About the Institution:

K L University is a pioneer in the field of Engineering education and research in the state of Andhra Pradesh. It's knowledge base stems from the presence of highly qualified academic staff that brings with them rich Industrial, Research and teaching experience. The departments are fully equipped to take advanced research in wide range of fields like Embedded Systems, Big data Analytics, Cloud Computing, Software Engineering, Energy, Bio-Technology, Nano-materials and Engineering. The University research activities are supported by sponsored projects from Government agencies like DST and DRDO.

A State-of-the-Art Data center with advanced servers provides highly interactive learning environment with full fledged hardware and software training facilities.

About the Department:

The Department of Electronics & Computer Engineering at KL University is recognized for Preeminence in teaching, research and service to profession. The department has a fine amalgam of renowned as well as young and dynamic personalities as faculty is playing an avant-grade role in providing quality education at both under graduate and post graduate level.

Objectives of the Workshop

Big data is one of the emerging areas that deals with large velocity of data. Big Data is a new term used to identify the datasets due to their large volume, variety and complexity; we cannot manage them with our current methodologies or data mining software tools. Big data covers the whole world wide web(www) data. This Workshop provides deep knowledge in the area of big data. It covers basics of big data architectures, analytical tools and Hadoop file system.

Course Topics:

- ✓ What is Big data
- ✓ Architecture of big data
- ✓ Knowing the Changes of world with usage of big data
- ✓ Tools in big data
- ✓ Data analytics
- ✓ Predictive analytics
- ✓ Behavioural Analytics
- ✓ Problems in big data
- ✓ Hadoop
- ✓ Hadoop Distributed File System

Resource Persons:

- Experts from IBM /Infosys
- Academicians from IIT's/NIT's
