Venue: KLEF

DISHA APP AWARENESS

Description of the Event:

This world is not safe for girls..!Then why not make it safe for them instead of locking them up behind the bars of insecurity. Our state government has taken a brilliant initiative to protect our girls from monsters in mask of a man. Disha app is a part of the very step. This app has few phenomenal features due which the protection team is informed within no time when a girl is in danger. Swift Action would be taken against any kind of atrocities faced by women in public places. The team KLEF-CEA has contributed its part in spreading awareness regarding the app among student communities and also in social media by shooting some awareness videos. These videos include the elaboration of every single feature of Disha app.

Our daughters are our responsibility.

Benefits:

1. Awareness for the women about Disha App launched by government of AP.
2. The App features are explained clearly.
3. Role play helps to understand how to react at the time of need for their self protection.
