Details of the Event:

Date of the Event	:	13-02-2024
Name of the Event	:	Mobile Addiction
No. of Hours	:	01:30 PM To 04: 30 PM
Venue of the Event	:	Z.P. High School, China Kakani Villages
No. of Participants	:	Students: 84, Faculty: 02
No. of Beneficiaries	:	415

Description of the event:

On February 13, 2024, in the quaint setting of China Kakani Village, KLEF-CEA orchestrated a poignant event focused on raising awareness about the perils of "Mobile Addiction." With a blend of interactive workshops, informative presentations, and engaging discussions, attendees were sensitized to the detrimental effects excessive mobile phone usage can have on mental health, interpersonal relationships, and overall well-being. Through this event, KLEF-CEA aimed to instigate a collective dialogue and encourage mindful technology usage, fostering a healthier and more balanced relationship with digital devices in the community.

Objectives:

Creating awareness on "Mobile Addiction" among school students serves several important objectives:

Educating about Risks: The primary objective is to educate students about the potential risks and negative consequences associated with excessive mobile phone usage. This includes impacts on physical health, mental well-being, academic performance, and social interactions.

Promoting Healthy Habits: By raising awareness, the aim is to promote healthy habits and responsible use of mobile devices. This involves teaching students to strike a balance between screen time and other activities, such as physical exercise, socializing face-to-face, and engaging in hobbies or academic pursuits.

Empowering Decision-Making: Encouraging critical thinking and empowering students to make informed decisions regarding their mobile phone usage. This includes understanding when and how to use their devices responsibly, recognizing signs of addiction, and knowing where to seek help if needed.

Fostering Digital Literacy: Enhancing students' digital literacy skills to navigate the online world safely and responsibly. This involves teaching them about online privacy, cyber bullying, digital footprints, and distinguishing between productive and harmful online activities.

Building Communication Skills: Emphasizing the importance of real-life communication and interpersonal skills over excessive reliance on digital communication platforms. This

includes promoting face-to-face interactions, active listening, empathy, and effective communication strategies.

Creating a Supportive Environment: Establishing a supportive school environment where students feel comfortable discussing their concerns about mobile addiction and seeking guidance from teachers, counselors, or other trusted adults.

Overall, the objectives of creating awareness on mobile addiction in school students aim to empower them with the knowledge, skills, and resources needed to maintain a healthy and balanced relationship with technology in today's digital age.

Outcome:

The outcome of creating awareness on "Mobile Addiction" among school students can manifest in various positive ways. Firstly, students may exhibit increased awareness of their mobile phone usage patterns, leading to a reduction in excessive screen time and a more balanced lifestyle. Improved self-regulation and time management skills may emerge as students learn to prioritize activities beyond their digital devices. Additionally, fostering healthier interpersonal relationships and stronger focus during academic pursuits could be observed, as students become more mindful of the detrimental effects of mobile addiction on their well-being and academic performance. Ultimately, the outcome strives to empower students to make informed choices about their technology use, leading to a generation that is more digitally literate, socially connected, and mentally resilient.

Impact of Society:

The impact of society on "Mobile Addiction" in school students is profound and multifaceted. Societal norms and behaviors surrounding technology use, including constant connectivity and the normalization of smartphone dependency, can significantly influence students' attitudes and behaviors towards their mobile devices. Social pressures, such as the need to stay updated on social media, communicate with peers, or engage in online activities, can exacerbate mobile addiction tendencies among students. Additionally, the

pervasive presence of smart phones in daily life, coupled with societal expectations regarding digital proficiency and productivity, can create an environment where students feel compelled to use their devices excessively, often at the expense of their well-being and academic performance. As such, addressing mobile addiction in school students necessitates a holistic approach that considers the broader societal influences shaping their relationship with technology.
