Department of Civil Engineering

Program: B.Tech -Civil Engineering

Academic Year: 2022-2023

Course		CO.	
Code	Course Title	No	Description of the course Outcome
4	1=	CO1	Model the physical laws and relations mathematically as a first order differential equation, solve by analytical and numerical methods also interpret the solution.
22MT1101	Mothematics	CO2	Model physical laws and relations mathematically as a second/higher order differential equation, solve by analytical method and interpret the solution.
221411101	Mathematics for Computing	CO3	Obtain the Fourier series expansions of periodic functions and use the series to solve ordinary differential equations.
		CO4	Model physical problems mathematically as a system of linear equations and solve them by analytical and numerical methods. Also, determine the nature of Quadratic form using Eigen values.
		CO5	Verify the solution of problems through MATLAB.
		CO1	Be able to understand elements and principles of design
22SC1102	Introduction To	CO2	. Able to grasp stage model of action cycle
	Design	CO3	Be able to understand design laws and their importance in design field
	principal de la	CO4	To comprehend various rules of composition of design
	B 11	CO5	To gain hands-on experience of fundamentals of design Dr. P. POLUTRAJU HEAD

Department of Civil Engineering Koneru Lakshmaiah Educational Foundation (Deemed to be University) Vaddeswaram Guntur District

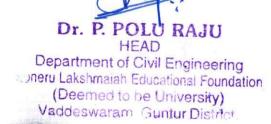

22SC1203	User Centric	CO1	Understand the different roles and responsibilities in phases of User centered Design
	Design	CO2	Identify user pain points and opportunity areas through empathy and collaborative design.
	Techniques	CO3	To be able to design a better User Experience using UCD and 6D process
	Design	CO1	Understand the basics of design thinking and its implications in product or service development
22SC2104	Thinking And Innovation	CO2	Understand and Analyse the requirements of a typical problem
		CO3	Plan the necessary activities towards solving the problem through ideation and prototyping
		CO4	evaluate the solution and refine them based on the customer feedback
22BT1001	Biology For	CO1	Acquire the Knowledge of basic biology
	Engineers	CO2	Acquire the Knowledge of Human Biological Systems
		CO3	Acquire Knowledge on Microorganisms and Biosensors
	Mathematics	CO1	Apply differential and integral calculus to find maxima & minima of functions and evaluate the integrals
22MT2102	For Engineers	CO2	Model and solve the relevant phenomena as a differential equation
		CO3	Demonstrate Fourier series and Analytic functions
		CO4	Describe probability, Random Variables and Algebraic structures
	Probability And	CO1	Identify the basic concept of probability theory and types of random variables and also their applications in probability distributions.
22MT2007	Optimization	CO2	Apply discrete and Continuous probability distributions to analyse the various real-world situations.
	Techniques	CO3	Illustrate the bivariate data using correlation and regression analysis and formulate the given phenomena as a linear programming problem and solve it by graphical method. and simplex methods.
		CO4	Demonstrate the Big- M method, dual simplex method and obtain the solutions of non-linear programming problems using Pivot, Wolfe's algorithms and separable programming technique

Dr. P. POLU RAJU
HEAD
Department of Civil Engineering
Koneru Lakshmaiah Educational Foundation
(Deemed to be University)
Vaddeswaram Cust

	11967-1	CO1	Understand the concepts of grammar to improve communication, reading, and writing skills
	Integrated Professional	CO2	Demonstrate required knowledge over Dos and Don'ts of speaking in the corporate context. Demonstrate ability to face formal situations interactions.
22UC1101	English	CO3	Understand the varieties of reading and comprehend the tone and style of the author. Skim and scan effectively and appreciate rhetorical devices
		CO4	Apply the concepts of writing to draft corporate letters, emails, and memos
	English	CO1	Demonstrating different interpersonal skills for employability
22UC1202	Proficiency	CO2	Distinguishing business essential skills
er de se	·	CO3	Classifying social media and corporate communication skills
1 *	-	CO4	Applying analytical thinking skills
2	Professional Communicatio n Skills	CO1	Knowledge about Verbal Ability
22UC2103		CO2	Knowledge about Critical Thinking Skills
		CO3	Knowledge about Quantitative Aptitude:
1		CO4	Knowledge about Reasoning
	Corporate	CO1	Knowledge about Verbal Ability
22UC2204	Communicatio n Skills	CO2	Knowledge about Soft Skills
		CO4	Knowledge about Quantitative Aptitude
M 19 19 19		CO4	Knowledge about Reasoning
	Aptitude Builder	CO1	Knowledge about Critical Reading
22UC3005	Bunder	CO2	Knowledge about Trinity Guild Hall
	(Transferri	CO3	Knowledge about Quantitative Aptitude Dr. P. POLU RAJU

