\*\*\*

This is to inform that KL College of Pharmacy, KLEF, Vaddeswram campus is organizing a CSIR Sponsored National Conference on “Neuropharmacology & Epigenetics (NPE-2025), scheduled on 23rd – 25th October 2025.

The sessions are planned on following themes:

**Theme-1: AI, Epigenetics, and Neuroinflammation: Emerging paradigms in Brain disorder Diagnostics and Treatment**

**Theme -2: Noncoding RNAs and SiRNA in Neurodegenerative Disease: From Molecular Mechanisms to Clinical Applications**

**Theme -3: Epigenetic Landscapes and Molecular Checkpoints In Neurodegeneration: Emerging Biomarkers And Therapeutic Targets**

**Theme -4: Interplay of Metabolism, Microbiota, and Neuroinflammation In Neurodegenerative Disorders**

Each theme will have 2-3 talks and in this regard, all Faculty and Students and Scholars are encouraged for registration and participation. NPE-2025 invites abstract for e-poster / oral presentations from research scholars, faculty scientists and industry professionals from India and across the world.

**About KLEF:** Koneru Lakshmaiah Education Foundation (KLEF) is a premier educational institution that was established as KL College of Engineering in 1980-81. Recognized as a Deemed to be University by the UGC in 2009, KLEF has consistently achieved top national and international rankings and accreditations. KLEF offers a diverse range of programs across various disciplines, fostering an environment of academic, research, and innovation excellence. With state-of-the-art infrastructure, distinguished faculty, and cutting-edge research, the institution is committed to creating the next generation of global leaders and professionals, with an emphasis on holistic development and global exposure. The institution's strong placement record, in collaboration with top companies worldwide, ensures that students are well-prepared to excel in their careers.

**KL College of Pharmacy:** KL College of Pharmacy (KLCP) is established in the year of 2016 and is currently offering B.Pharm (4 years), Pharm.D (6 years), M.Pharm Pharmaceutics (2 years) and Ph.D. program under the aegis of Koneru Lakshmaiah Education Foundation (KLEF). KLCP is well furnished with state of art facilities to conduct the program meeting the global standards. The college has infrastructural facilities in terms of well-equipped laboratories with modern instruments and well-furnished and spacious classrooms to appease the requirement of undergraduate & postgraduate students and Ph.D scholars in addition to the central facilities at KL University level.

#### ABOUT NPE-2025

Unlock the Future of Neurodegenerative Disease Treatment. Join us for the National Conference on Neuropharmacology & Epigenetics 2025 (NPE-2025), Sponsored by CSIR, Govt of India, hosted by the College of Pharmacy, Koneru Lakshmaiah Education Foundation, Andhra Pradesh, on 23<sup>rd</sup> to 25<sup>th</sup> October 2025.

NPE-2025 provides a dynamic platform to delve into the intricate relationship between neuropharmacology and epigenetics, focusing on the roles of DNA methylation, histone modifications, non-coding RNAs, and metabolic pathways in the pathogenesis and therapy of Alzheimer's, Parkinson's, Huntington's disease, and other neurodegenerative disorders.

Be a part of this translational research forum connect with leading scientists, clinicians, and industry experts at the forefront of neuroscience. Gain insights into cutting-edge discoveries, exchange innovative ideas, and foster collaborations that will drive future advancements in the field.

NPE-2025 welcomes undergraduate and postgraduate students, research scholars, faculty, and professionals from life sciences and allied disciplines. Whether you are an aspiring student or an established researcher, this conference offers an invaluable opportunity to expand your knowledge and contribute to the evolving landscape of neuroscience.

##### CONVENER:

Dr. Prasada Chowdari Gurrum  
Assistant Professor, KLCP, KLEF

##### CO-CONVENER:

Dr. Kakarla Ramakrishna  
Assistant Professor, KLCP, KLEF

Invited talks will cover key areas of contemporary neuroscience research.

**Session 1 : 1 AI, Epigenetics, and Neuroinflammation: Emerging paradigms in Brain disorder Diagnostics and Treatment**

- AI and ML-Driven Neurodiagnostics: Revolutionizing early detection of AD, PD, and HD
- Artificial intelligence in psychiatry, present trends, and challenges
- The Interconnection Between HDACs and NF-κB in modulating immune function and inflammation.

**Session 2 : Noncoding RNAs and SiRNA in Neurodegenerative Disease: From Molecular Mechanisms to Clinical Applications**

- A long noncoding RNA contributes to neurodegeneration/neuroprotection
- RNA Interference Unleashed: Current Perspective of Small Interfering RNA (siRNA) therapeutics in the treatment of neurodegenerative disorders

**Session 3 : Epigenetic Landscapes and Molecular Checkpoints In Neurodegeneration: Emerging Biomarkers And Therapeutic Targets**

- DNA methylome profiling identifies novel predictors of neurodegenerative disorders
- Checkpoints of Axonal degeneration in the nervous system disorders
- Epigenetic alterations in neurodegenerative diseases

**Session 4 : Interplay of Metabolism, Microbiota, and Neuroinflammation In Neurodegenerative Disorders**

- Gut Microbiome and Neuroinflammation Crosstalk in neurodegeneration: Protective Roles of Probiotics
- Neurodegeneration in type 2 diabetes: Alzheimer's as a case study

· Each session will have 2 to 3 talks and speakers will be from both academia and industry.

