SANITATION AND HYGIENIC AWARENESS

Problem:

The village is having proper sanitation facilities like drainages and bathrooms for every houses. But the problem is they lacks in maintenance. The clogged drains were never been unclogged either by the municipality or by the villagers, things like bleaching the drains were also not performed earlier other than the times of external visitors like universities and municipal authorities.

Solution: All the drains were bleached by the students to avoid growth of pathogenic bacteria and breeding of Temporary soak pits which were dug to allow the seepage of rain water into the earth were identified to be a nice solution to avoid water stagnation.