HEAD
Department of Civil Engineering
Koneru Lakshmaiah Educational Foundation
(Deemed to be University)
Vaddeswaram Guntur District.

2		CO4	Knowledge about Reasoning: Number and Letter Series, Number and Letter Analogy, Coding and decoding, Odd man out. Selections
		CO1	Design Basic and Complex Building Blocks for real world problems using structured programming paradigm.
		CO2	Translate computational thinking into Logic Design for Solving real world problems.
22SC1101	Thinking For Design	CO3	Apply and Analyse CRUD operations on Basic Data Structures using Asymptotic Notations
addic days		CO4	Apply and Analyse CRUD operations on Linear Data Structures using Asymptotic Notations.
		CO5	Apply the structured programming paradigm with logic building skills on Basic and Linear Data Structures for solving real world problems.
	Design Tools	CO1	Practice design thinking by developing artistic skills
22ME1103	Workshop - I	CO2	Visualize and practice innovative design by final drafting using photogrammetric and model the design using prototyping technique
	_	CO3	Apply the concept of AI & Data analytics & finalize the requirements to design his idea
		CO4	Draft a report of his project from the initial stage & make a report which include scope, time and cost management of his project
		CO1	Illustrate solving typical problems using Arrays, Strings and Lists.
	-	CO2	Demonstrate applications of stacks & queues and solving typical problems using recursion.
22SC1202	Data Structures	CO3	Demonstrate use of sorting, Heaps and binary tree techniques in problem solving.
		CO4	Examine AVL trees and Hashing techniques.
		CO5	Apply the knowledge obtained by the course to solve real world problems.

		CO1	Understand basic Concepts of OOP, fundamentals of java and apply the concepts of classes and objects through Java Language. Apply constructors, Overloading, parameter passing.
	Object	CO2	Apply access control, Inheritance, Packages
22SC1203	Oriented Programming	CO3	Apply Interfaces, Exception Handling, multi- threading, I/o.
	i rogramming	CO4	Apply collection framework and event driven programming.
	51	CO5	Apply object-oriented programming concepts to write programs and Analyses requirements and design to implement lab-based project with SDLC in a group of students.
	Design Tools	CO1	Practice the design ideology by artistic skill
22SC1209	Workshop - II	CO2	Visualize the design ideology by using VR technology
п		CO3	Visualize the design ideology by incorporating VR technique
		CO4	Visualize and present his design idea by applying AR technique
=		CO1	Apply the concept of forces, governing static equations and analyse planer system of forces.
1		CO2	Use analytical techniques for analyzing forces in statically determinate structures.
21PH1010	Mechanics	CO3	Understanding the concepts of planar and non-planar system of parallel forces and analysing them. Estimate moment of inertia of lamina and material bodies.
		CO4	Apply fundamental concepts of kinematics and kinetics of particles to the analysis of simple, practical problems.
-		CO1	Understand the principles of drawing and use of drafting instruments
	Engineering	CO2	Draw engineering curves and scales.
177CF10071	Graphics for civil engineers	CO3	Draw the projections of points, lines, planes and solids
se for t	F. 3 3,72 -4 3		Draw the surface sheath of solids by development of surfaces and the sections of Solids.

