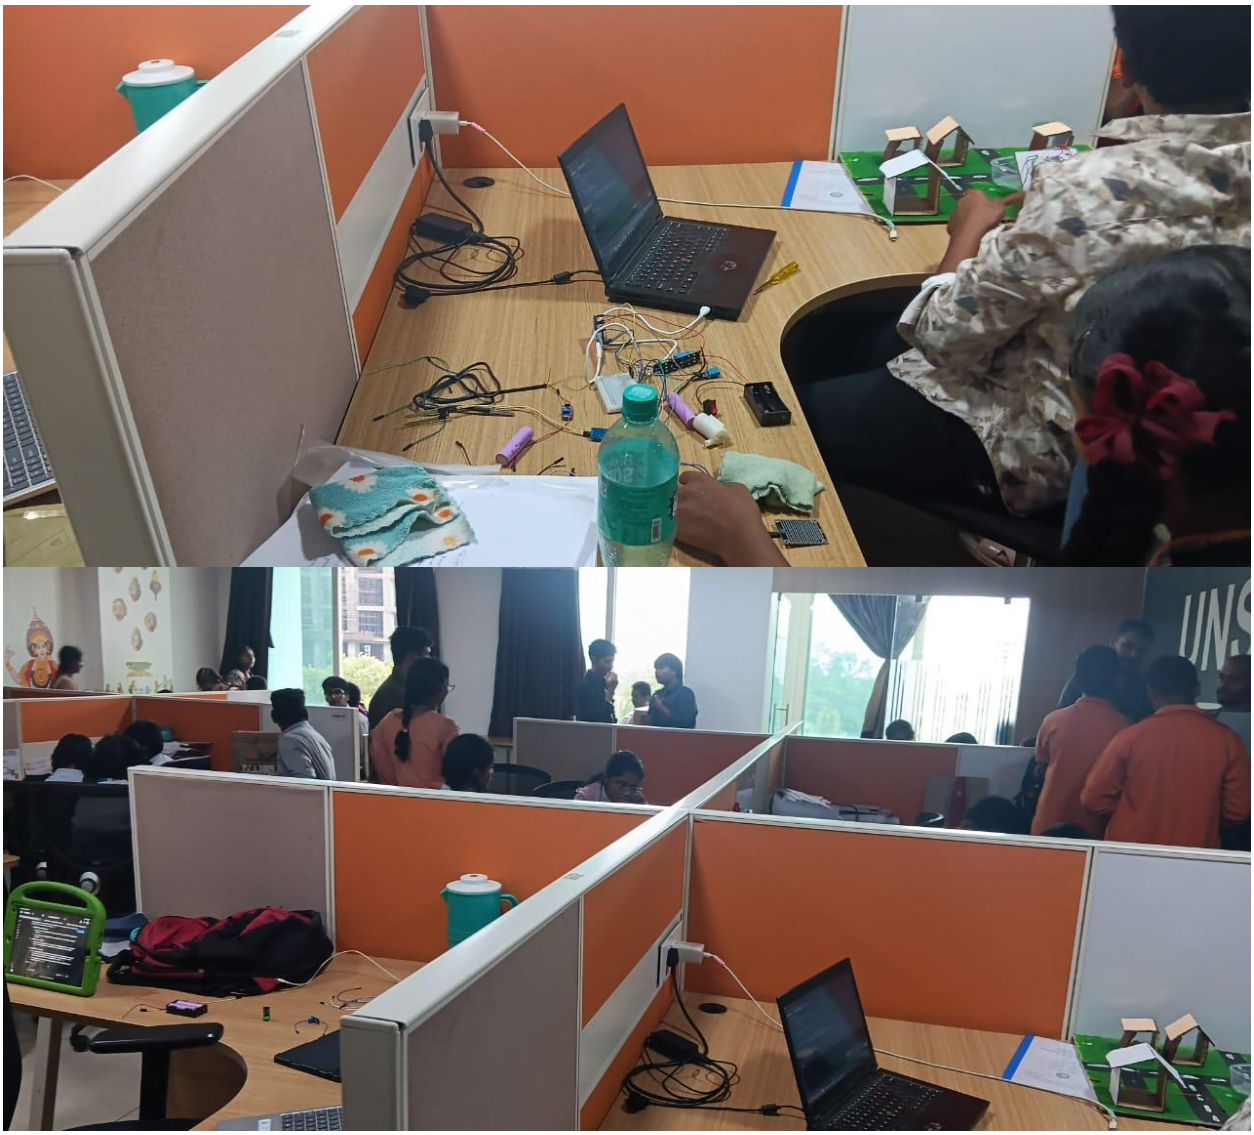
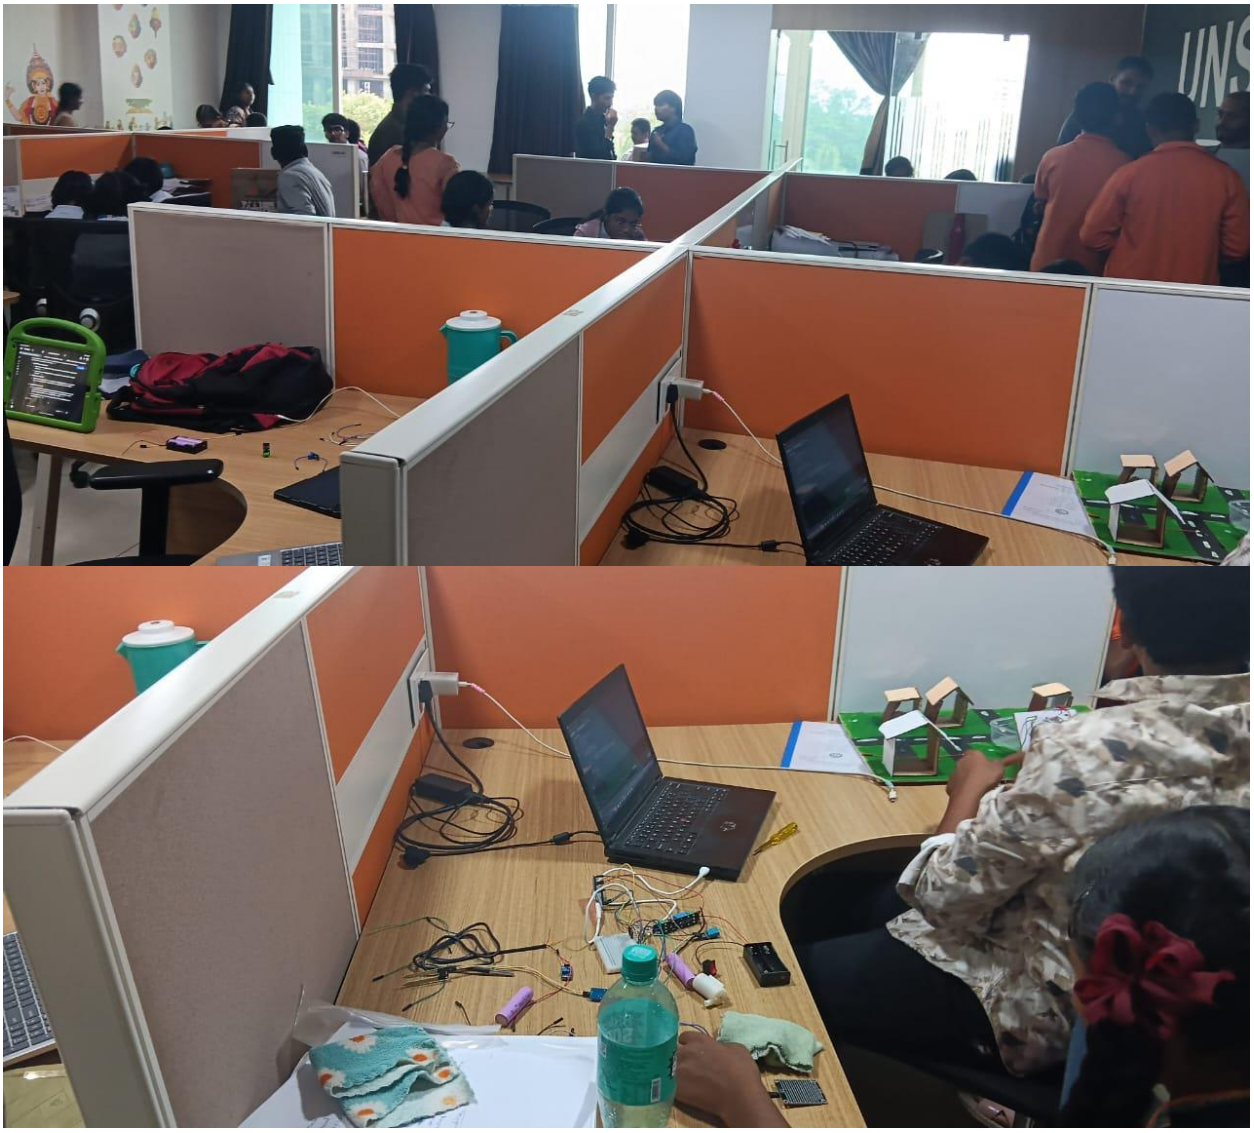
UNSTOPPABLES.





KL Deemed to be University successfully hosted the **School Innovation Challenge 2026**, organised by the Ratan Tata Innovation Hub (RTIH), Amaravati, at its Vijayawada campus from **October 27 to 29, 2026**. The three-day innovation programme brought together 20 school teams from Andhra Pradesh and Telangana, providing young students with an opportunity to explore innovative ideas, identify real-world challenges, and develop practical solutions.

The programme featured hands-on innovation activities, design thinking exercises, expert mentorship, teamwork, and prototype development. Participating students worked collaboratively to refine their ideas and transform them into working prototypes with technical guidance and support.

KL Deemed to be University facilitated the programme by providing essential infrastructure, laboratory facilities, technical resources, and an innovation-driven learning environment. The initiative offered students valuable exposure to experimentation, creative thinking, problem-solving, and early-stage product development.

The event strengthened the collaboration between KL University and RTIH in promoting innovation and entrepreneurship among young learners, while encouraging students to become future-ready innovators and entrepreneurs.
