Date: 9th July '16 Place: Vaddeswaram

VRUKSHPRAAN

As we all know that the green cover in India has been depleting day by day due to various reasons like deforestration, construction of new buildings and various other projects, in this view KLU CEA (Centre For Extension Activities) has taken up the initiative and started an event titled "Vruksh Praan" of planting saplings and do our worth for the increase in the green cover.

As part of this event we have planned on planting as many saplings as we could and also let the people outside know the importance of planting trees.

And so few members of the organization set off for reaching the goal. We have decided to plant saplings every Saturday and we have till now been successful in doing so.

We started the event on 9^{th} of July and till now planted 10 saplings at the Yuvataram Foundation.

We also have taught the children of the Yuvataram Foundation about the importance of trees and the way we have to plant them.

In this way we hope to do our bit in increasing the greenery.

Drone Technology Awareness

The sight of a flying object never ceases to amaze us as it is one of the few things man cannot achieve physically himself . The wonder & awe are ever so refreshing more so in the minds of children.

Team CEA has taken the initiative of spreading awareness about Drone Technologies & how they can play a crucial role in this year's prestigious Krishna Pushkaralu.

We have organized awareness high school students where we explained in a simple and understandable manner the working of drones.

We made sure to deliver the content in a manner such that children feel interested and genuinely learn more on their own.

An unmanned aerial vehicle (UAV), commonly known as a drone, as an unmanned aircraft system (UAS), or by several other names, is an aircraft without a

human pilot aboard .The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator, or fully or intermittently autonomously, by onboard computers.

Team CEA in collaboration with Fopple Team has proposed the use of drone systems equipped with camera capable of taking photos & broadcasting live feed during Krishna Pushkaralu. This gives us live time updates and keeps us ready to go in case of emergencies. The feed can be monitored and subsequent measures can be taken by officials. We explained in detail what kind of advantages drone surveillance will give us in crowd control, security & statistical analysis.

This event was spread over the course of n days with a goal of imparting basic knowledge and also with a hope of instilling the spark of interest within young minds.

TECHNO-SCHOOLS

Education in India is one among various other elements that have captured the attention of the world, but it is disheartening to see that many students still lack in computer knowledge which plays a major role in today's digitalized world. Hence we Team CEA have organized an

event to bring in many more techno schools; in this regard a group of seven volunteers took

initiative by organizing an event at Amodini orphanage by teaching the students the basics of

Ms-Word. This is an extension of the event Sishubodhana, which helps the students to learn

and innovate as we intended to continue organizing such camps every weekend throughout the

academic year. Students from 6th to 12th have participated where they are divided into a group

of 7 to 9. Each group is trained by a volunteer. Initially the students are made familiarized about

the basic usage and access of the computer. Later in Ms. Word students are taught the following

things:

• How to type

• Various alignments - line, paragraph

• Font, color, size

• Insertion of pictures, tables, charts

• Using different layouts

• Mail merging, water mark

• How to back up a file

• How to design a certificate

Benefited students: 30

Future Scope:

Students can make efficient use of Ms-Word and save any data.

• Enhances one's presentation skills and thinking ability.

Awareness on Diwali against Pollution

In this event Center for Extension Activities Volunteers have focussed on school children from 6th to 10th class students by creating awareness on pollution caused by diwali crakers. By showing some videos and PPT's by explaining the effects caused by diwali crakers and safety measures to celebrate diwali and the reason why we have to celebrate diwali. CEA volunteers explained clearly from the roots of the puranas. And also we interacted with the students not to use fire crackers and safety measures one should take during igniting crackers.

This event is held at the auditorium of the Vignan Vihara High School, Nutakki by gathering around 450 students. At last we ended with the pledge "We pledge that this diwali we shall celebrate as greener diwali, by filling our homes with prayers and lights and not with crackers and noise".

AWARENESS IN TECHNOLOGY

Technology can be viewed as an activity that forms or changes culture. Additionally, technology is the application of math, science, and the arts for the benefit of life as it is known. Technology advances show people a more efficient way to do things, and these processes get results. For example, education has been greatly advanced by the technological advances of computers. Students are able to learn on a global scale without ever leaving their classrooms. Agricultural processes that once required dozens upon dozens of human workers can now be automated, thanks to advances in technology, which means cost-efficiency for farmers. Consequently, we are doing this event to create awareness about technology from earliest to Latest among students.

All the volunteers (Students) of CEA who are interested in the campus will move to the Govt. and private schools to guide the students about the variations in past to present technology by presenting them some of the videos and paper presentations. As a result the students can know about the advancement in technology along with manufacturing to some extent.