		CO5	Prepare 2D & 3D drawings of solids and their transformations.
		CO5	Apply the knowledge on structure and properties of materials while executing experiments and develop inter disciplinary projects.
	AI&ML	CO1	Apply the basic operations and data modifications in python
	Applications in Civil	CO2	Apply the regression analysis on the given data
22CE2105	Engineering	CO3	Apply some basic machine learning techniques on given data
1	2	CO4	Understand the deep learning concepts
=		CO5	Apply AI and ML techniques in Python
		CO1	To understand concept of flow phenomenon and determination of fluid properties.
		CO2	To understand the mechanics pressure and its measurement.
	Mechanics of Fluids	CO3	To get the concepts of kinematic principles and solutions for simple mathematical equations, to understand the energy principle, continuity equation of fluid in 3-dimensions
	2 2	CO4	To know various hydraulic principles of pipe flow and losses in pipe systems. To Understand the Dimensional analysis concept and deriving the relevant equations.
		CO1	Associate with the stress-strain diagrams and the relationship between the elastic constants, estimate temperature stresses in compound bars and find the stresses in thin walled pressure vessels
22CE2101	Solid	CO2	Draw Shear force and Bending moment diagrams for statistically determinate beams
	Mechanics	CO3	Calculate the Bending and shear stresses and draw the distribution diagrams for various cross sections.
		CO4	Estimate the transformation of stress in a plane and draw Mohr's circle, estimate stresses due to torsion for circular shaftsand find buckling load for centric and eccentric columns
		CO1	Understand various geological processes operate on the surface of the earth, impact of the processes on the construction
	J	4	- 0

1			materials.
22CE2205	Geology	CO2	Understand the formation of different types of rocks and their identification and properties and use in sourcing suitable geological materials for construction
		CO3	Equip with factors leading to various geological hazards and able to identify areas vulnerable to sliding, come out measures to stabilize slopes and seismic vulnerability.
		CO4	Equip with basic knowledge required for identification of suitable site for the proposed construction project, equip with basic knowledge of hydro geological properties of rocks, identification of potential pockets for tapping groundwater and geological settings that are un favorable / unsafe for construction of dams and driving the tunnels.
		CO1	Understand basic concepts of surveying
22CE2103	Surveying	CO2	Understand how to operate instruments required for surveying
		CO3	Applying the surveying equipments required based on the functionality and nature of work
		CO4	Apply field data to prepare a plan required for a given civil engineering project
4		CO1	Understand the principles of drawing and use of drafting instruments
	Engineering	CO2	Draw engineering curves and scales.
122CE10021	Graphics for civil engineers	CO3	Draw the projections of points, lines, planes and solids
		CO4	Draw the surface sheath of solids by development of surfaces and the sections of Solids.
		CO5	Prepare 2D & 3D drawings of solids and their transformations.
		CO5	Apply the knowledge on structure and properties of materials while executing experiments and develop inter disciplinary projects.
	AI&ML	CO1	Apply the basic operations and data modifications in python
	Applications	CO2	Apply the regression analysis on the given data

Engineering	CO4	Understand the deep learning concepts
	CO5	Apply AI and ML techniques in Python
	CO1	To understand concept of flow phenomenon and determination of fluid properties.
	CO2	To understand the mechanics pressure and its measurement.
Mechanics of Fluids	CO3	To get the concepts of kinematic principles and solutions for simple mathematical equations, to understand the energy principle, continuity equation of fluid in 3-dimensions
	CO4	To know various hydraulic principles of pipe flow and losses in pipe systems. To Understand the Dimensional analysis concept and deriving the relevant equations.
	CO1	Associate with the stress-strain diagrams and the relationship between the elastic constants, estimate temperature stresses in compound bars and find the stresses in thin walled pressure vessels
Solid	CO2	Draw Shear force and Bending moment diagrams for statistically determinate beams
Mechanics	CO3	Calculate the Bending and shear stresses and draw the distribution diagrams for various cross sections.
	CO4	Estimate the transformation of stress in a plane and draw Mohr's circle, estimate stresses due to torsion for circular shaftsand find buckling load for centric and eccentric columns
	CO1	Understand various geological processes operate on the surface of the earth, impact of the processes on the construction materials.
	CO2	Understand the formation of different types of rocks and their identification and properties and use in sourcing suitable geological materials for construction
Geology	CO3	Equip with factors leading to various geological hazards and able to identify areas vulnerable to sliding, come out measures to stabilize slopes and seismic vulnerability.

