National Service Scheme (NSS)

Bioplastics vs Plastics

Event : Bioplastics vs Plastics
Date : 27-08-2026
Place : Geetanjali School (CBSE), Kunchanapalle.

Objective:

The objective of the **Awareness on Plastic** program conducted on **27-08-2026** at **Geetanjali School (CBSE), Kunchanapalle** was to educate students about the increasing use of plastic and its impact on the environment. The program aimed to create awareness about the different types and uses of plastic, the environmental problems caused by excessive plastic consumption and improper disposal, and the importance of adopting sustainable alternatives. It also encouraged students to reduce the use of single-use plastics, practice proper waste management, and develop responsible habits to contribute towards a cleaner and healthier environment.

Description:

The awareness program was conducted at **Geetanjali School (CBSE), Kunchanapalle** to help students understand the importance of reducing plastic pollution. The session introduced students to the concept of bioplastics and explained their basic characteristics and differences from conventional plastics.

The students were made aware of how excessive use and improper disposal of conventional plastics can contribute to pollution and affect soil, water bodies, animals, and the surrounding environment. The session also highlighted the importance of reducing single-use plastics, reusing materials, segregating waste properly, and considering environmentally friendly alternatives.

The topic was presented in an interactive manner through simple explanations, examples, discussions, and a question-and-answer session. Students actively participated and were encouraged to think about their everyday plastic consumption and how small changes in their habits could help protect the environment.

Outcome:

The program successfully improved students' understanding of **bioplastics, conventional plastics, and plastic pollution**. Students gained awareness about sustainable alternatives and the importance of responsible plastic consumption and proper waste disposal. The session encouraged them to reduce unnecessary use of single-use plastics, reuse materials where possible, and follow better waste-management practices.

The knowledge gained during the program can also be shared by students with their families and peers, helping to spread environmental awareness beyond the classroom.

Impact on Society:

The program contributed positively to society by promoting environmental awareness among young students and encouraging them to make responsible choices regarding plastic use. Awareness at a young age can help students develop sustainable habits and influence their families and communities to adopt better waste-management practices.

By encouraging the reduction of unnecessary plastic use and promoting sustainable alternatives, the initiative can contribute to reducing plastic pollution, protecting ecosystems, and maintaining cleaner surroundings. Overall, the program supports the development of a **more environmentally responsible, clean, and sustainable society**.

Details of the Event:

Name of the Event : Bioplastics vs Plastics

Place of the Event : Geetanjali School (CBSE), Kunchanapalle

Date of the event : 27-08-2026

No. of Hours : 01:50 pm to 4:00 pm

No. of Participants : Students: 30, Faculty: 01

Faculty Name : P. Suresh (Id no- 4099)
