Date: 07/08/2019

Venue: Nagarjuna High School, Pedavadlapudi

### **RAIN WATER HARVESTING**

#### **Description of the Event:**

We all know how important water is in our day to day lives. We see rainwater always being wasted, yet there is no proper initiative to conserve the rain water. Therefore we team CEA planned to create an awareness program on the conservation of rain water. On 8/08/2019, Thursday we went to Nagarjuna high school, Pedhavadlapudi to explain the eighth and ninth standard students about the rain water harvesting techniques. We even displayed the processes using PPTs and a few videos so that they could understand more clearly.

In the PPT we have show the percentages of water sources that are available on the earth, whats happens if the there are no water sources and explained how to increase the groud water levels. The video shows the animations and construction of rain water harvesting pits.

We ended up the event with a questionnaire session, in which the children took an active participation and cleared their doubts. We even posed few questions on the problems faced by society and the alternative measures which can be used to solve water problems. 52 volunteers of a CEA have organized the event and 2 faculty members have coordinated the event.

#### **Benefits:**

- Students get to know about the water crisis in India.
- Various methods and techniques to conserve water.

- Practical knowledge through PPTs and videos.
- The active participation in questionnaire session brought confidence in students.
- Also the interpersonal skills are improved.
