3 Years | Full-time Program

BCA -
Data Science

Data is one of the key assets of organisations which can be aggregated and analysed to come up with valuable insights that aid in decision making. Companies have been recognizing the value data science can offer to them and are looking for highly qualified professionals in the domain. Motivated by the needs of the industry K L University is now offering BCA Data Science program, a one-of-its kind program that can help students launch careers successfully.

Eligibility:

The student shoould have passed 10+2 or any equivalant examination or any technical vocational course. The student should obtain 50% of marks excluding languages.

Duration:
3 Years | Full-time Program

BCA -
Artificial Intelligence and Process Automation

Artificial intelligence is the science of developing systems and intelligent machines that can work and react like human beings. Process automation (primarily robotic process automation) involves creation of innovative technologies that can perform a series of complex activities automatically with no human interference. Both these domains are ready to drive the world to an all new experience through innovation. There is great demand for aspirants who have knowledge in these two areas. The new-age BCA Artificial Intelligence and Process Automation program offered by K L University is a one of its kind program that is designed to meet the needs of the industry.

Eligibility:

The student shoould have passed 10+2 or any equivalant examination or any technical vocational course. The student should obtain 50% of marks excluding languages.

Duration:
3 Years | Full-time Program

BCA -
Internet of Things

Smart devices have been gradually becoming a part of the daily lives of people around the world. The stage is rightly set for the next big phase of change. It is a change where smart devices will be connected to one another and will be programmed to perform without human intervention. They will be designed to act in a manner that enhances the experience of consumers. This revolutionary concept is known as Internet of Things and there is great need for qualified talents in this area. The BCA Internet of Things program offered by K L University is specially designed to include all subjects and workshops that will enable students to launch careers.

Eligibility:

The student shoould have passed 10+2 or any equivalant examination or any technical vocational course. The student should obtain 50% of marks excluding languages.

Duration:
3 Years | Full-time Program