**E-POSTER / ORAL PRESENTATIONS**

NPE-2025 Invites abstracts of the original findings covering the following thrust areas.

The last date for the abstract submission is on or before 10th October 2025.

- Neurosciences & Epigenetics
- Pharmacology & Toxicology
- Biotechnology & Bioinformatics
- Artificial Intelligence & Machine Learning in Drug discovery
- Clinical Research & Pharmacy Practice
- Pharmacognosy & Phytochemistry
- Pharmaceutical Chemistry
- Pharmaceutics & Pharmaceutical technology
- Pharmaceutical Analysis & Quality Assurance

**KEY HIGHLIGHTS**

- Keynote Sessions
- Scientific Presentation
- Awards
- Networking Opportunities
- Innovative Discussions

## PRE-CONFERENCE WORKSHOP

23<sup>RD</sup> OCTOBER 2025

**About Workshop:** **NPE-2025** proudly introducing pre-conference workshop aimed at strengthening practical skills and hands-on expertise in both emerging and established areas of pharmaceutical research. Participants will benefit from expert-led training and interactive sessions covering neurobehavioral models, biomarker analysis with advanced molecular techniques, drug administration and blood collection methods, histopathology, hematology cell analysis, and the operation of key laboratory equipment including neurobehavioral apparatus, ELISA microplate reader, Haematology cell analyser and advanced microtome.

**Resource Person:** Mr. Krishna Chaitanya Kavungala, M.Pharm (Pharmacology), with over 22 years of expertise in preclinical pharmacology. Specialized in in vivo models for drug discovery, herbal and nutraceutical research. Currently Manager at Laila Nutraceuticals Pvt. Ltd., Vijayawada. Proficient in GLP/non-GLP studies, AAALAC accreditation, ISO compliance, and team leadership. Recognized with 'Star Employee' and 'Spark' awards for innovation and excellence at Dr. Reddy's Laboratories.

### ABSTRACT SUBMISSION

The abstract must include the Title, Author Names, Affiliations, Introduction, Aim & Objectives, Methods, Results, and Conclusion. Use Times New Roman, 12-point font, and limit the abstract to 250 words. Submit the abstract and any related queries to **klnpe2025@gmail.com**. The presenting author must be a registered delegate of the conference.

**AWARDS:** Best Presentation Awards will be given for outstanding oral and poster presentations.

Day-1 (23rd OCTOBER 2025 (Thursday) & 10:00 - 5:30 eveninig )

(Pre-conference Workshop “Essential Lab Techniques in Preclinical Neuropharmacological Research)

Report on Day-1 session:

### CSIR Sponsored NPE-2025 – Preconference workshop

**Speaker:** Mr. Krishna Chaitanya Kavungala, *Manager, Laila Nutraceuticals, Vijayawada* (Former Senior Scientist – Dr. Reddy's Laboratories, Aurigene Discovery Technologies, Dabur Research Foundation)

**Session:** Animal Models of Neuropharmacology: Pros and Cons

**Timing:** 10:00 AM – 12:00 PM

Mr. Krishna Chaitanya delivered an informative and practice-oriented session on the selection and applicability of animal models in neuropharmacology. He outlined the advantages and limitations of commonly used experimental models and stressed the importance of model validity, translational relevance, and feasibility when designing neuropharmacological studies.

He provided a clear overview of major disease-inducing models relevant to neuroinflammation associated **neurodegenerative diseases**. He also discussed key **neurobehavioral assessments** widely used in industry, drawing from his hands-on experience at Dr. Reddy's Laboratories and Dabur Research Foundation to highlight real-world considerations in preclinical screening and data interpretation.

A notable highlight of his visit was his **active involvement in hands-on training sessions**, where he guided delegates through the practical components of various neuropharmacological animal models. His demonstrations and interactive discussions greatly enhanced participants' understanding of experimental execution, troubleshooting, and behavioral scoring techniques.

The session concluded with an engaging Q&A segment that addressed practical challenges in animal research and clarified critical aspects of model interpretation. Overall, the session

was highly beneficial for participants working in neuropharmacology, offering both conceptual depth and valuable practical exposure.

## Afternoon session

In the afternoon session, a practical workshop was conducted in the animal house. Participants were introduced to basic animal handling techniques, routes of administration, and demonstrations of key behavioural studies including the Morris Water Maze, Elevated Plus Maze, Y-Maze, Barnes Maze, Open Field Test, Novel Object Recognition Test, Actophotometer, Sucrose Preference Test, and other standard behavioural assays

#### DAY-2: 24th OCTOBER 2025- Morning Session (10:00 to 01:15)

Day 2 of the conference commenced smoothly as per the scheduled agenda, bringing together delegates, resource persons, and participants with renewed enthusiasm. The sessions began on time, setting a focused and productive tone for the day's scientific discussions and presentations.

