Report on National Education Summit (Edu Summit-2024)” 24th January 2024

The Academic Staff College of KLEF has organized National Education Summit, “Edu Summit-2024” on 24.01.2024 on the occasion of International Day of Education. UNESCO is dedicating the International Day of Education celebrated on 24 January 2024 to the crucial role education and teachers play in countering hate speech, a phenomenon which has snowballed in recent years with the use of social media, damaging the fabric of our societies.

IN Association With

**Office of International Relations.
koneru lakshmaiah education foundation.**

24th January 2024 @10:00 AM to 1:00 PM | Venue: Sunflower Hall, KL University

The Chief guest for the program was Smt. Kranthi, Executive Director, APSSDC and other guests of honor include Dr. A.S.N. Chakravarthy, Professor, JNTUK, Prof. Osvaldo

Geravasi, University of Perugia, Italy and Mr. Bibin Shivas, Customer service director, Coursera.

Educational institutions need to focus on skill development to ensure employability of students: Smt. Kranthi, Executive Director, APSSDC

Discussing on 'Road to employability', Smt. Kranthi said, "We're seeing this demand coming up of IoT and digital skills becoming

a horizontal so that's really what we will need to do. And the push is going to come to academic institutions. A total of 35% of the graduates are employable in the tech sector. But what do educational institutions need to do about that? They need to first and foremost look at how to improve the foundational skills and the core domain that they provide. Because it's only on top of that, that you can put all these skills and build upon it because you simply cannot do artificial intelligence if you don't understand maths or stats. You can't go into a factory and suddenly start applying IoT or AI when you don't understand mechanical engineering."

**Teachers need to be well-equipped with tech knowledge to promote digital learning:
Shekhar Bhattacharjee**

In the discussion on 'Upskilling the skiller', Dr. A.S.N Chakravarthy said, "Teachers need to be more equipped with ed-tech platforms which give them unlimited access to information knowledge, modules, curriculum which already made plugin prop into the classroom. that they go in and operate more as a facilitator and a researcher. You can facilitate your research you can curate information, and rather than becoming the old model, which was about that Guru is on the top. Guru has to be on the top all the time, but you have to be a lifelong learner at the same time. It is important to train teachers on 21st century skills that focus on collaboration, problem solving, design thinking with each other."

Societal challenges are major concern is bridging the digital divide: Prof. Osvaldo Geravasi, University of Perugia, Italy.

We have a few initiatives that were testing on 21st century skills on no tech, low tech and high tech. It's just not one way it's not just about access to education system, whereas can they get these opportunities and work around it? And we're also looking at really

marginalised populations the need to contextualise support as well. The need of a tribal girl in Odisha is quite a bit different from a need of a young person with disability which is going to be different from a child living an institutional care or refugee population. These are categories of young people. so when we talk about digital education, we do the breadth and scale of it, but at the same time, we need to look at the type of thing that is needed And what are these intersections for various vulnerable groups.

21st century skills should be considered as part of curriculum to make Indian youth globally competitive: Mr. Bibin Shivas, Customer service director, Coursera

In the discussion on 'Professional aka problem solving thinkers', Mr. Shivas said that we really need to look at 21st century skills not as an external thing, but as part of the curriculum as part of every subject matter that goes. “We

strive to understand the aspirations of young people and their learning, leadership employment on entrepreneurial journeys and and then support them in terms of what's relevant for them. Are they really work with

jobs that are not created for technology's not yet invented, or the problems not yet and we need to really equip them with these essential skills such as collaboration, problem solving, effective communication, decision making, financial literacy, as well as your curiosity, imagination, resilience and self regulation. As the second workplace is transformed, the skills required of its young people must also report This accentuates the need to invest in building the necessary 21st century skills and competences," he adds.

Vote of Thanks by Dr. I. Govardhani, Principal, ASC
