Event Coordinator:

M Tejasree, 13005046, III/IV B. Tech

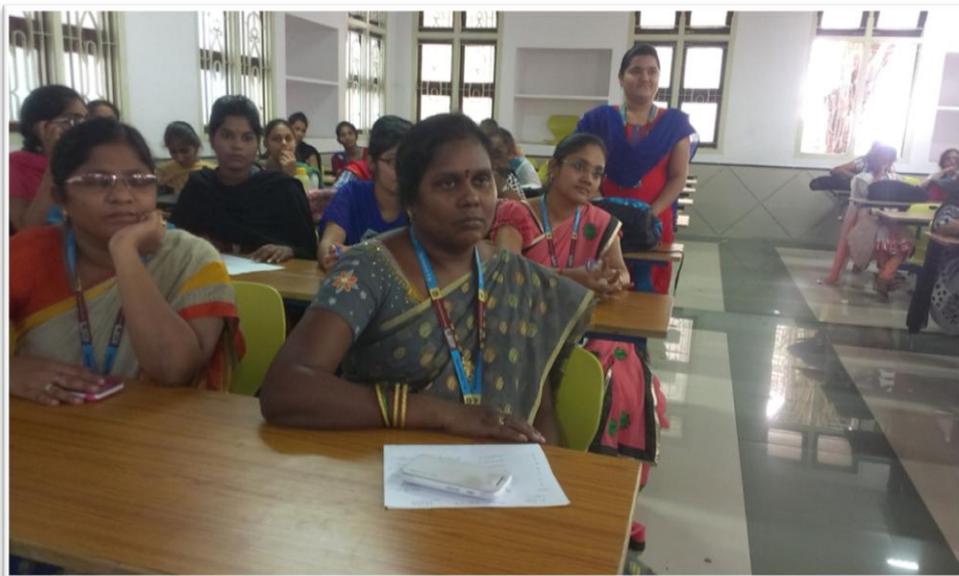

In this speech, the Speakers have given their views regarding placement training and placement interviews as the following:

1. CSS classes and campus training classes will be useful at the time of interviews
2. **“Clarity in Thought and purity in Heart”** will very well define one's success in securing decent job as

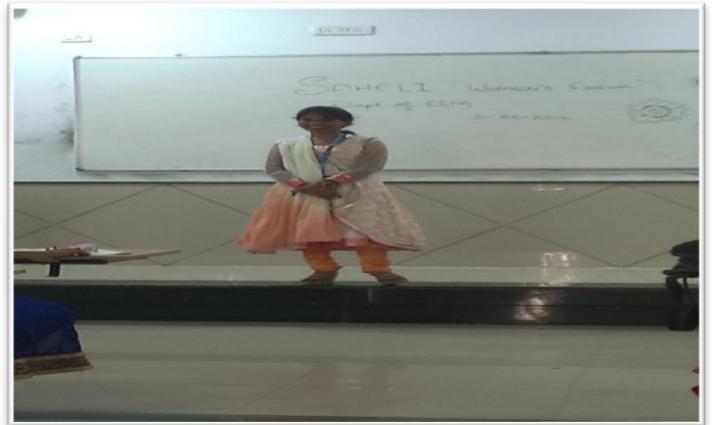

well as success in career.

3. One don't need to be a speaker or one don't need to be an orator but one must definitely be a good communicator, that is the essence of placement training.
4. Mind, will and confidence is very important in securing job. Apart from that concentration towards anything you do also plays a major role for your success.
5. Basics in core subjects is must for getting success in technical round.
6. Communication skills should also be good enough to present ourselves effectively before the interviewer.
7. Don't discourage when you fail in first slot, there will be many more good companies after that too.

Later they have clarified many doubts of juniors related to the placement interviews.

Finally the programme ended with Cultural programmes. All II, III year B. Tech, I M. Tech Girl students, Women faculty and non-teaching staff of the department have actively participated in this programme.
