

Report on Awareness on Water Conservation

Conducted on 15-03-2021 at Chirravuru

KL Deemed to be University (Koneru Lakshmaiah Education Foundation) Computer Science Engineering (CSE) Unit-07 National Service Scheme (NSS) has conducted “**Awareness on Water Conservation**” on **15-03-2021** in one of the village adopted by the K L University i.e. Chirravuru. As a part of this NSS Volunteers from Unit-07 and final year students participated in the event. On the day of the event, all the 20 NSS volunteers along with faculty started from the college at 10.00 am in bus and reached the Chirravur by 10.30 am.

Objective of this Programme: To educate people about Water Conservation and steps that is to be taken to preserve and reduce wastage of water.

Date of the Event: 15-03-2021

Name of the Event: Awareness on Water Conservation

Venue: Chirravuru

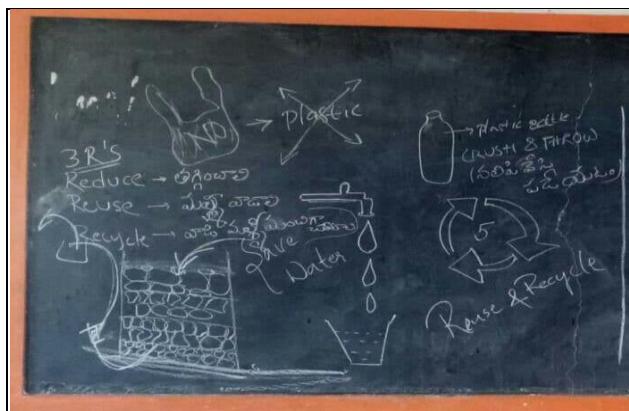

No. of Participants: Students: 62, Staff:12

Summary of the Event

After reaching the village, students went to door to door and gave awareness about importance of water. Students explained why the water have to be conserved and they explained what happens if water is not conserved. Then they informed them about how to store the underground water and some of the ways to save the water.

Students also told some of the tips for not to waste the water and how to reuse water. For example, water which used to wash the vegetables can also use for plants instead of wasting. Later we also conducted the same programme to the ZPHS School Students. We interacted with how they are utilizing water in different ways then we discussed the ways how to reduce the wastage of water.

Ways to save water:

- ➔ Use of Jug while brushing your teeth.
- ➔ Turn off the taps while not in use.
- ➔ Washing vegetables in a tub of water instead of a running tap.
- ➔ Don't throw plastic in rivers or ponds to reduce pollution.
- ➔ Use low flow showerhead.
- ➔ Water your yard and outdoor plants early or late in the day to reduce evaporation.
- ➔ Use a broom, not a hose to clean driveways and walkways.
- ➔ Use a shut off nozzle on your hose.

“Water Water Every Where, Try To Save It If You Care”

“Don't Let Water Run In the Sink Our Life Is On the Brink”

**Water conservation for today
is life conservation for tomorrow.**
