Date : 04/02/2020
Time : 10:00 A.M to 1:30 P.M
Mode : Online

OBJECTIVES

The National Level Workshop on Pharmacovigilance, Hemovigilance, Meteriovigilance, and Adverse Events Following Immunisation aimed to provide insights into the importance of pharmacovigilance in patient safety, adverse events following immunisation (AEFI), hemovigilance, meteriovigilance, and methods of causality assessment in pharmacovigilance. The workshop also focused on the role of pharmacovigilance in the context of the COVID-19 pandemic and provided training on e-Filling of Suspected ADR forms and the PVPI Mobile App.

DESCRIPTION

KL College of Pharmacy, in association with Indian Pharmacopoeia Commission (IPC), Ghaziabad and Guntur Medical College (GMC), hosted a National Level Workshop on Pharmacovigilance, Hemovigilance, Meteriovigilance, and Adverse Events Following Immunisation. Scheduled from 10:00 a.m. to 1:30 p.m. on February 04, 2020, the workshop aimed to delve aimed to provide insights into the importance of pharmacovigilance in patient safety, adverse events following immunisation (AEFI), hemovigilance, meteriovigilance, and

methods of causality assessment in pharmacovigilance the interests of both pharmacy students and faculty members alike.

The workshop offered a comprehensive overview of pharmacovigilance, encompassing adverse drug reactions (ADRs), AEFIs, hemovigilance (blood product reactions), meteriovigilance (medical device reactions), and methods for assessing causality of adverse events. It specifically addressed the complexities of AEFIs, providing in-depth insights into identification, reporting, and management. Participants gained practical knowledge and tools to effectively monitor and respond to AEFIs, ultimately strengthening immunization programs.

Addressing Pharmacovigilance in the Context of COVID-19

Recognizing the ongoing pandemic, the workshop highlighted the crucial role of pharmacovigilance in monitoring the safety of COVID-19 vaccines, treatments, and interventions. Participants gained valuable insights into the unique challenges and opportunities presented by the pandemic, empowering them to contribute to global efforts in combating COVID-19.

Enhancing Pharmacovigilance Practices

The workshop concluded with practical training sessions on electronic reporting systems for suspected ADRs. Participants learned about e-Filing of Suspected ADR Forms and the PVPI Mobile App, gaining proficiency in using these tools to streamline reporting and enhance overall pharmacovigilance activities.

OUTCOMES

The National Level Workshop on Pharmacovigilance, Hemovigilance, Meteriovigilance, and Adverse Events Following Immunisation was a successful endeavor in promoting awareness and enhancing skills in drug safety monitoring. Participants gained valuable insights from experts on various aspects of pharmacovigilance, including ADRs, AEFIs, hemovigilance, meteriovigilance, and causality assessment methods. The workshop's specific focus on AEFIs equipped attendees with practical tools for identification, reporting, and management, ultimately strengthening immunization programs. Recognizing the critical role of pharmacovigilance in the COVID-19 pandemic. By equipping participants with the knowledge and tools for effective pharmacovigilance practices, the workshop is poised to make a significant impact on advancing drug safety monitoring in India.