**Session Title:** *Hepatic Sinusoidal Obstruction Syndrome (HSOS): MALT1 Inhibition as a Potential Therapeutic Target*

**Speaker:** Dr. Saibalaji Andagulapati, Scientist, CSIR-IICT

**Session 1: Hepatic Sinusoidal Obstruction Syndrome (HSOS): MALT1 Inhibition as a Potential Therapeutic Target**

**Speaker:** Dr. Saibalaji Andagulapati, Scientist, CSIR-IICT, Hyderabad

The opening session of Day 2 was delivered by Dr. Saibalaji Andagulapati, who presented a highly insightful and forward-looking talk on the emerging connection between hepatic sinusoidal obstruction syndrome (HSOS) and neuropharmacology. A major highlight of the

session was the way Dr. Saibalaji illustrated the intricate crosstalk between hepatic pathology and neuroinflammation, offering a novel and impactful perspective for identifying therapeutic targets that bridge liver injury and neurological disorders. His scientific clarity and translational approach greatly enriched the understanding of the participants.

During his visit to KLEF University, Dr. Saibalaji actively interacted with the delegates as well as our pharmacy students, engaging in meaningful discussions on current research challenges and opportunities. He provided valuable inputs on experimental design, mechanistic hypothesis formulation, and translational relevance, which the participants found extremely encouraging and motivating.

Session 2: chemically engineered nanoparticles for targeted and immunotherapeutic interventions

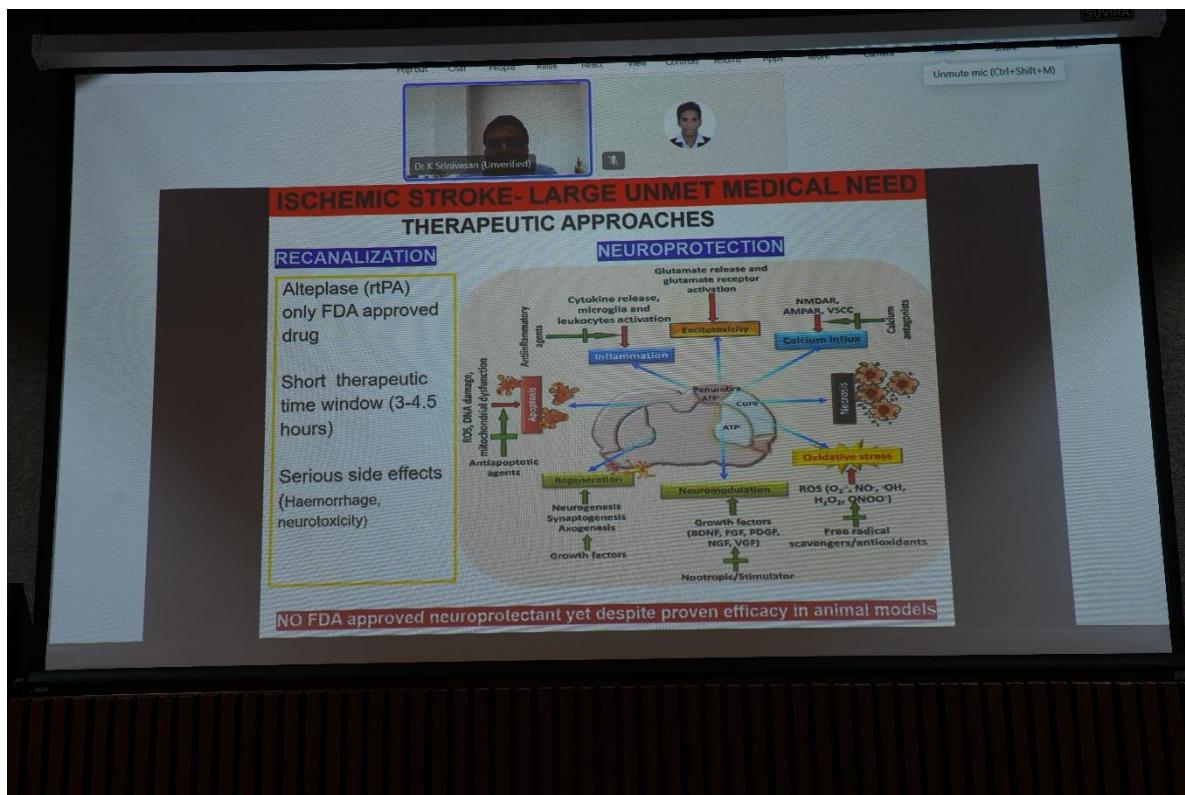

Recourse person: Puvvada Naga prasad

Dr. Puvvada Naga Prasad delivered an informative session on the design and application of chemically engineered nanoparticles for targeted and immunotherapeutic interventions. He explained how these nanocarriers enhance drug delivery precision, improve therapeutic outcomes, and modulate immune responses. He also connected their relevance to epigenetic regulation and neuropharmacological mechanisms, highlighting their potential in advanced biomedical and translational research.

