REGISTRAR

Encl: Brochure.

Mail & Hard copy to: Hon'ble President, KLEF

Mail to: Hon'ble Vice-Presidents, KLEF

Mail & Hard copy to: Hon'ble Pro Chancellor

Mail & Hard copy to: Hon'ble Vice-Chancellor

Mail & Hard copy to: Pro Vice-Chancellors

Mail to: Chief Coordinating Officer-Dr.A. Jagadeesh

Mail to: Special Officer -Dr.A. Vani

Mail to: All Advisors / All Deans / All Principals / All Vice-Principals / All Sr.Directors / All Directors / All Additional Deans /

All Associate Deans / Deputy Deans / PR Head

Mail to: Controller of Examinations-Dr.A.S.C.S.Sastry

Mail to: Joint Registrar / Deputy Registrar / Sr.Manager (Alumni Relations) & AR-Sri A.Krishna Rao / AR-Dr.MVAL

Narasimha Rao

Mail to: Advisor – NAAC & Hyderabad Operations - Prof. K.Koteswara Rao

Mail to: Principal-CoE..Dr.T.K. Rama Krishna Rao / Principal-FED

Mail to: All HoDs / All Alternate HoDs / All Deputy HoDs

Mail to: KL H - Principal Off Campus Centre, Aziz Nagar Campus / KL H - Principal Off Campus Centre, Bowrampet

Vice-Principal / Director / Deputy Director

Mail to: KL H HoDs.. AI&DS / CSE / ECE / BES / FED Coordinator / Business School

Mail to: KL H Associate Deans..P&D / R&D / Academics / IQAC / F&SA / Skill Development / Student Progression & Training

/ Student Affairs / Student Welfare / Examinations

Mail to: Librarian

Mail to: Webmaster-Mr.LV

Mail to: Chief Technical Officer (CTO)-Mr.A.Satya Kalyan

Mr. Raja Sekhar, Emp. No. 2482, Jr. Network Administrator (E-mail: rajasekhar_syte@kluniversity.in)

Mail to: Professor In-charge, EduTech, Animation-Dr. M. Siva Kumar, Assoc. Professor, ECE

Mail to: HoD-CE

FDP on

“EMERGING TRENDS IN CIVIL ENGINEERING”

7th - 11th July 2025

RESOURCE PERSONS

- 01. Dr. K. Sai Sahitya**
VNR Vignana Jyothi Institute of Engg & Tech, Hyderabad.
- 02. Dr. Perumal K**
Godavari Global University, Rajamahendravaram.
- 03. Dr. Dhanasekaran**
SRM Institute Of Science & Technology, Chennai.
- 04. Dr. Rajamallu C**
Lakireddy Bali Reddy College of Engineering, Mylavaram.
- 05. Er. Naga Prashanth**
CPCB, New Delhi.
- 06. Dr. John Paul V**
Karpagam Academy of Higher Education, Deemed to be University.
- 07. Er. Aparna Srivastav Kalapatapu**
Sri Karthikeya Consultant Services.
- 08. Dr. Shyam Praksh K**
Prasad V. Potluri Siddhartha Institute of Technology.
- 09. Dr. Suresh K**
JNTUK
- 10. Dr. Umesh Kumar Singh**
NIH, Roorkee.

Organised by Academic Staff College

Important Dates of the FDP

- 7th July 2025 (Monday) to 11th July 2025 (Friday)
- Mode – Online (via Webex Platform)
- Registration Fee – Free of Cost
- Last Date for Registration: 6th Jul 2025 (Sunday) by 7:00 PM

Participants are requested to complete the registration process before the deadline. The Webex joining link and session details will be shared with registered participants via email.

