

Visit to KVK Darsi on 04-08-2023

Accompanied by six faculty members, third-year B.Sc. (Hons.) Agriculture students of Y20 batch embarked on an enlightening journey to KVK Darsi, a pivotal extension centre affiliated with Acharya N.G. Ranga Agricultural University on 04.08.2023. Dr. Usha and Dr. Venkateswara Reddy illuminated the students on various extension activities and research endeavours. The visit offered a firsthand glimpse into modern agricultural practices such as Azolla cultivation, vermicomposting, and livestock farming. Students were exposed to the intricacies of watershed management and diverse water harvesting structures, underscoring KVK's commitment to sustainable agriculture. The centre's role in conducting field trials, training programs, and supplying foundation seeds became apparent, emphasizing its holistic support to farmers. Exploring the expansive Darsi watershed, students witnessed community-led conservation practices and diverse land uses spanning agriculture, horticulture, and forestry. The visit underscored KVK's indispensable role in bridging the gap between scientific knowledge and practical farming, equipping students with invaluable insights into farm pond utilization, integrated farming systems, and the broader landscape of agricultural extension
