

A Career Orientation Talk with Computer Science students

Date of Event : 10-03-2022

On March 10th, 2022, Ms. Yamini Krishna Challimadugu, an Associate QA Engineer at Informatica, delivered an inspirational lecture titled "A Career Orientation Talk for Computer Science" to the III B.Tech students. The lecture was conducted online via Microsoft Teams.

Ms. Yamini Krishna Challimadugu began by highlighting the profound impact of computer science on various fields of science, engineering, and society. She provided practical examples to demonstrate the application of computer science in future communication, showcasing its significance and potential.

During the lecture, she shed light on the different career paths and opportunities available for computer science graduates. She emphasized that one of the major obstacles to successful placement is the gap between the skills expected by the industry and those acquired through the academic curriculum. To address this, she suggested careful planning of the academic curriculum, incorporating industry requirements to enhance the placement record of the institution. Additionally, she stressed the importance of instilling entrepreneurial concepts among students, encouraging them to transform their academic projects and innovative ideas into startup ventures.

The lecture provided valuable insights into the diverse career opportunities awaiting computer science graduates, emphasizing the significance of strong communication skills in addition to academic excellence for their professional growth.

In conclusion, Mr. R. Dinesh, the Alumni Coordinator of the CSE Department, expressed gratitude to Ms. Yamini Krishna Challimadugu for sharing her valuable time and delivering a motivational talk. The lecture proved to be an enlightening experience for the students, empowering them to make informed decisions about their future careers.