Chief Patron(s)

Er. K. Satyanarayana, Chancellor, KLEF

Er. K. L. Havish, Vice-President, KLEF

Er. K. Raja Harin, Vice-President, KLEF

Patron(s)

Dr. K. S. Jagannatha Rao , Pro-Chancellor, KLEF

Dr. G. P. S. Varma, Vice-Chancellor, KLEF

Dr. N. Venkatram, Pro Vice-Chancellor (Finance), KLEF

Dr. A.V.S. Prasad, Pro Vice-Chancellor (Administration), KLEF

Dr. K. Rajasekhara Rao, Pro Vice-Chancellor (Academics), KLEF

Dr. K. Subba Rao, Registrar, KLEF

Dr. T. K. Rama Krishna Rao, Principal, KL CoE, KLEF

Dr.I. Govardhani, Principal, ASC, KLEF

Program Chair

Dr. Chaitanya Kumar J D

Asst. Professor & Alternate HOD – CE, KLEF

Convenors

Dr. Lingeshwaran N

Assistant Professor, CE, KLEF

Dr. Aravindan A

Professor, CE, KLEF

Organizing Committee

Dr. Ch. Hanumantha Rao

Professor & Director (Construction), CE, KLEF

Dr. B Kameswara Rao

Professor, CE, KLEF

Dr. Atluri Venkateswara Rao

Professor, Dept of CE, KLEF

Dr. Sanjeet Kumar

Associate Professor, CE, KLEF

Dr. Ashwin Raut

Associate Professor, CE, KLEF

Dr. Y. Himath Kumar

Assistant Professor, CE, KLEF

Mr. K. Shyam Chamberlin

Assistant professor, CE, KLEF

Mr. K. Hemantha Raja

Assistant professor, CE, KLEF

Mr. B. G. Rahul

Assistant professor, CE, KLEF

Mr. K. J. Brahma Chari

Assistant professor, CE, KLEF

Mrs. V. Sree Lakshmi

Assistant Professor, CE, KLEF

How to apply

Participants are required to fill the online registration form by clicking on the following link / Scan QR Code

About KLEF

K L University is a pioneer in the field of engineering education and research in private sector. It was established as Koneru Lakshmaiah College of Engineering in the year 1980, situated in a spacious 100 acre campus on the banks of Buckingham canal of river Krishna, 8 Km away from Vijayawada. K L University has knowledge base stems with the presence of eminent and highly qualified academic staff, numbering 900+ out of which 355+ doctorates and 300+ pursuing Ph.D. is one of the best for any engineering institute. KLU offers 10 UG programs, 14 PG programs, 28 Integrated degree programs, dual degree programs and in addition to this research program is been offered in 14 disciplines.

VISION

To be a globally renowned university.

MISSION

To impart quality higher education and to undertake research and extension with emphasis on application and innovation that cater to the emerging societal needs through all-round development of the students of all sections enabling them to be globally competitive and socially responsible citizens with intrinsic values.

About KLEF – ASC

The Academic Staff College (ASC-KLEF) was established in 2009 and has since changed often to meet the demands of staff members and pertinent partners in terms of learning, training, and knowledge management. Since our founding as an interagency learning institution, we have grown to be important global partners for a vast network of stakeholders. Each year we offer over 50 programs to over 4,400 professionals. Either online, face-to-face, or a combination of both, our learning solutions deliver high-quality learning experiences that support professionals along their learning journeys. We have a wide range of options for both on-campus and online learning, depending on the program you select.

About CE Department

Welcome to the Department of Civil Engineering at Koneru Lakshmaiah Education Foundation (KLEF) a cornerstone of the institution since its inception in 1980. The department has continually evolved to address the dynamic demands of the construction and infrastructure sectors through

quality education, innovative research, and strong industry engagement.

In line with its commitment to academic excellence, the department launched two postgraduate programs M. Tech in Structural Engineering, M. Tech in Construction Management and Technology. The department is highly qualified and experienced in the field of consultancy and research. With an active research culture, the Civil Engineering department has made significant contributions to the field of publications in reputed journals and conference. Equipped with state-of-the-art laboratories, modern design tools, and a practical learning environment, the department offers an industry-aligned curriculum that emphasizes sustainable infrastructure, advanced construction practices, and cutting-edge research.

Our goal is to empower students to become skilled engineers and responsible professionals, capable of addressing real-world challenges in structural design, construction technology, transportation systems, water resources, and environmental engineering.