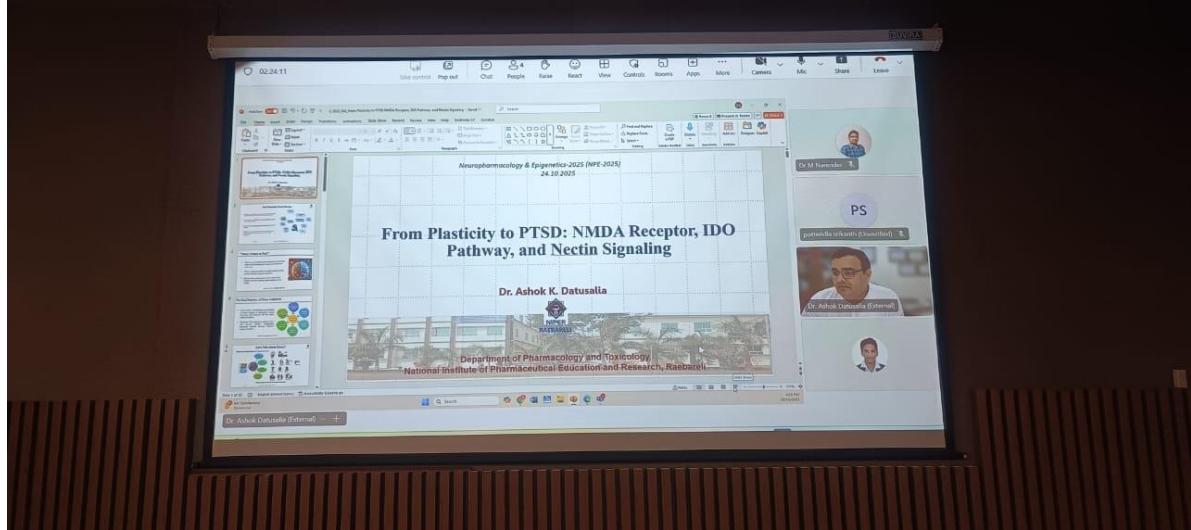

DAY-2: 24th OCTOBER 2025 Afternoon Session

Session 3:

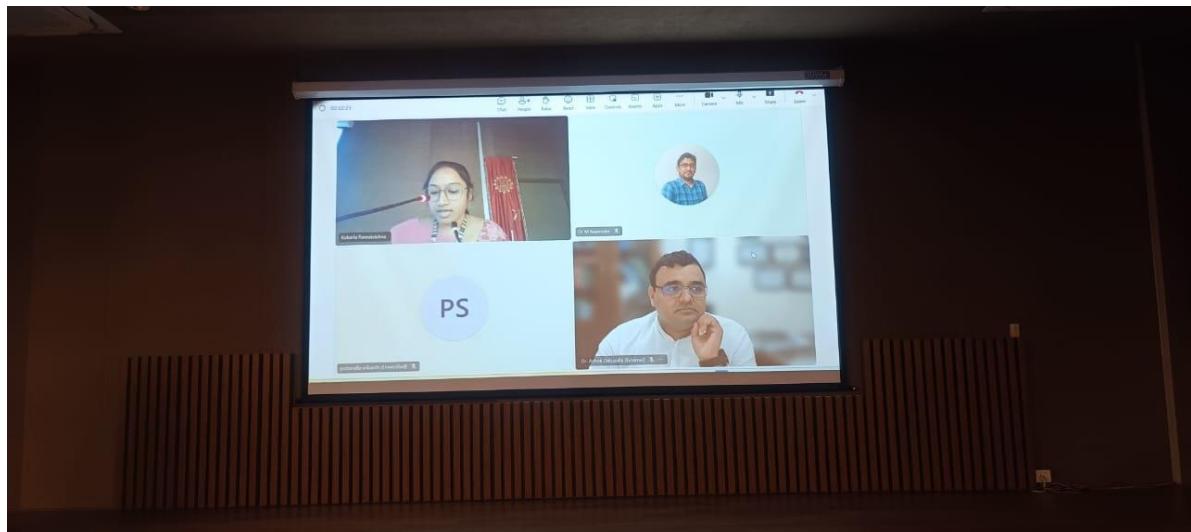

## Session 4: From Plasticity to PTSD: NMDA Receptor, IDO Pathway, and Nectin Signaling

Resource Person: Dr. Ashok Dasuthalia, NIPER–Raebareli

The session delivered by Dr. Ashok Dasuthalia offered a deeply insightful overview of the molecular and neurobiological mechanisms linking synaptic plasticity to stress-related disorders such as PTSD. He elaborated on the pivotal role of NMDA receptor-mediated signaling, emphasizing how alterations in glutamatergic transmission influence learning, memory, and long-term synaptic adaptations.

