IMAGE PROCESSING RESEARCH GROUP

A Subject based Seminar report on “Visual Effects”

As part of the Research Group activities, subject based seminar is conducted by Image Processing research group of department of ECM on 11th March, 2014 from 3.30p.m to 5.00p.m. in C425 room. The faculty and students of ECM and other branches participated in this seminar. Mr. Ch. Chaitanya, HR, Pixelloid Group, Hyderabad delivered the concepts and ideas on how to do research in this area. In his lecture he discussed about the usage of visual effects in Image Processing and explained various processes by which imagery is created and/or manipulated outside the context of a live action shot. The importance of Visual effects in filmmaking is also highlighted.