About FDP

The Faculty Development Program (FDP) aims to strengthen the academic and research skills of faculty members in civil engineering through focused training on sustainable and smart construction practices. Key themes include green construction, smart materials, and advanced structural systems for enhanced performance. It emphasizes circular economy approaches through waste utilization and efficient water resource management. Urban hydrology, smart city planning, and intelligent transportation systems are also addressed. Resilient pavement technologies and maintenance strategies form another core component. The FDP serves as a platform for knowledge sharing and professional growth.

Target Audience

Faculty Members from the following Specialisations

- Structural Engineering and Construction Technology & Management.
- Environmental Water Resource and Geotechnical Transportation Engineering.
- Research scholars.
- Faculty members pursuing research in mentioned areas.

- Industry professionals engaged in Research & development (R&D) organizations.

Theme /Topics

- Sustainable Infrastructure and Green Construction.
- Smart Materials and Advanced Structural Systems.
- Disaster-Resilient Structures and Risk Mitigation.
- Modern Surveying Techniques: Total Station, GIS & Remote Sensing.
- Construction Automation and Robotics.
- Waste Utilization and Circular Economy in Construction.
- Water Resource Management and Urban Hydrology.
- Smart City Planning and Intelligent Transportation Systems.
- Resilient Pavement Design and Maintenance Technologies.

Resource Persons

Dr. Umesh Kumar Singh, NIH, Roorkee

Dr. Dhanasekaran S, SRM Institute Of Science & Technology, Chennai

Dr. Rajamallu, LBRCE, Mylavaram, AP

Dr. John Paul V, Karpagam University, Coimbatore

Dr. Shyam Praksh K, PVP SIT, Vijayawada

Dr. Suresh K, JNTUK

Dr. Perumal K, Godavari Global University, RJY

Dr. K. Sai Sahitya, VNR VJIET, Hyderabad

Er.Aparna Srivastav Kalapatapu, Karthikeya Consultant Services

Er. Naga Prashanth, CPCB, New Delhi

Instructions to participants

- This Program is open to all Faculty Members, Scientists, Research Scholars, Engineers working in Educational Institutes/ Industries / R&D Organizations.
- Certificate will be provided to the participants who maintains 80% Attendance.

Registration fee particulars

- This Faculty Development Program (FDP) will be conducted free of cost through the Webex online platform.
- Participants are required to register in advance to receive the joining link and necessary communication details.

FACULTY DEVELOPMENT PROGRAM REPORT

<u>Organization Name</u>	K L UNIVERSITY
<u>Title of the FDP</u>	Emerging Trends in Civil Engineering
<u>Dates</u>	7th July to 11th July 2025
<u>Venue</u>	Online Webex
<u>Organized by</u>	Department of Civil Engineering (In Association With: Academic Staff College, KLEF)
<u>Convenors</u>	Dr. Lingeswaran N, Assistant Professor, CE, KLEF Dr. Aravindan A, Professor, CE, KLEF
<u>In Association with</u>	Indian Concrete Institute (ICI), Civil Engineering Association(CEA)

Objective of the FDP:

The primary aim of this FDP was to strengthen the academic and research capabilities of faculty members by exposing them to recent advancements in civil engineering, focusing on sustainability, smart construction technologies, and urban infrastructure planning.

Themes Covered:

- Sustainable Infrastructure and Green Construction
- Smart Materials and Advanced Structural Systems
- Urban Hydrology & Water Resource Management
- Disaster-Resilient Structures
- Circular Economy in Construction
- Intelligent Transportation Systems
- Resilient Pavement Design
- Modern Surveying Techniques & Robotics in Construction

Participants:

Over participants 300 from academic institutions, R&D organizations, and industry professionals across India and abroad attended the sessions.

Resource Persons:

Experts from premier institutions including NIH Roorkee, SRMIST Chennai, JNTUK, CPCB Delhi, and others delivered lectures.

Highlights:

- Daily attendance exceeded 240 participants.
- Each session included Q&A, interactive discussions, and insights into current trends.
- Positive feedback received from the majority of participants.

