SPA-Workshop Report

Activity: SPA- Workshop

Date: 22nd & 23rd February 2024.

Students from Batches of Y22 and Y19 at KLU School of Architecture, Vijayawada recently engaged in a two-day knowledge-sharing workshop aimed at broadening their understanding of crucial aspects within the architectural realm.

On **Day-01**, the workshop delved into the critical topic of water management within residential settings, with a specific focus on urban contexts. Through interactive sessions and expert-led discussions, participants gained insights into innovative strategies and technologies for efficient water usage and conservation in residential structures. Practical demonstrations and case studies enriched their understanding of sustainable water management practices, preparing them to address contemporary challenges in urban development.

Day-02 of the workshop centered around Hospitality Lighting within the hospitality sector. Students received comprehensive guidance on the role of lighting in enhancing the ambience, functionality, and aesthetic appeal of hospitality spaces. Through hands-on activities and expert insights, participants explored various lighting techniques, fixtures, and design principles tailored to meet the unique requirements of hospitality environments.

Overall, the workshop provided an invaluable opportunity for students to augment their theoretical knowledge with practical skills and real-world applications. The interactive nature of the sessions, coupled with expert guidance, equipped participants with the expertise necessary for their future endeavors in architecture and urban planning.
