Date: 13-08-2020

### **A Report on Webinar on Organ Donation** **Conducted on 13-08-2020** **(Awareness Program)**

KL Deemed to be University (Koneru Lakshmaiah Education Foundation) Engineering & Non-Engineering National Service Scheme (NSS) Volunteers participated in Webinar on Organ Donation (Awareness Program) on the eve of “**World Organ Donation Day**” which is on **13-08-2020**. Even after death, some organs of the body can be preserved and stored. If these organs are donated, it might save somebody else’s life. The rate of organ donation has significantly increased due to the number of successful cases. Organ Donation is defined as the removal of organs from a body and transplanting it to a new body by surgical means. The requirement for new organs usually arises when a person loses an organ to some accident or stops functioning.

Date of the Event: 13-08-2020

Name of the Event: A Webinar on Organ Donation

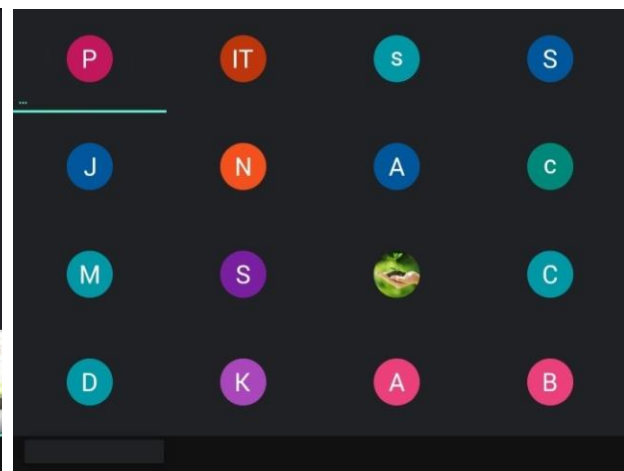

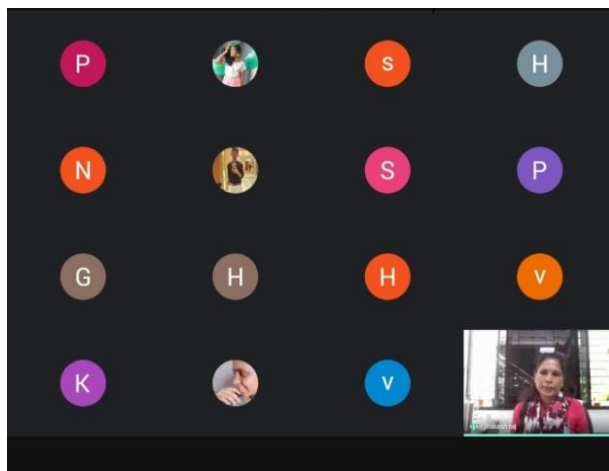

Venue: Online

No. of Participants: Students- 126, Faculty- 11

**Ex: Liver, Retina, Heart, Kidney etc...**

Organ transplant depends on the availability of human organs. Organ transplantation is the only way of saving lives of patients who have had terminal organ failure. A person can sign up and register for donating his organs. In this case, a person voluntarily consents to donate his organs after his death. After he passes away, the doctors remove the eyes and other organs that can be preserved from his body and stores them. These donated organs are used to help patients in need of organ transplantation. Also, if a person is declared brain dead by doctors, his family members can officially consent to donate his organs. Such cases usually happen when a patient is desperately in need of an organ and delay can be fatal.

So, the speaker of the webinar explained the need, importance and all other details regarding the organ donation.

### “Recycle Your Life - Become an Organ Donor”
