

AGRICULTURE WASTE RECYCLING CLUB

NAME OF THE EVENT – Demonstration on recycling of agricultural waste and production of compost by different methods

Date -08-05-2024

Venue – Agriculture farm

Number of students participated- 36

OBJECTIVE OF THE EVENT

1. Promoting sustainability: Encouraging farmers to recycle agricultural waste to reduce environmental impact and promote sustainable practices.
2. Generating additional income: Providing opportunities for farmers to earn extra income through the recycling of agricultural waste materials.
3. Creating a cleaner environment: Reducing the amount of agricultural waste that ends up in landfills or pollutes water sources, leading to a cleaner and healthier environment.
4. Improving soil health: Using recycled agricultural waste materials as compost or fertilizer to enhance soil fertility and promote better crop growth.
5. Educating and raising awareness: Organizing workshops, training sessions, and awareness campaigns to educate farmers about the importance of recycling agricultural waste and its benefits.
6. Collaborating with government and NGOs: Working together with relevant authorities and organizations to develop policies and initiatives that support agricultural waste recycling efforts at a larger scale.

OUTCOME OF THE EVENT

The Agriculture Waste Recycling Club aims to reduce environmental pollution caused by agricultural waste through innovative recycling methods. They collect various types of agricultural waste such as crop residues, animal manure, and discarded packaging materials, and then process them into useful products like organic fertilizers, animal feed, and biodegradable packaging. By doing so, they not only prevent the harmful effects of agricultural waste on the environment but also promote sustainable practices in the agricultural sector.
