KL College of Agriculture initiated Agri-incubation club to encourage entrepreneurship skills in agriculture where students were given information regarding the agri-entrepreneurship and agri startups.

OBJECTIVE OF THE EVENT

The main objective of the activity was to impart knowledge on agri entrepreneurship and agri startups to B.Sc. students which inculcate start up ideas among students.

DESCRIPTION OF THE EVENT

Agri-incubation also called agricultural incubation is a process designed to nurture and supports the growth of agricultural startups and innovations. These initiatives provide a supportive environment for students and innovators in the agricultural sector to develop their ideas, products and services into viable businesses.

The concept of agri-incubation emerged as a response to the unique challenges faced by agricultural entrepreneurs. Unlike traditional tech startups, agricultural ventures often require specialized knowledge of farming practices, access to agricultural resources and understanding of market dynamics. Agri-incubators bridge these gaps by offering support and resources to budding agricultural entrepreneurs.

Students were explained the importance of entrepreneurial skills and how they can convert their innovative ideas into budding startups and thereby evolving into an well established enterprises.

OUTCOME OF THE VISIT

Students participated interestingly and gained knowledge on entrepreneurship in agriculture and were instructed to brain storm their ideas and come up with innovative thoughts to make them into viable business ideas.
