

REPORT

ACADEMIC YEAR 2012-13:

Date: 26/01/2012

Place: Mathruchaya Orphanage, Revendrapadu

Blood Group Analysis in Mathruchaya Orphanage, Revendrapadu

Presently they are extremely keen on a wide range of things, so we can lead 4 unique errands like:

- 1) Essay Written Competition, 2) Drawing Competition, 3) Creative Expressions, 4) Mini Ventures

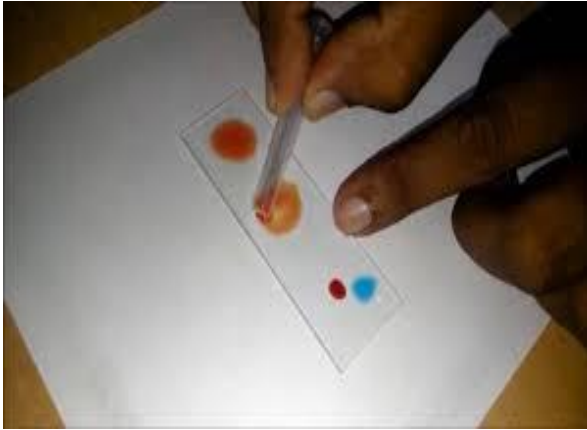

In any case, all are not qualified for all errands just single assignment from that we can sort a portion of the general population and we can give testaments.

BLOOD GROUP ANALYSIS:

CEA may direct blood gather examination in mathruchaya orphanage likewise not just in a similar time we may lead diabetes/sugar test additionally in light of the fact that now a days a large portion of individuals are confronting it. So, we can direct it in mathruchaya orphanage and we can keep information with us.

Commodities of Senior Citizens Forum

Centre for extension activities took upon another initiative to provide clothes and other basic amenities to the needy people. This event has been called "*Vasthudhaan*". It aimed, the workers of the Kanuru, Vijayawada where an ordinary mans unwanted/excess is someone's hope of bare minimum.

Because they don't stand in need of Lee, Wrangler, Babiators, Aurelia, Levis, Tadpoles etc. All that they need is that little spun of fabric which gives them utmost warmth and happiness.

Guide Programme

Event Beneficiary: 10th class Students

Website Description:

This project aims to create awareness among the students about the present opportunities. This also serves to know their path that they have to choose to reach their goals.

At first the Youth body divided into two teams and went to schools of Vaddeswaram and Nuttaki. The aims and the process of the event was explained to the respective principals and got permission from them to conduct the event in their schools. The event started with the welcome note by the respective principals and then the event started. Our volunteers have explained about the opportunities that are provided to undertake the job. Our team have explained from the initial point onwards i.e. what they can do after the 10th class to reach their goals. There was an interactive session with the students and they have participated very actively. There was a nice and huge response from the students and they are contacting the YOUTH body to clear their doubts. Finally this event was a huge success.

Technology Oriented Teaching in Z.P.H.School

Technology can be viewed as an activity that forms or changes culture. Additionally, technology is the application of math, science, and the arts for the benefit of life as it is known. Technology advances show people a more efficient way to do things, and these processes get results. For example, education has been greatly advanced by the technological advances of computers. Students are able to learn on a global scale without ever leaving their classrooms. Agricultural processes that once required dozens upon dozens of human workers can now be automated, thanks to the advance in technology, which means cost-efficiency for farmers. Consequently, we are doing this event to create awareness about technology from earliest to Latest among students.

All the volunteers (Students) of CEA who are interested in the campus will move to the Govt. and private schools to guide the students about the “variations in past to present technology” through presenting them some of the videos and paper presentations. As a result the students come to know about the advancement in technology along with manufacturing to some extent.

Benefits:

- This event was to Create awareness among students about Technology and its manufacturing process.
- Students those who are interested in technology can get a better idea with this event.

Teaching Classes to Illiterate Children

Most of the children globally do not learn to read until a few years later than developed country kids, and immigrant children or children of immigrants have probably been moved around quite often and have received little to non-formal education. Young children love to learn, however, and they learn fast. Teaching can even help them learn how to read and write. We observed that due to lack of understanding they are not fulfilling their goals. To fill this gap we will motivate children how they have to achieve goals.

As a part of extension activity we went to nearby schools and taught the students. Based on the student requirements we taught the subjects. To gather attention on students we teach how to do the things and how to do manufacturing of book, pens, computer, cars etc. Not only these, we also taught teach computer knowledge that means how to use the computer, how to use to write documents using word etc. Not only going to schools, we are taught to nearby children, dropouts, those who are not able to get study we are helping to that kind of children also.

Awareness on Higher Education and Opportunities

Education in India is one among various other elements that have captured the attention of the world, but it is disheartening to see that many students still lack in Higher Education and Opportunities a major role in today's digitalized world. Hence, our CEA Team have organized an event to bring in many more techno schools. In this regard a group of seven volunteers took initiative by organizing an event at Z.P.H.School, Ravendrapadu which helps the students to learn and innovate as we intended to continue organizing such camps every weekend throughout the academic year. Students from 9th to 10th have participated where they are divided into a group of 7 to 9. Each group is trained by a volunteer. Initially the students are made familiarized about the basic usage and access of the computer. Later in M S Word students are taught the following things:

Future Scope:

- Students can make efficient use awareness of opportunities.

- Enhances one's presentation skills and thinking ability.

SMOKELSS STOVES

An idea just comes through the observation and it implements through discussion. This was the event which is observed by one of the volunteer of CEA when he gone through the survey with his father in his village. Actually the villagers use stoves outside of the house which is cause health problems for them and also it leads to the environment pollution. So in order to eradicate those problems we decided to help the society. For this we surveyed with different projects and come out with the solution to do smokeless stoves.

This event is done on the contract based as the stoves are made by the outside people and after the finishing we distributed to the villages which helped them a lot as well to the environment.

Zion School and Home for Blind & Handicapped

(Distribution of Medicine and Clothing, Distribution of Books to Children)

KLU CEA had done many social awareness activities. Apart from these, distribution of medicine and clothing to slums, distribution of books to children are the major activities.

DISTRIBUTION OF MEDICINE AND CLOTHING:

This activity mainly distribution of medicine including clothing to slum people, we search slum area's all-around Vijayawada through the survey; we selected some

slum area which are more poverty background than the other slums. Our CEA members divided as different teams and distributed the cloths and medicine to the slum children.

MINERAL WATER PLANT

As Center for Extension Activities (C.E.A) know that water is the major source of human life, even Vijayawada and Guntur are developing cities in Andhra Pradesh still there are some villages where water is not available to the people. In order to get the drinking water they are facing several problems. So in order to eradicate this problem volunteers of CEA decided to establish a water plant in the village.

So the Center for Extension Activities (C.E.A) volunteers started this activity by surveying different villages in and around Tadepalli region and finally come out with a village named “Gundimeda” which is near Pathuru. This water plant is inaugurated by

the President and Vice President of K L University, by doing this activity an entire village got benefited.
