Time	02.00 PM-04.30 PM.
Venue	REVENDRAPADU
Target Participants: BCA/Faculty	STUDENTS/FACULTY
Number of Participants	30

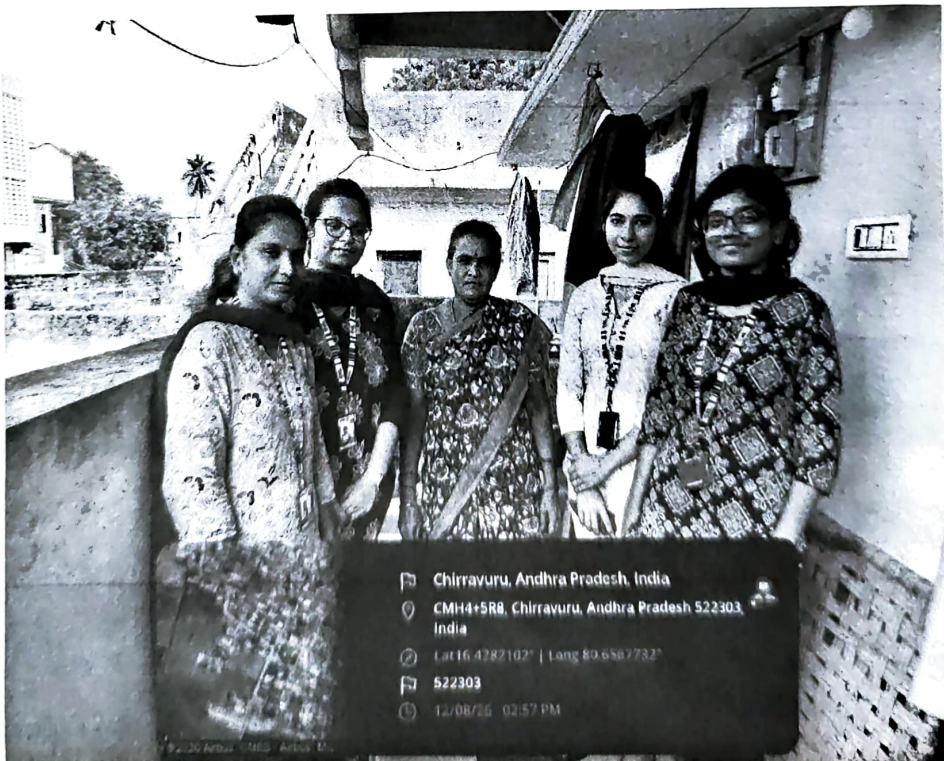

Brief Overview on CEA

The **Centre for Extension Activity (CEA)** is an initiative that connects the institution with society through community-oriented programs. It encourages students to participate in social service, outreach activities, and humanitarian initiatives, helping them develop social responsibility and empathy along with practical life experience.

Objectives:

- To promote community engagement and social responsibility among students
- To organize extension and outreach activities for societal welfare
- To provide students with opportunities to serve vulnerable sections of society
- To inculcate empathy, compassion, and ethical values
- To strengthen the institution's connection with the community

Report:

A Centre for Extension Activity (CEA) community service programme on Rainwater Harvesting was successfully conducted by Central CEA at Revendrapadu. Students from the Department of BCA, KLEF actively participated in the programme. The primary objective of the programme was to create awareness among the local community about the importance of rainwater conservation, sustainable water management, and the efficient utilisation of natural resources.

The BCA students actively participated in various activities during the programme. They interacted with the local residents and created awareness about the significance of rainwater harvesting and its role in addressing water scarcity. Students explained simple rainwater harvesting methods, including rooftop rainwater collection, storage, and groundwater recharge. They also highlighted the importance of preventing water wastage and adopting sustainable water conservation practices.

The programme created a meaningful and positive impact on both the students and the local community. Participation in the activity helped BCA students develop environmental awareness, teamwork, social responsibility, and a better understanding of sustainable development practices. The interaction with the community encouraged residents to recognise the importance of conserving rainwater and using water resources responsibly.

The programme successfully fulfilled the objectives of Central CEA by promoting environmental sustainability, community engagement, water conservation, and social awareness. The active participation of BCA students contributed to the success of the Rainwater Harvesting programme and encouraged the community to adopt responsible water management practices for a sustainable future.

Outcome :

1. The programme strengthened students' sense of environmental responsibility and community involvement.
2. Students developed greater awareness about water conservation, rainwater harvesting, and sustainable water management practices.
3. The programme created awareness among the local community about the importance of conserving rainwater and preventing water wastage.
4. The activity enhanced teamwork, leadership, communication, and organizational skills among the participating students.
5. The event fostered a positive relationship between the institution and the local community by encouraging collective participation in environmental conservation.
6. The objectives of the Centre for Extension Activity (CEA) were successfully achieved by promoting environmental sustainability, water conservation, social awareness, and responsible community participation.
