A Report on

Industry Expert Lecture on “Generative AI in Finance”

Title of the Industry Lecutre	: “Generative AI in Finance”
Date & Time	: 16 & 17-02-2026.
Name of the Resource Person	: Mr. Akshad Modi, AI and Generative AI Consultant and Trainer, GSDC. Hyderabad.
Target Audience	: II Year MBA Finance Students.
No. of Students	: 83

Programme Summary:

An Industry Lecture on “Generative AI in Finance” was organized on 16th and 17th February 2026 for the II Year MBA Finance students as part of the academic initiative to enhance students’ knowledge of emerging technologies in the financial sector. The programme was attended by 83 students, who actively participated in the interactive sessions.

The lecture was delivered by Mr. Akshad Modi, AI and Generative AI Consultant and Trainer, Hyderabad. With his professional expertise in Artificial Intelligence and Generative AI technologies, Mr. Modi provided valuable insights into how modern AI tools are transforming the financial industry. He began the session by explaining the fundamentals of Artificial Intelligence, Machine Learning, and Generative AI, highlighting their growing importance in financial services.

During the lecture, the resource person discussed the applications of Generative AI in finance, including financial data analysis, automated report generation, fraud detection,

algorithmic trading, customer service automation, and risk management. He also explained how AI-powered models can help financial institutions improve decision-making, enhance operational efficiency, and deliver personalized financial services to customers.

Mr. Modi further demonstrated how AI tools and large language models can assist finance professionals in analyzing market trends, generating financial insights, preparing investment reports, and improving productivity in financial research. The session also highlighted the role of prompt engineering, which enables professionals to effectively interact with AI tools to obtain accurate and relevant financial information.

In addition, the resource person emphasized the future scope of AI in banking, fintech, and investment management, encouraging students to develop digital and analytical skills to stay competitive in the evolving financial landscape. He also shared real-world examples and case studies to help students understand the practical implementation of AI technologies in finance-related activities.

The session was highly engaging and interactive, with students raising questions regarding AI applications, career opportunities in AI-driven finance, and the ethical considerations of using AI in financial decision-making. Mr. Modi addressed these queries and motivated students to explore AI tools for academic research and professional development.

Overall, the industry lecture provided valuable industry exposure and practical insights into the integration of Generative AI in the finance domain, helping students understand emerging technological trends and their impact on the future of financial services.