The session concluded with an engaging and intellectually stimulating discussion, where participants interacted extensively with Dr. Dasuthalia on the interplay between synaptic plasticity, epigenetic mechanisms, and PTSD-related neurobiology. Overall, the session proved highly enriching and contributed significantly to the scientific understanding of advanced neuropharmacological mechanisms.

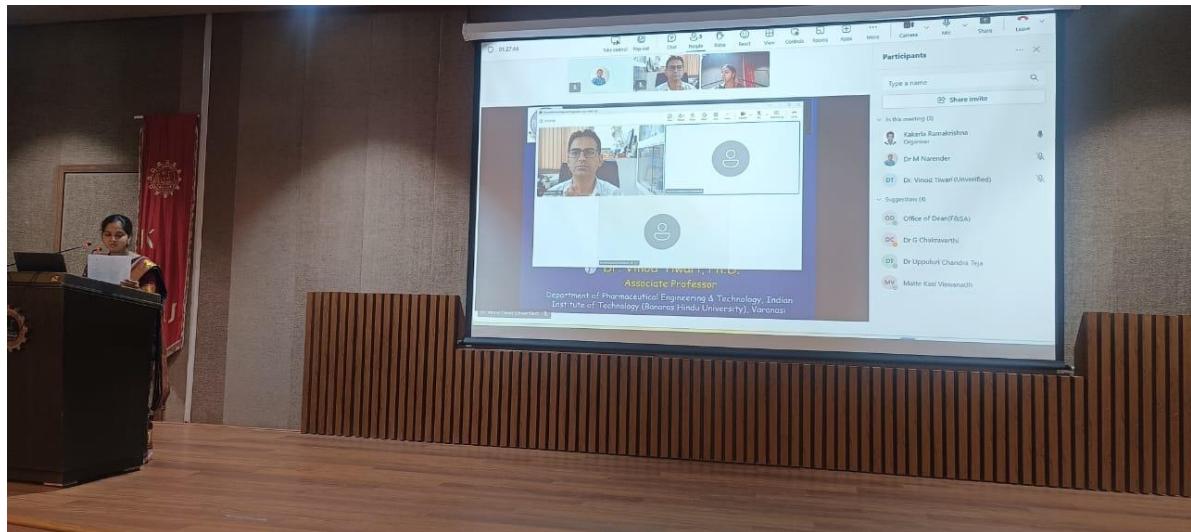

### Session 5: Bridging the Gap: Neural Circuitry and Translational Approaches in Pain Research

**Resource Person:** Dr. Vinod Tiwari, IIT (BHU), Varanasi

The session by Dr. Vinod Tiwari provided an in-depth exploration of the dynamic interface between **neural circuitry** and **epigenetic mechanisms** in the context of neuropathic pain. He highlighted the central role of epigenetic modifications including DNA methylation, histone regulation, and non-coding RNA signaling in driving these long-term neural adaptations.

A key emphasis of the talk was the cross-talk between altered neural pathways and epigenetic remodeling, illustrating how these interconnected processes contribute to the persistence and severity of neuropathic pain. Dr. Tiwari also outlined emerging **translational research approaches**, focusing on molecular targets and circuit-level interventions that hold promise for developing improved therapeutic strategies.

Overall, the session significantly contributed to enhancing the scientific depth of the program and aligning ongoing research with cutting-edge developments in pain neurobiology.

#### DAY-3: 25th APRIL 2025 MORNING SESSION (9.20-01.10PM)

Day 3 of the conference began with renewed academic energy as participants gathered to continue the series of advanced scientific discussions.

Session 6: Discovery of Novel Molecules to Treat Depression – What it takes and future perspectives

Resource person: Dr. BN Srikumar, National Institute of Mental Health and Neurosciences. (NIMHANS) Bangalore

Dr. B. N. Srikumar delivered an inspiring and deeply insightful session on the discovery of novel molecules for depression, highlighting the scientific rigor, challenges, and future directions in developing effective antidepressant therapies. His lecture beautifully blended molecular mechanisms, translational strategies, and real-world research experiences from NIMHANS, offering exceptional clarity to the audience.

