### Workshop on "Uncovering ML Android Cloud in Your Career & Technology"

Dates: 12.10.2019

KLEF, Computer Science and Engineering Department is primarily aimed at encouraging students to learn and pursue their individual talents and abilities. FOCUS, the Student Association of CSE department initiated up **Uncovering ML Android Cloud in Your Career & Technology**.

Machine learning allows businesses to enable the data to teach the system how to solve the problem at hand with machine learning algorithms—and how to get better over time.

Today's enterprises are bombarded with data. To drive better business decisions, they have to make sense of it. But the sheer volume coupled with complexity makes data difficult to analyze using traditional tools. Building, testing, iterating, and deploying analytical models for identifying patterns and insights in data eats up employees' time. Then after being deployed, such models also have to be monitored and continually adjusted as the market situation or the data itself changes. Machine learning is the solution.

Machine learning enables marketers to identify new customers and to offer the right marketing materials to the right people at the right time. Machine learning helps credit card companies and banks review vast amounts of transactional data to identify suspicious activity in real time.
