Drone Technology Awareness

The sight of a flying object never ceases to amaze us as it is one of the few things man cannot achieve physically himself .The wonder & awe are ever so refreshing more so in the minds of children.

Team CEA has taken the initiative of spreading awareness about Drone Technologies & how they can play a crucial role in this year's prestigious Krishna Pushkaralu.

We have organized awareness high school students where we explained in a simple and understandable manner the working of drones.

We made sure to deliver the content in a manner such that children feel interested and genuinely learn more on their own.

An unmanned aerial vehicle (UAV), commonly known as a drone, as an unmanned aircraft system (UAS), or by several other names, is an aircraft without a human pilot aboard .The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator, or fully or intermittently autonomously, by onboard computers.

Team CEA in collaboration with Fopple Team has proposed the use of drone systems equipped with camera capable of taking photos & broadcasting live feed during Krishna Pushkaralu.This gives us live time updates and keeps us ready to go in case of emergencies. The

feed can be monitored and subsequent measures can be taken by officials. We explained in detail what kind of advantages drone surveillance will give us in crowd control, security & statistical analysis.

This event was spread over the course of n days with a goal of imparting basic knowledge and also with a hope of instilling the spark of interest within young minds.

TECHNO-SCHOOLS (Sishubhodana)

Education in India is one among various other elements that have captured the attention of the world, but it is disheartening to see that many students still lack in computer knowledge which plays a major role in today's digitalized world. Hence KLU-CEA Team have organized an event to bring in many more techno schools, as a part of the plan on October 23th, 2016, volunteers took initiative by organizing an event at Amodini orphanage by teaching the students the basics of MS-Word and this week students were thought on preparing presentations using MS-PowerPoint. This is an extension of the event Sishubodhana, which helps the students to learn and innovate as we intended to continue organizing such camps every weekend throughout the academic year. Students from 6th to 12th have participated where they are divided into a group of 7 to 9. A recap of past session is given.

Later in Ms. PowerPoint students are taught the following things: How to create a file with many slides, How to design a slides, Font, color, size, Insertion of pictures, tables, charts, shapes, Using different layouts, How to insert audios and videos, Use of animations & transitions, To set slideshow and sound, How to back up a file, How to design a certificates. In this programme 30 members of students benefited.

CEA conducting In future scope Students can make efficient use of MS PowerPoint and save any data, Enhances one's presentation skills and thinking ability. In this occasion 20 CEA Volunteers participated.

AWARENESS IN TECHNOLOGY

Technology can be viewed as an activity that forms or changes culture. Additionally, technology is the application of math, science, and the arts for the benefit of life as it is known. Technology advances show people a more efficient way to do things, and these processes get results. For example, education has been greatly advanced by the technological advances of computers. Students are able to learn on a global scale without ever leaving their classrooms. Agricultural processes that once required dozens upon dozens of human workers can now be automated, thanks to advances in technology, which means cost-efficiency for farmers. Consequently, we are doing this event to create awareness about technology from earliest to Latest among students.

All the volunteers (Students) of CEA who are interested in the campus will move to the Govt. and private schools to guide the students about the variations in past to present technology by presenting them some of the videos and paper presentations. As a result the students can know about the advancement in technology along with manufacturing to some extent.

Benefits:

- This event was to Create awareness among students about Technology and its manufacturing process.
- Students those who are interested in technology can get a better idea with this event.

Online Banking Awareness Programme

KLU- CEA organized online banking with State Bank of India Buddy App to introduce cashless economy. Bank employees from the directions of State Bank of India with CEA volunteers have conducted a “Online Banking Awareness Programme” on 10/12/2016. The students have explained how to make cashless transactions through normal mobile phones and smart phones, and created awareness to make digital transactions. And, explained the pro’s of using the digital money instead of liquid money to the faculty and Non Teaching. The volunteers have cleared all the doubts about the cashless transactions using wallets and internet banking.

PUZZLE MANIA

KLU-CEA as a part of New Year celebrations we have planned to conduct a fun event in the private school for 7th, 8th& 9th standard students.

The event has been started in the morning session. At first we have gone to Nagarjuna high school and the event is conducted for 7th, 8th&9th classes. Our volunteers distributed the chits to each student containing a puzzle to solve. CEA volunteers conducted 2 levels. In first level they will be given a 10 minutes of time and we selected some of the students. Level 2 is conducted for selected student by forming 29 teams. Each team consist of three members. We selected top 9 members in 7th,8th &9th and 6 are selected as winners and remaining 3 are as runners .We distributed certificates and medals to the winners by this programme students can have own think, reasoning, ability, time managing capabilities, Problem solving ability etc....
