

Cohorts, specialization, and skill sets

Name of Co-hort	Specialization	Skill Sets
Crop Production	Agronomy	Plan and manage the cold storage operations
	Animal Husbandry	Assist in equine breeding and its associated functions
	Soil Science And Agricultural Chemistry	Maintain various types of protected cultivation structures
	Horticulture	Supervise the garden activities and manage the gardeners
Crop Protection	Pathology/ Nematology	Maintain farm assets and other related records
	Entomology	Honey bee production
	Sericulture	Silk worm rearing
	Microbiology	Agri-entrepreneurship & rural enterprises
Crop Management	Extension	Inspect the trade execution process
	Agri. Engineering	Equipment operation and maintenance
	Statistics	Certified data analyst
	Data analysis	Certified professional in python programming certification
	Data analysis	Certified associate in python programming certification
	Environmental Science	Plan and design the research activities
Crop Improvement	Environmental Science	Watershed management
	Environmental Science	Environment conservation
	Plant Breeding and Genetics/Bio Technology	Analyzing the seeds
	Seed Technology	Seed processing
