

## Guest for DTI

**Date of Event : 27-04-2022**

KL University recently organized an event titled "Design Thinking for Innovation" specifically for first-year engineering students. These students enthusiastically participated by submitting numerous innovative models for consideration.

To make the event even more special, two distinguished KL alumni were invited as judges for finalizing the projects. Mr. Raghu, a proud alumnus from the Batch of 2010-14 in the Computer Science and Engineering (CSE) Department, is currently running his own jewellery business called Nataraj jewellery in Tenali. Meanwhile, Mrs. Sai Divya, who completed her M.Tech in ECE in 2019, has embarked on an entrepreneurial journey with her own business called Nspace Technology.

The projects showcased a combination of group efforts and individual endeavours, showcasing the students' creativity and technical skills. Dr. Narasimha Raju took charge as the convener of the event, ensuring its smooth organization and execution.

During the event, students had the privilege of seeking guidance from Mr. Raghu and Mrs. Sai Divya on how to effectively handle their projects. They willingly shared their experiences and provided valuable insights to the students.

The session concluded with a heartfelt vote of thanks, expressing gratitude to all the dignitaries who graced the event with their presence. The students and participants showed their appreciation by felicitating the dignitaries for their invaluable contributions and support.
