National Service Scheme (NSS)

"Village Roads Cleaning and Sanitation"

Event : Village Roads Cleaning and Sanitation
Date : 16-10-2026
Place : Pedavadlapudi

Objective:

The objective of the Village Roads Cleaning and Sanitation Programme is to create clean, hygienic, and healthy surroundings by removing waste, plastic, and other unwanted materials from village roads and public spaces. The programme aims to promote awareness about personal hygiene, environmental cleanliness, and proper waste disposal practices among rural communities. It encourages villagers to actively participate in maintaining clean roads and preventing the spread of diseases caused by unhygienic conditions. Overall, the initiative seeks to improve public health, protect the environment, and promote a cleaner and healthier village.

Description:

As per the directives of the National Service Scheme (NSS), Ministry of Youth Affairs and Sports, Government of India, and the guidelines of the Regional Directorate of NSS, Hyderabad, and the Andhra Pradesh State NSS authorities, KL University NSS Cell, in collaboration with the College of Agriculture, organized a Village Roads Cleaning and Sanitation Programme on Friday, 16 October 2026, at Pedavadlapudi Village, Mangalagiri Mandal, Guntur District, as part of the Social Responsibility and Community Service Programme.

Dr. P. Ratna Prasad, Director of the College of Agriculture, stated that the programme was organized to create awareness among villagers about sanitation, hygiene, and environmental cleanliness. NSS volunteers and faculty members actively participated in cleaning the village roads and the surroundings of government offices using brooms. They also removed unwanted weeds and accumulated waste from public places.

Dr. D. Balakrishna, Head of the College of Agriculture, advised villagers not to allow waste to accumulate around their homes and encouraged them to segregate wet and dry waste for proper collection and disposal. The volunteers also cleaned drainage channels by removing accumulated waste and ensuring the smooth flow of wastewater.

NSS Programme Coordinator Dr. P. Srikanth Reddy explained that stagnant wastewater can encourage mosquito breeding and increase the risk of diseases such as dengue and malaria. He emphasised that every individual has a responsibility to maintain cleanliness in their homes, streets, and drainage systems. He also encouraged villagers to organise community cleanliness drives at least once a week to maintain a clean and healthy environment. NSS Programme Officer Dr. S. Pradeep Kumar stated that the programme helped improve awareness among villagers about personal hygiene, community sanitation, and social responsibility. He

encouraged everyone to actively participate in maintaining a clean and healthy village.

Mr. P. Suresh, NSS Field Coordinator, coordinated the programme and contributed to its successful organization. The programme was conducted under the guidance and support of the University leadership, including Vice-Chancellor Dr. G. Parthasarathi Varma; Pro Vice-Chancellors Dr. N. Venkatram and Dr. K. Rajashekhara Rao; Registrar Dr. I. Pavan Kumar; Principal Dr. T. K. Ramakrishna Rao; Dean of Student Affairs Dr. K. R. S. Prasad; Advisor Dr. Habibulla Khan; Associate Dean Dr. Shantisri; and other faculty members and participants.

Outcome:

The Village Roads Cleaning and Sanitation Programme improved the cleanliness of village roads, public spaces, and drainage channels through active participation by NSS volunteers and faculty members. The programme enhanced villagers' awareness of proper waste disposal, wet and dry waste segregation, and the importance of maintaining hygienic surroundings. Participants understood the health risks associated with stagnant wastewater and mosquito breeding. Overall, the initiative encouraged community participation in sanitation activities and promoted a clean, healthy, and disease-free village environment.

Impact on Society:

The programme created a positive impact on the village community by promoting cleanliness, sanitation, and environmental responsibility. It encouraged villagers to adopt proper waste segregation and disposal practices, helping reduce environmental pollution and the risk of mosquito-borne diseases. The initiative motivated community members to take collective responsibility for maintaining clean roads, drainage systems, and public spaces. Overall, it contributed to building a healthier, cleaner, and more hygienic village while strengthening community participation in sanitation activities.