Benefits:

- > This event was to Create awareness among students about Technology and its manufacturing process.
- > Students those who are interested in technology can get a better idea with this event.

HEALTH AND HYGIENE AWARENESS

First of all the awareness is regarding the most common diseases found in women.

Team CEA has taken the initiative of spreading awareness about how the symptoms will be and how we can overcome the diseases in early stages.

We have organized awareness for students above 8^{th} Class where children can understand in a easy way.

We explained the children about the different diseases like Calcium deficiency and how do we get calcium, Asthma and what precautions we need to take in emergency conditions, Breast Cancer, Thyroid and types of thyroid, H5N1 virus (bird flu) and also menstrual cycle. Team CEA members has explained disease symptoms, precautions and food we need to take to prevent these diseases. We also explained about the Pink Ribbon Day which is celebrated on October 24th. As this is the day where the cancer was cured for women for the first time. We also taught them the problems regarding the early pregnancies and diseases caused.

This event became an interacting program where the children asked different questions regarding their problems and after explaining every disease we too asked them some questions

to check how much they understood regarding this. And in the middle we have given them some puzzles to solve are more interesting.

Finally we got a great output that every children has understood about the diseases and how to overcome these diseases by taking different kinds of foods and some hygiene conditions. They told that they would eat every kind of food that they will get as per their schedule. We can say that the children had learned something about these diseases and preventing measures. By seeing their interest we taught to conduct the same event and can help them to get awareness regarding other diseases.

Date: 10/11/2016

Waste Management

CEA organized waste management awareness programme in KL University has created awareness in everybody to use dust bins. Thronging the wastage into open place it causes pollution. Hence to use dust bins for healthy and hygienic environment. In this event students affairs Dean Dr. Jyothi, Associate Dr.K.Ravindranath, Dr.R.Subhakar Raju, Dr.S.Venkateswarlu, P.Suresh & CEA Volunteers have participated.

Date: 10/12/2016

KLU- CEA organized online banking with State Bank of India Buddy App to introduce cashless economy. Bank employees from the directions of State Bank of India with CEA volunteers have conducted a "Online Banking Awareness Programme" on 10/12/2016. The students have explained how to make cashless transactions through normal mobile phones and smart phones, and created awareness to make digital transactions. And, explained the pro's of using the digital money instead of liquid money to the faculty and Non Teaching. The volunteers have cleared all the doubts about the cashless transactions using wallets and internet banking.

Date: 11/12/2016

Conservation of Electricity

KLU-CEA volunteers identified the main problem in the society for conservation of electricity. All the generated of electricity is getting exhausted.

In this regard our CEA would like to extend its support to create the awareness regarding the consumption of electricity and how to conserve each and every unit of power wasted by us which will be useful for the future generations.

CEA volunteers would like to start this with the schools. All volunteers will go to the particular school and collect the details about the electricity consumption

The children of school would have to provide the details of number of units of power consumed for the previous month and after one month we will again collect the details of power consumed after adopting conservation methods.

Finally the difference of the bills of the two months will provide the number of units conserved by the individual. This process will also be continued in other schools.

Through this event if 1 person consumes two units /day, these statics would provide people with the information which helps in reducing the electricity consumption to the maximum potential. 400 posters are posted on the walls, 15 members of CEA volunteers participated in this event.

Event Photos:

Date: 30/12/2016

MANNEQUIN CHALLENGE

An event MANNEQUIN CHALLENGE is planned to conduct on 30th December, 2016. Mannequin challenge is a viral internet video trend where people remain frozen in action like mannequins while a moving camera films them. As the use of dustbins is not properly observed in the campus, the TEAM of CEA planned to this event in order to spread awareness regarding the waste management.

Volunteers of CEA will act like a mannequin, posing throwing the waste outside the waste bins. Which is captured as a video with help of ET-Facilities. Brings awareness on waste management. In this event 30 members of CEA volunteers participated.

Date: 31/12/2016

PUZZLE MANIA

KLU-CEA as a part of New Year celebrations we have planned to conduct a fun event in the private school for 7th, 8th& 9th standard students.

The event has been started in the morning session. At first we have gone to Nagarjuna high school and the event is conducted for 7th, 8th&9th classes. Our volunteers distributed the chits to each student containing a puzzle to solve. CEA volunteers conducted 2 levels. In first level they will be given a 10 minutes of time and we selected some of the students. Level 2 is conducted for selected student by forming 29 teams. Each team consist of three members. We selected top 9 members in 7th,8th &9th and 6 are selected as winners and remaining 3 are as runners. We distributed certificates and medals to the winners by this programme students can have own think, reasoning, ability, time managing capabilities, Problem solving ability etc....

