## **Objective**

Students dive into the three R's—Refuse or Reduce, Reuse, and Recycle—as a framework for reducing plastic waste in the environment. So we team KLEF-CEA are conducting an event named "PLASTIC 3 R RULE".

## **Description**

The event is the one which is very useful to create awareness among students about plastic reduction. By this event the children are able to learn the ways to reduce, reuse, and recycle plastic items with the help of team CEA. So that they can follow these rules and help future generation's plastic free.

So, the team CEA (Center for Extension Activities) conducted an event called PLASTIC 3R RULE in Z.P. High School, Peda konduru Village.

## **Outcome**

Reduce, reuse, and recycle can help local economies. Recycling creates jobs and promotes the circular flow of the economy. Reduce, reuse, and recycle provides numerous benefits beyond waste reduction and resource conservation.

Thus, reducing, reusing & recycling are essential practices for sustainable waste management that help us protect the environment, conserve resources, and create a more sustainable future. By making small shifts in our daily lives, we can greatly influence and contribute to a sustainable planet.
