### **WORLD FOOD DAY**

**Date** : 25/10/2021 and 26/10/2021

**Time** : 11.00 a.m. to 5.00 p.m

**Venue** : Theatre in R&D Block

#### **OBJECTIVES**

The objectives of World Food Day include raising awareness about food insecurity, hunger, and malnutrition globally, advocating for policies and actions to eradicate hunger and ensure food security for all, promoting sustainable agriculture and food production practices, and fostering collaboration among governments, organizations, and individuals to address food-related challenges effectively. Additionally, World Food Day aims to celebrate the achievements in food production and distribution while highlighting the need for continued efforts to achieve a world without hunger.

#### **DESCRIPTION**

The KL college of Agriculture in the esteemed leadership of Director, Dr. Veeraghavaiah Ravuri, and with energized participation of each faculty, organized the World Food Day on 26th October 2021. The theme of this year World Water Day was "Valuing Water". This event was graced by Hon'ble VC, KLU - Dr. L. S. S. Reddy, Dean MHS - Dr. M. Kishore Babu, and Director, Agriculture – Dr. Veeraraghavaiah Ravuri.

"Water is Life, Water is Food, Leave No One Behind". Few students have shared their views about the significance of Food Chain and Food Pyramid in maintaining health. World Food Day has been celebrated to promote the idea of feeding the world and eliminating Poverty in many parts of the country and the idea was initiated by FAO. The World Food Day has been celebrated every year with different themes and the main aim to reduce poverty and provide food to all the human beings.

Dr. Veeraraghavaiah Ravuri, Director of Agriculture addressed the esteemed student, as we gather here, we're reminded of a fundamental truth: food is not just a basic necessity; it's a universal language that connects us all. On this World Food Day, we come together to reflect on the significance of food security, sustainability, and the pivotal role each one of us plays in ensuring a nourished future for all. In our increasingly interconnected world, the issue of food

security looms larger than ever. Millions around the globe still suffer from hunger and malnutrition, while others grapple with the consequences of overconsumption and food waste. This is a stark reminder that the fight for food security is far from over. However, amid these challenges lies immense opportunity. As future leaders and thinkers, each of you holds the power to drive positive change. Whether through innovative agricultural practices, sustainable food production methods, or advocating for equitable distribution, your actions can make a tangible difference. But our responsibilities extend beyond ensuring access to food; we must also prioritize sustainability. Together, we can build a world where no one goes to bed hungry, and where every individual has access to nutritious, sustainably sourced food.

Mr. Kummara Setti Veera Bhadra Rao, Head of the Department started his speech, as we commemorate World Food Day, it's essential to recognize the pivotal role education plays in shaping our understanding of food systems and empowering us to effect positive change. Education is not merely about acquiring knowledge; it's about fostering critical thinking, empathy, and a sense of responsibility towards our communities and the planet. Through education, we gain the tools to analyze complex issues, challenge assumptions, and advocate for meaningful solutions. He also emphasized the importance of interdisciplinary learning in addressing food security and sustainability.

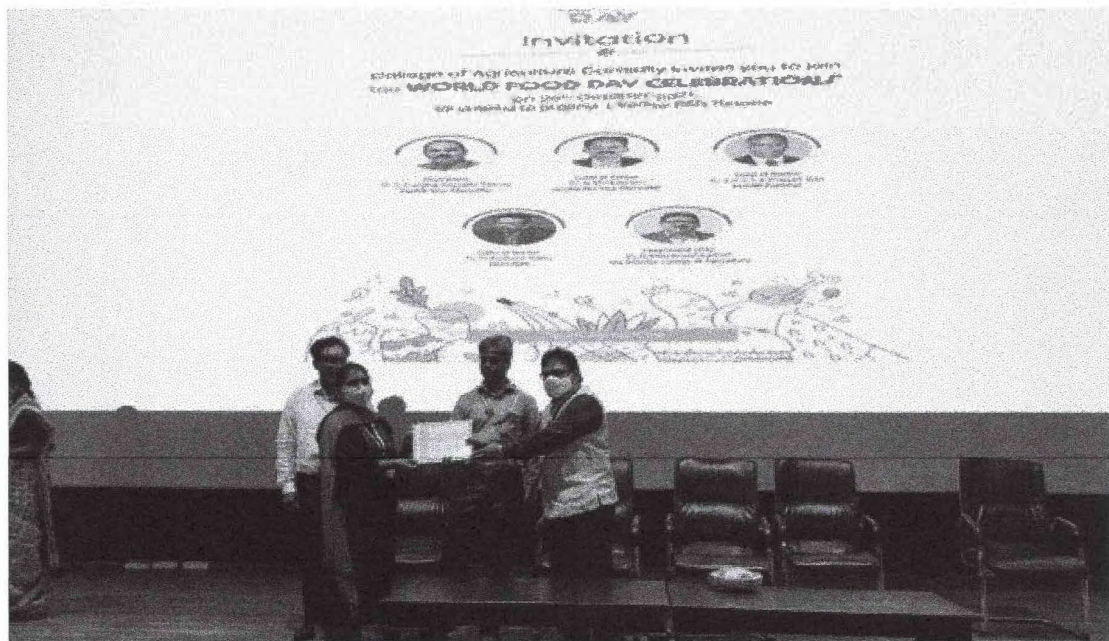

As you continue your academic journey, I encourage you to seize every opportunity to learn, explore, and collaborate. Be open to new ideas, embrace diversity, and never underestimate the impact you can have as agents of change. In closing, let us reaffirm our commitment to education as a catalyst for building a more sustainable, equitable, and nourished world. Together, let's strive to create a future where food is not just a source of sustenance but a symbol of hope, resilience, and shared humanity.

The event came to an end with the vote of thanks.

## **OUTCOMES**

The outcomes of World Food Day pertaining to agriculture typically include increased recognition of the role of sustainable farming practices in ensuring food security, heightened support for smallholder farmers, and advocacy for policies that promote agricultural innovation and resilience. Additionally, World Food Day outcomes often entail greater investment in agricultural infrastructure and research, leading to improved productivity and livelihoods for farmers. These outcomes collectively contribute to advancing global efforts towards achieving food security and sustainable agriculture.