CRAFTING/DESIGNING/DRAFTING

Aspiration:

The main endeavour of this event is to bring out technical and non-technical skills among the students.

Initiation:

Team CEA has taken initiative of conducting a contest based on crafting/designing/drafting where the themes are given on spot.

Implementation:

We have organized this event for all the students of K L University (B. Tech, B. Arch, BBA, BCA etc.). We have publicized this event through social media and staff of KLU then on the day of the event we conducted crafting/designing/drafting based on the on-spot themes given. Designing includes Posters/Logos, Drafting includes Video Synthesis/Mailing, Crafting includes Quilling, DIY etc.

This event is conducted in two slots 2:00-3:30 & 3:30-5:00 PM, so that student can participate in two of the above given slots. This event is mainly conducted to encourage the students in their respective specialization.

Conclusion:

Finally we got a considerable output from students in conducting the event. Some of the students came forward in designing where we have also conducted offline designing contest.

WORLD YOUTH DAY

Aspiration:

Every year January 12th is celebrated as the "Vivekananda Birthday & WORLD YOUTH DAY". The main Endeavour of this event is to bring out the ideals of Vivekananda among the students.

Initiation:

We the team CEA have displayed Vivekananda Photo with garland along with some flowers to pay floral Tribute. We have invited all the Teaching & Non-Teaching staff & students to pay homage to Vivekananda.

Implementation:

This event was conducted by CEA members and staff our higher officials of KLU are invited to the event followed by the staff and students. Some of the faculty has even delivered speech about the ideals of Vivekananda. Our student affairs dean II jyothi madam and IAS academy head K. Chowdary sir have elucidated some of the stories and ideals of swami Vivekananda.

Conclusion:

This event is beneficial to youth whole many students have come to know about some of the preaching of swami Vivekananda.

Computer Awareness Programme

EVENT DESCRIPTION:

CEA activity of CSE department was conducted in Government High School, Mellempudi Village in Guntur District. There are totally 90 children studying Nursery to Seventh Standard.CEA TEAM of CSE has 15 members of III/IV B. Tech students & II/IV B. Tech students. CEA team of CSE was headed by Faculty Incharge(s) Mrs.K. Ruth Ramya and Mr. P.S.V.S.Sridhar Name of CEA activity is "**Technology Oriented Teaching**". The main objective of this programme is to impart computer related technology to the rural children. As a part of this objective we conducted orientation in 3 areas of computer like MS Office Package, Internet, Hardware. Apart from teaching technical skills, the school children were made to understand the requirement of good communication skills, career and social awareness and also create interest among students games like word building etc., were also conducted to primary students.

SESSION ACTIVITIES:

CEA team started from KL University at 9.00 AM and reached the school at 09.30 A.M. Faculty In charge(s) introduced themselves to the Head Mistress of the School and explained few words about the programme. At 10:00 A.M Inaugural function was started and Later, the school headmistress spoke few inspiring words. Then Mrs. K. R. Ramya explained to the children the importance of technology now-a-days. Later, Mr. P.S.V.S.Sridhar explained about the activity. Finally, Head Mistress proposed vote of Thanks. The Inaugural function was closed at 11:00 P.M. Games like "Fire in the Mountain" and "Bus Five game" were conducted to test student concentration. In-order to create fun and interest among students and make them happy "Banana Game" was conducted. Students of KLU taught children how to introduce themselves. At 12:00 P.M students went for lunch break.

KLU team was divided into 4 groups. Each group consists of 5 people. First group of 5 people taught IInd standard children about computer basics like what is a computer? Computer parts, Computer Uses, MS paint basics(like home, insert, cut, copy, paste options, font, paragraph, alignment, bold, italics, underline, tools, shapes, colors etc) and played some animations videos in computer.

Second group of 5 people taught IIIrd standard children about what is a computer? Computer parts, Computer Uses, MS paint basics(like home, insert, cut, copy, paste options, font, paragraph, alignment, bold, italics, underline, tools, shapes, colors etc) and played some animations videos in computer. basics of computer, Parts of computer, CPU, operating systems and various operating systems etc.

Third group of 5 people taught IVth & Vth standard children basics of computer, Parts of computer, CPU, operating systems and various operating systems, MS Office package

Fourth group of 5 people taught VIth & VIIth standard children basics of computer, Parts of computer, CPU, operating systems and various operating systems, MS Office package. At 2:30 P.M KLU team returned back.