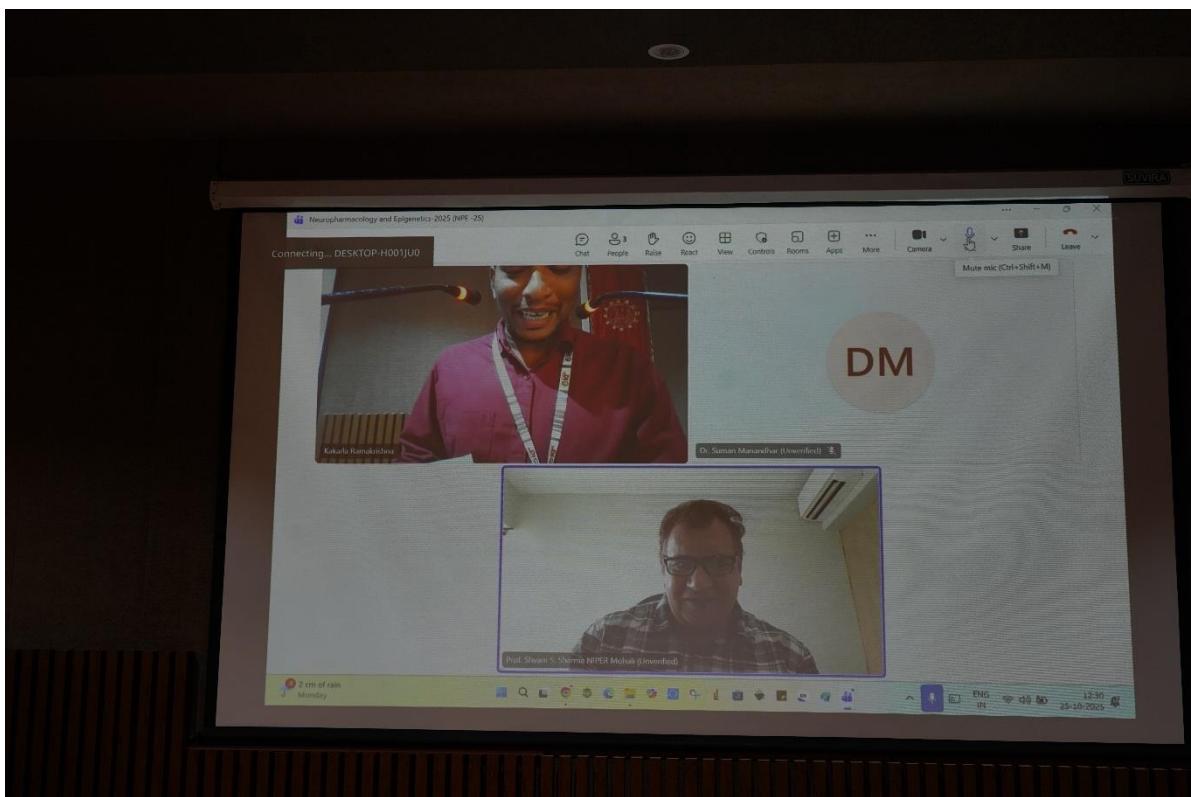

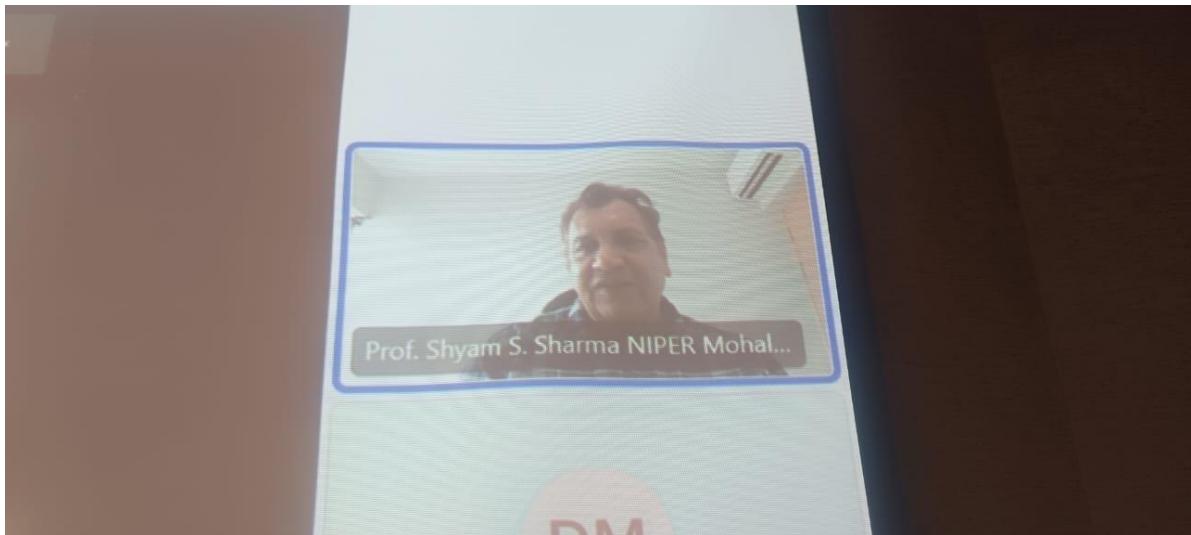

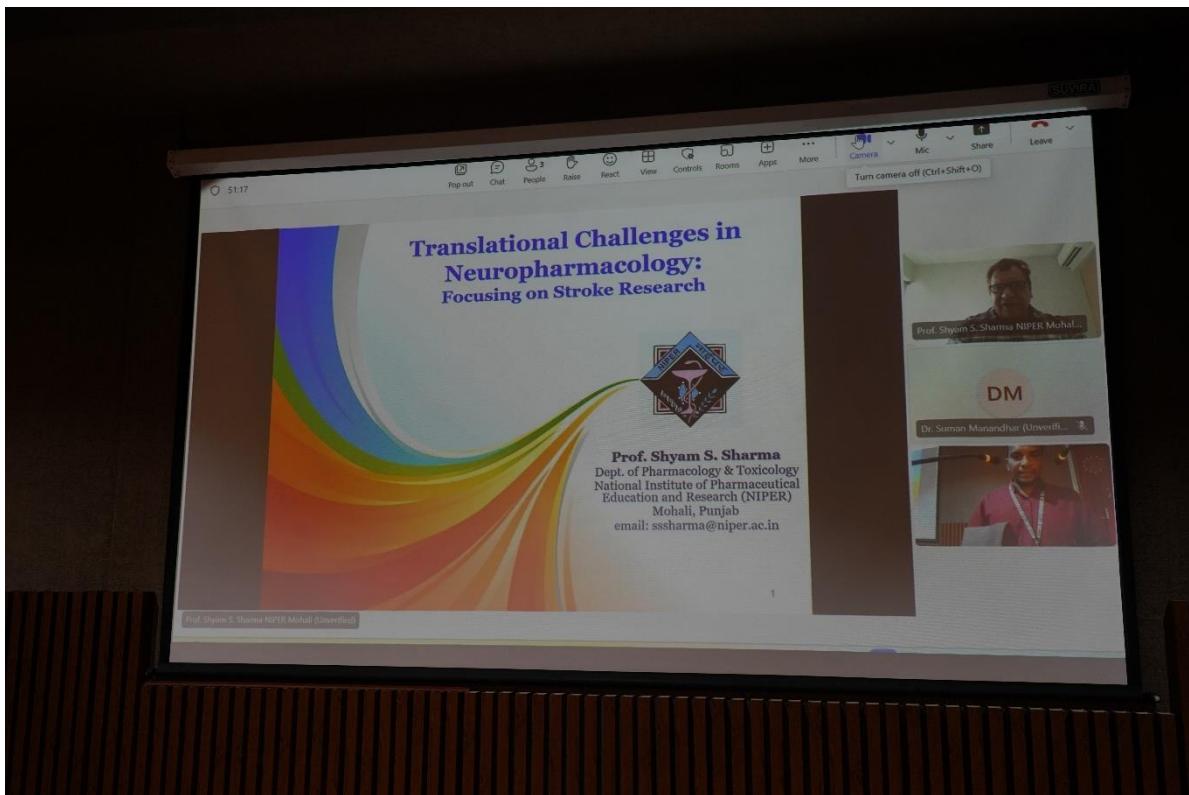

During his visit to **KLEF University**, Dr. Srikumar spent meaningful time with delegates, students, and faculty, sharing valuable neuroscience perspectives and personal research experiences that left a lasting impact on everyone. His warm interactions, guidance, and motivational discussions created truly memorable and heart-touching moments, making the session one of the most cherished highlights of the conference.

Dr. Suman Manandhar delivered a compelling lecture on the drug-discovery process, focusing on the identification of novel therapeutic molecules for Alzheimer's disease via modulation of the Wnt signaling pathway. He emphasized the application of computational studies to streamline early-phase drug discovery, showcasing how in silico methods can accelerate the identification of promising compounds. His talk highlighted the potential of Wnt pathway modulators as candidate drugs for Alzheimer's, underscoring the intersection of computational pharmacology and neurodegenerative disease research.