Will Mark		CO4	Equip with basic knowledge required for identification of suitable site for the proposed construction basic knowledge of hydro geological properties of rocks, identification of potential pockets for tap geological settings that are un favorable / unsafe for construction of dams and driving the tunnels.	n project, equip with ping groundwater and
1 1		CO1	Understand basic concepts of surveying	
22CE2103	Surveying	CO2	Understand how to operate instruments required for surveying	7.441
	1 2	CO3	Applying the surveying equipments required based on the functionality and nature of work	100
		CO4	Apply field data to prepare a plan required for a given civil engineering project	-
	Prestressed	CO1	To introduce prestressing methods, principles and concepts	
22CE3221	Concrete	CO2	To determine losses in prestress	g:
	ji	CO3	To Analyse PSC Sections both at transfer of prestress and Service load conditions	
	*	CO4	To design prestressed concrete beams as per IS Code, to design end block of PSC beams.	
	Bridge	CO1	To design slab culvert as per IRC Code	
22CE4141	Engineering	CO2	To design simple supported T-beam girder beam	
		CO3	To design pier and abutments	
		CO4	To design various bridge bearing, to design bridge foundation like well foundation	
	Sustainable	CO1	Understand the construction basics of a Common building construction methods conventional	
2CE41511	construction Technologies	CO2	Understand the modern construction methods basics of construction Modular Construction Precast	concrete.
-		CO3	Understand the sustainable construction materials technologies and project management strategies	
		CO4	Understand the LEED for New Construction rating system	
		CO1	Knowledge about the different techniques of ground improvement and their suitability.	
1.0	Ground	CO2	Understanding and design of stone columns for enhancing soil bearing capacity.	malu

(Deemed to be University)

	Improvement	CO3	Knowledge of the grouts, their types, properties and application.
v	Techniques	CO4	Introduction to geo synthetics, their types, function and application, Ability to design and analyse the earth-reinforcements with their connections
22CF3232	Geotechnical Earthquake	CO1	Knowledge of the seismic phenomenon, its occurrence, tectonic theories, seismic waves and their motion in different media and measurement of ground motions. Analysis skills of 1-D ground responses using linear and non-linear approaches.
	Engineering	CO3	Ability to analyze the seismic hazard through deterministic and probabilistic approaches.
		CO4	Ability of modifying the actual ground motion records and their time and frequency domain generation. Knowledge of dynamic soil properties and their measurements using field and laboratory tests, Knowledge of the liquefaction phenomenon and its effects and the remedial measures to be taken for soil improvement.
		CO1	Knowledge about the different techniques of earth retaining structures and their suitability.
	Design of	CO2	Understanding and design of retaining walls, braced cuts and sheet piles.
22(F4142	Earth Retaining Structures	CO3	Knowledge of the grouts, their types, properties and application.
		CO4	Introduction to reinforced earth and geo synthetics, their types, function and application, Ability to design and analyse the earth- reinforcements and coffer dams with their functions.
		CO1	Analyze the physical properties of rocks and failure criterion
22CE4152	Contract Contract	CO2	Analyze the rock mass classification, stress around mine openings
	Mechanics	CO3	Analyze the strain and displacement of the rock mass
		CO4	Analyze shear strength of soil and analyze and interpret the laboratory and field tests required for any geotechnical investigation
	Sustainable	CO1	Design and draw the Vertical drop weir on permeable foundations

