

Student-Faculty Interaction Program

30 August 2012: Student-Faculty interaction program was organized by Department of Civil Engineering for the second, third and final year B.Tech (CE) students with the department faculty. The program was facilitated by Head of the Department **Prof. Ch. Hanumantha Rao** on various topics like the real meaning of civil engineering, various career opportunities, facilities offered by the department, flexibility in curriculum, mini-projects, expressing ideas at symposiums & conferences, publishing papers, entrepreneurship, etc.

The proceedings of “Workshop on Career Guidance” organized by The Institution of Engineers (India), Vijayawada Centre was shared in the interaction program to motivate students and faculty to incorporate the best practices. Later some of the advanced civil projects were showcased to create zeal among the students to acquire such skills. All the students were asked to carefully choose the topics for the mini-projects and term paper such that they are innovative and useful to the society.

All the faculty members introduced themselves to the students with their educational background, areas of interest, and current projects in which they are working. The students were advised to regularly meet their faculty and interact with them, so that they can know the mutual interests and work together on various issues.

Prof. P. Saha, was given the responsibility to encourage the students to come up with innovative ideas and take them to the next level. The prestigious “Yuva Ratna Award” organized by Aditya Birla Group was won twice by the earlier students of Civil Engineering Department, K L University. The present students are also expected to bring laurels to the department by participating and winning the award.