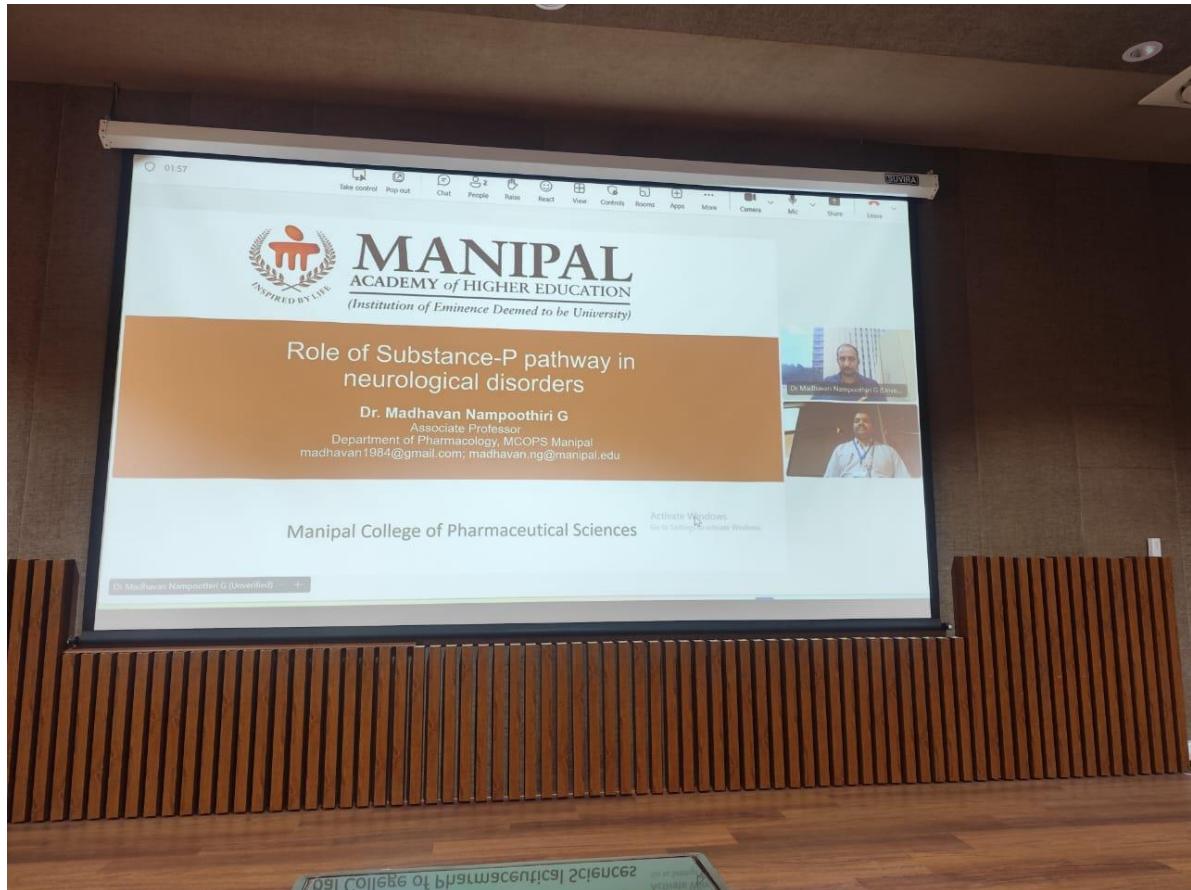

Title: *Translational Challenges in Neuropharmacology*

Resource Person: Dr. S. S. Sarma, NIPER–Mohali

The session delivered by Dr. S. S. Sarma provided a comprehensive and thought-provoking overview of the **translational challenges** that arise in bridging basic neuropharmacological research with clinical application. Focusing primarily on stroke mechanisms, epigenetic regulation, and their therapeutic implications, Dr. Sarma explained emerging evidence on how **epigenetic modifications** involved in the stroke and neurodegeneration. He stressed the importance of selecting robust preclinical models, adopting multidimensional endpoints, and integrating biomarker-based strategies to enhance the translational value of neuropharmacological research. The session was highly engaging and stimulated thoughtful discussions among participants. Dr. Sarma's clarity, scientific depth, and practical perspectives provided valuable guidance for researchers working in stroke, epigenetics, and translational neuroscience.

**Title: Role of Substance-P Pathway in Neurological Disorders**

**Resource Person: Dr. Madhavan Nampoothiri G, MCOPS, Manipal**

The session delivered by Dr. Madhavan Nampoothiri provided a comprehensive and scientifically enriching overview of the **Substance-P (SP) and neurokinin (NK) system** and its expanding relevance in neurological disorders. He highlighted how dysregulation of the SP–NK1 receptor axis plays a crucial role in the progression of **Alzheimer's disease**, particularly by modulating amyloidogenic processes, synaptic changes, and neurobehavioral outcomes. Dr. Madhavan further elaborated on the contribution of SP signaling to **neuroinflammation**, explaining how SP-mediated pathways enhance cytokine release, microglial activation, and downstream signaling cascades that drive chronic inflammation and neuronal vulnerability. An important aspect of the talk was the connection between **epigenetic regulation** and neurokinin pathways, where Dr. Madhavan described how epigenetic modifications may influence SP synthesis, receptor expression, and overall inflammatory tone within the CNS. This integrative perspective provided a deeper understanding of how molecular, cellular, and regulatory mechanisms converge to shape neurological pathology.

Participants found the session highly valuable, with Dr. Madhavan's clarity, depth, and ability to translate complex mechanisms into meaningful insights greatly benefiting researchers and students. The session stimulated thoughtful discussions and enhanced the audience's

understanding of the therapeutic potential of targeting the SP pathway in neuroinflammatory and neurodegenerative conditions.

**Title:** Targeting Cancer and Cancer Stem Cells for Therapy

**Resource Person:** Dr. A. Rajanna, National Institute of Nutrition (NIN), Hyderabad

The session delivered by Dr. A. Rajanna provided an in-depth and insightful overview of therapeutic strategies targeting **cancer and cancer stem cells (CSCs)**, with a particular focus on **brain tumors**. He explained the complex biology of brain cancers, emphasizing how tumor heterogeneity, invasive growth, and treatment resistance make them especially challenging to manage. Dr. Rajanna also discussed the influence of **epigenetic mechanisms** including DNA methylation and histone modifications in regulating CSC pathways and driving brain tumor aggressiveness. Dr. Rajanna visited **KLEF University** as part of this session and actively interacted with the delegates and pharmacy students. His discussions offered valuable guidance on research methodologies, and emerging therapeutic targets, which greatly benefited and motivated the student community.
