# EXPERT TALK ON LEGAL PROFESSION: OPPURTUNITIES, MYTHS, AND CHALLENGES"

The expert talk on Legal Profession: Opportunities, Myths, and Challenges is conducted for having a deeper insight into the legal profession, erasing all the myths students have with an understanding in the opportunities in the industry. The resource person for the expert talk is Dr. V.Sambasiva Raju, who is working as Secretary to the A.P. Information commission, Govt. of Andhra Pradesh. The expert talk held at New Seminar Hall in KLU. All the Faculty and Students have attended the expert talk. Dr. Ch. Neelima, HOD of Soft skills Department welcomed the Expert on to the Dias.

The Contents of his Lecture ate as follows:

1. The legal profession is facing a range of challenges in the 21st century. Some of these challenges include:
A. Technology: Technology is advancing at an unprecedented pace and transforming the way lawyers work. Lawyers must now be proficient in a range of technologies, including document management systems, e-discovery tools, and cybersecurity measures.

B. Globalization: The legal profession is becoming increasingly globalized, with clients and cases spanning multiple jurisdictions. Lawyers must be able to navigate complex international legal systems and work effectively with colleagues and clients from diverse cultural backgrounds.

C. Alternative legal service providers: The rise of alternative legal service providers (ALSPs) is disrupting the traditional law firm model. ALSPs offer a range of legal services, including document review and contract management, at a lower cost than traditional law firms.

2. Big data technology offers many opportunities for professionals to face the challenges in the legal industry. Here are a few ways in which big data can be leveraged by legal professionals:
    A. Improved decision-making: Big data analytics can help lawyers make better decisions by providing them with insights into patterns and trends. For example, analysing large amounts of data on past court cases can help lawyers identify winning strategies for their clients.

B. Enhanced efficiency: Big data can help lawyers streamline their workflow and increase efficiency. For example, using natural language processing (NLP) to analyse legal documents can save time and reduce the risk of errors.

C. Better risk management: Big data can help lawyers identify potential risks and liabilities for their clients. For example, analysing data on consumer complaints can help companies identify and address potential legal issues before they become larger problems.

3. The advancement of technology has opened up new employment opportunities for law students. Here are a few examples of new employment opportunities in the legal field with the new technology:

   A. Legal technologist: A legal technologist is responsible for implementing technology solutions in a law firm or legal department. This includes managing legal software and systems, ensuring data security and privacy, and providing training and support to legal professionals.

   B. E-discovery specialist: E-discovery involves the identification, collection, and analysis of electronic data for use as evidence in legal proceedings. E-discovery specialists work to manage the entire e-discovery process, from collection to production.

   C. Cybersecurity specialist: Cybersecurity is a growing concern in the legal industry, and law firms and legal departments are hiring cybersecurity specialists to help protect sensitive data from cyber threats.

   D. Legal data analyst: Legal data analysts are responsible for analysing large amounts of data to identify patterns and trends that can be used to support legal decisions. They use data analytics tools to examine legal data such as court records, contracts, and regulations.

   E. Legal project manager: Legal project managers oversee legal projects from start to finish, ensuring that they are completed on time, within budget, and to the client's satisfaction. They use project management tools and techniques to manage legal workflows and collaborate with legal professionals.

Dr.A. Srinath,

(Dean Skill Development and Student Progression)