Green Brigade

Just as a spark starts a fire, a spark was set by Misses Nupur Tandon.

Nupur Tandon, Founder of the Bengaluru-based waste management company Pro Waste, has zeroed it on the issue at a very local level and thought that if the problem is setting precedents to show how bottom up efforts matter, bulk generators are the places to start. The idea is to recycle 100 per cent of the waste these centres produce, in order to eliminate the amount of waste that goes to the landfill.

Pro waste was founded in 2012, since then working with institutions and organizations to manage their waste effectively. One such fortunate institutions is K L University.

Pro waste is beyond just providing services, it is a concept which helps people understand that their waste is a resource, and how it should be managed. Pro waste helps set up integrated, sustainable eco-friendly processes thus creating "Zero Waste Zones".

The mission is to change people's habit of throwing waste, and instead segregating it and giving it to recycling centres. It is beyond just providing services; we aim at working at the ground level with the people. We stress on awareness, training, and efficient process until final disposal of all categories of waste and using correct technology. Hence we would be highly obliged if the Maintenance dept. extends its support in keeping a check regarding the proper waste management in the University. In this event Dean Students Affairs-II Dr.M.Jyothi, Associate Dean Dr.Ravindranath, Hobby Clubs Incharge Dr.R.Subhakar Raju, CEA Co-Ordinators Dr.S.Venkateswarlu, P.Suresh and CEA Volunteers Participated.

Date: 04/03/2017 Vijagnan Vihara High School, Nuttaki

Conservation of Electricity

C.E.A volunteers have decided to start the awareness program over the conservation of electricity. So we started collecting bills for consecutive months from 6^{th} , 7^{th} & 8^{th} standard students.

CEA volunteers had given the presentation over the electricity and its conservation techniques. Later on we collected the electric bills for the two consecutive months of January and February and difference of the individuals bills are taken .Top 6 students whose percentage in conservation of electricity is more were provided with the certificates and the prizes on 4th March 2017

Event beneficiary: -

- 1) Awareness over the electricity and its importance.
- 2) Positive character will be included in students
- 3) May increase Students thinking ability over electricity for future generations.

Event output is that the following students are declared as the winners for conserving more electricity: -

		STUDENT'S	CURRENT BILL USC	DECEMBER	JANUARY	DIFFERENCE
SNO	CLASS	NAME	NO	UNITS	UNITS	UNITS
1	6TH	T.HARITHA	1212107000520	251	89	162
2	7TH	T.VEDALIKITH	1212115000317	197	74	123
3	7TH	K.MANOJ	1212116000696	125	34	91

BIRTHDAY BOX

We team CEA has given an opportunity to everyone to help the needy.

We organized an event name as Birthday box. Every person has zeal to do something good for others at least on their birthday. In this view we have planned to keep a box where every individual can help as they can to the needy.

On 15th march 2017 we team CEA has placed the birthday boxes in the cafeterias in the campus. The responsible persons of the cafeteria has found the need of the boxes in their place and encouraged us.

After completion of every month the box will be sealed out and the money usage to needy will be displayed to the students at end of every month.

Date: 26th March 2017 Place: AMODINI ORPHANAGE

BLOOD GROUPING

Everyone have the responsibility to know their blood group because it is very useful in some part of our life. We the members of CEA taken an initiation part to collect the data base regarding blood groups of the children and we successfully had done our duty. We have noticed that many of the children have low blood levels. The main reason we have noticed there is the children are not eating the food that is sufficient to their body. This is due to lack of awareness and there is no person to guide them how much quantity of food they need to consume daily.

We also noticed that the children over their we're very excited to know about a new thing that they notice around. We also explained how to know what our blood group is easily in an understandable way. There are some children studying nursing have experienced some of the practical knowledge and the expressed their views of the process.

Our final output is we have collected the data of blood groups individually that may be useful in future. We also need to give a small counseling regarding how much quantity of food they need to consume daily and if they do not take the sufficient food what are the problems they are going to face in future.

Health Camp

"Nothing tastes as good as feeling healthy". Treatment facilities, medical staff and medicines are often not available, and the patient is left disillusioned and disappointed. Infect most treatable ailments are often left undiagnosed resulting in the disease to spread and grow By the time people realise that the situation is getting out of their hands they are not left with any options as remote villages seldom don't have the facilities of modern and advanced technologies. Also people who primary depend on agriculture can most definitely not pay the extreme high prices of modern medicine. So KLU-CEA has organized a Free Health Check-up Camp at Chirravuru on 26/03/2017 in association with Young India Volunteer Organization.