Dr. P. DELURAJU

HEAD

Department of Civil Engineering

22CE3213	engineering &	CO2	Design and draw the Canal regulator, Irrigation canal, direct sluice, Surplus weir of a tank
w.l.	technology	CO3	Design and draw the Profile of a Ogee spillway
	* v / / = :	CO4	Design and draw the Cross Drainage works
	Environmental	CO1	Understand stream flow and its measurements
22CE3223		CO2	Understand the classification of the rivers and design of cross drainage works
	assessment and life cycle	CO3	Understand the reservoir planning and classification of dams
	analyses	CO4	Able to design gravity and earth dams
. Candon	Solid Waste	CO1	Understand the basic concept of Environmental impact assessment, types of environmental impacts, significance and criteria for selection
22CE3233	and Landfills	CO2	Select methodology for identification of environmental impact.
		CO3	Apply the knowledge of predicting impact of proposed project on air & water
	s n	ÇO4	Acquire knowledge of predicting impact of proposed project on Noise, Soil, Biological and Socio-economic conditions, Acquire the skills of preparing environment management plans.
		CO1	Understand types, sources of solid waste, composition and their Properties.
I	Solid Waste Management	CO2	Understand the present scenario, challenges of solid waste management and various waste disposal options available.
22CE416XI	and Landfills	CO3	Understand methods of solid waste disposal methods of land filling, systems adopted for conversion of solid waste and recovery of materials and energy from solid waste.
- + · ·		CO4	Understand the components of hazardous waste types, composition, properties and acquire skills of designing of various lining system for landfill and treatment as per MoEF and CPCB

Dr. PPOLU RAJU
HEAD
Department of Civil Engineering
Koneru Lakshmaiah Educational Foundati
(Deemed to be University)
Vaddeswaram Guntur District

A		CO1	Understand the basic concepts of Stream Sanitation & design of Stabilization ponds
	Advanced Environmenta	CO2	Acquire the knowledge of industrial wastewater treatment process
22CE4173	1 Engineering	CO2	Acquire the knowledge on new concepts in biological waste treatment
		CO4	Analyze air pollution and plume behavior, measuring of noise pollution, understand various aspects related to Solid & Hazardous waste management
	Intelligent	CO1	Understand the Objectives ITS
22CE3251	transportation systems	CO2	Understand the Importance of telecommunications in the ITS system
		CO3	Understand Advanced Traffic Management Systems
e e a fo		CO4	Understand Integration of Automated Highway Systems
	Traffic	CO1	Apply the Concepts of Probability in traffic Engineering
22CE3235	Engineering &	CO2	Know the Fundamental design concepts of Interchanges, Parking Facilities, Freeways
	maintenance	CO3	Design Traffic Facilities include Un signalized Intersections (Rotary), Signalized Intersection (signal design)
		CO4	Know the Accident Situation in India, road safety measures, Understand Detrimental Effects of traffic on the environment
	Pavement	CO1	Characterize pavement materials and also carry the advance tests on bituminous mixtures
22CE3225	materials &design	CO2	Thorough with stresses and strains of flexible and rigid pavements.
,		CO3	Thorough with analysis and design of flexible highway and airport pavements
		CO4	Thorough with analysis and design of rigid highway and airport pavements

HEAD

(Deemed to be University)
Vaddeswaram Guntur District

	Urban Transport	CO1	Learn the concept of travel demand and supply and modes available for transportation
22CE4145	Systems	CO2	Understand the different types of Traffic Surveys used in planning
-	Planning	CO3	Identify and analyze trips as a part of transport planning
		CO4	Plan Public Transport Systems, Utilize ITS in Transport Planning
	Railway engineering	CO1	Understand about the Classification of Railways, Permanent Way & its components, functions.
22CE4155	airport planning and	CO2	Analyze track alignment, geometric elements, Horizontal and Vertical curves, super elevation, and Negative Super elevation.
· = #11	design	CO3	Understand about the various factors affecting Selection of site for Airport.
		CO4	Geometric Design of Runway, Computation of Runway length, Correction for runway length, Understand the layout of port components and operation of navigational aids that involved in functions of ports.
		CO1	Understand the Engineering and Technology of Materials
22CE3216	Contracts	CO2	Understand the Development of Microstructure.
	_	CO3	Understand the Construction Materials and Criteria for Selection
		CO4	Understand the Non-structural materials
	520	CO1	Understand the Materials
22CE4156	Concrete Technology	CO2	Understand the Nondestructive evaluation
	eres o met traffichis	CO3	Understand the Properties of constituent materials of Fibre reinforced concrete
	Mag n grade	CO4	Understand the Durability of flyash concretes and High-performance concretes

Dr. POLU RAJU

HEAD
