Event started with a welcome note by Dr I. Govardhani, Assoc Dean, Grievances K L E F she introduced the resource person Dr. Keerthi, delivered an interesting talk covering various aspects that there is a possibility of revolutionary change in India's higher education system and this is women participation. In some elite institutions we find that number of female students is more than male students and there is a possibility to increase this trend. It is a great advancement that the presence of women in colleges and universities are growing. Not only this, it is also found that in some most competitive higher educational institutions women are gaining entry without availing gender quota.

She also explained to all students that this is un-doubtedly credit for them. Female education is more important than that of male. In this connection I may refer a statement of philosopher-president and noted educationist Dr. S. Radhakrishnan (1948). He says "there cannot be educated people without educated women. If general education has to be limited to men or women, the opportunity should be given to women. From them it would most surely be passed on to the next generation. Female empowerment can be strengthen through higher education.

Higher education assists females in two ways. It empowers qualified women to become leaders in society and it permits them to become role models for younger girls. It also helps women to choose domains of expertise, whether this is as decision makers through influence on policy issues related to social, economic, and cultural development, or by their participation in family and community life. Dr. KRS Prasad, Dean student affairs , Dr. Habibulla Khan, Advisor (SA) also participated in the programme. A good number students participated in this webinar. The programme is ended with a vote of thanks to the resource person Dr. Keerthi by Dr.I, Govardhani Assoc Dean, Grievances.
