REF: KLEF/RO/CSE/2019-2020   Date: 01.11.2019

<u>**Orders of the Hon'ble Vice-Chancellor**</u>

CIRCULAR

<u>Sub</u>: Oragnizing event "Workshop on "Cybersecurity & Ethical Hacking" " for the students of Computer Science and Engineering, of Vaddeswaram Campus of KLEF - – Reg.

<u>Ref:</u>   Letter received from Dr.T.PAVAN KUMAR, HOD-CSE, K L UNIVERSITY.

This is to inform that the Department of Computer Science and Engineering, KLEF, is Organizing a "Workshop on "Cybersecurity & Ethical Hacking"" for the students of Computer SCIENCE AND Engineering, Vaddeswaram Campus of KLEF on "04.11.2019", as detailed below:

      Event Name : Workshop on "Cybersecurity & Ethical Hacking"

      Date   : 04.11.2019

      Venue   : C325

ALL the Students of CSE, are invited to attend this Program.

Dy-HOS's & Year Professor in charges are requested to bring this information to the attention of all CSE students and encourage them to participate in this program.

Workshop on "Cybersecurity & Ethical Hacking"

Dates: 04.11.2019

KLEF, Computer Science and Engineering Department is primarily aimed at encouraging students to learn and pursue their individual talents and abilities. FOCUS, the Student Association of CSE department initiated **up Cybersecurity & Ethical Hacking**.

Cyber security is the practice to defend internet-connected systems, such as hardware, software, programs, and data from damage, malicious attacks, or unauthorized access. It helps prevent cybercriminals from gaining access to data, systems, or networks. Cyber security is a broad subject that includes many security mechanisms, such as data security, ethical hacking, and digital forensics.

Cyber security can be categorized into the following:

Application Security

Cloud Security

Data Security

Endpoint Security

Information Security

Identity Management

Mobile Security

Network Security

Ethical hacking is a subset of cybersecurity. It refers to the process of testing the system against potential security breaches or data threats and repairing the flaws before any cyber-attack happens. Ethical hacking involves finding vulnerabilities and weak points that cybercriminals can exploit.

Ethical hackers are also known as white-hat hackers. White hat hackers work like black-hat hackers but with a different intent. White hat hackers use their skills to find the loopholes of the given system with permission from the server/system admin. They do not want to harm anyone with their acts rather they safeguard the systems.

Two of the most common methods for designing websites that work well both on desktop and mobile are responsive and adaptive design. In responsive design, content moves dynamically depending on screen size; in adaptive design, the website content is fixed in layout sizes that match common screen sizes. Preserving a layout that is as consistent as possible between devices is crucial to maintaining user trust and engagement. As responsive design can present difficulties in this regard, designers must be careful in relinquishing control of how their work will appear. If they are responsible for the content as well, while

they may need to broaden their skillset, they will enjoy having the advantage of full control of the finished product.