Outcome:

The FDP provided a robust platform for knowledge sharing, interdisciplinary interaction, and research-driven dialogue on emerging civil engineering practices, enhancing faculty development aligned with NEP 2020 goals.

PROGRAM SCHEDULE

Koneru Lakshmaiah Education Foundation (Deemed to be University)
Green Fields, Vaddeswaram Guntur Dist-522 502

Online FDP on "Emerging Trends in Civil Engineering" (7th July 2025 to 11th July 2025)

SL.NO	Name of the Speaker	Affiliation	Date	Slot Day	Timings
1	Dr. K. Sai Sahitya	VNR Vignana Jyothi Institute of Engg & Tech	07/07/25	Monday	10.00 AM to 11.30 AM
2	Dr. Perumal K	Godavari Global University, Rajamahendravaram	07/07/25	Monday	2.00 PM to 3.30 PM
3	Dr. Dhanasekaran	SRM Institute Of Science & Technology, Chennai	08/07/25	Tuesday	10.00 AM to 11.30 AM
4	Dr. Rajamallu C	Lakireddy Bali Reddy College of Engineering, Mylavaram	08/07/25	Tuesday	2.00 PM to 3.30 PM
5	Er. Naga Prashanth	CPCB, New Delhi	09/07/25	Wednesday	10.00 AM to 11.30 AM
6	Dr. John Paul V	Karpagam Academy of Higher Education, Deemed to be University	09/07/25	Wednesday	2.00 PM to 3.30 PM
7	Er.Aparna Srivastav Kalapatapu	Sri Karthikeya Consultant Services	10/07/25	Thursday	10.00 AM to 11.30 AM
8	Dr. Shyam Praksh K	Prasad V. Potluri Siddhartha Institute of Technology	10/07/25	Thursday	2.00 PM to 3.30 PM
9	Dr. Suresh K	JNTUK	11/07/25	Friday	10.00 AM to 11.30 AM
10	Dr. Umesh Kumar Singh	NIH, Roorkee	11/07/25	Friday	2.00 PM to 3.30 PM

FDP on “Emerging Trends in Civil Engineering”

(7th July 2025 - 11th July 2025)

Dear participants, as a coordinator I welcome you all on behalf of Dept of Civil Engineering, KLEF for the FDP on “Emerging Trends in Civil Engineering”. For the smooth conduction of this online program, I wish to keep the following requests and useful information to you all before commencing this program.

1. To **switch off** both your video and audio during the lecture.
2. To avoid requesting **feedback forms** in the chat box during the lecture citing various reasons.
3. To raise questions only during the discussion session after speaker has completed the lecture through **chat box**.
4. To stay patient when the online link is not working /Internet / Power Shutdown happens from our end and wait until any info that will be communicated through FDP on Emerging Trends in Civil Engineering (7th July -11th July 2025) **WhatsApp group**.
5. The feedback forms will be displayed in the chat box only after the end of each session. Filling all the feedback forms is mandatory to count on attendance. The certificates will be dispatched to all the eligible participants with **80% virtual attendance** in about one to two weeks after the end of the program.
6. To ensure accurate record keeping, we kindly ask that you use your **registration number** when filling out the attendance for each session. This will help us efficiently manage attendance and provide you with the necessary certificates upon completion of the program.
7. The ppt's / course materials will be **dispatched** only if the speaker is ready to share the content.

Expecting your participation, support and co-operation throughout the program.

Regards
Dr. Lingeshwaran N,
FDP Convenor,
Assistant Professor,
Department of Civil Engineering, KLEF.

354	ETCE354	Mr. VEERANKI SURYA TEJA	ANDHRA LOYOLA INSTITUTE OF ENGINEERING AND TECHNOLOGY	Assistant Professor
355	ETCE355	Dr. Venkata Krishna Atkuri	Swamandhra College of Engineering and Technology	Associate Professor
356	ETCE356	Dr. VENKATA RAMBABU V	N.B.K.R.INSTITUTE OF SCIENCE & TECHNOLOGY	Associate Professor
357	ETCE357	Dr. VENKATA SAI RAM KUMAR N	R.V.R & J.C College of Engineering	Associate Professor
358	ETCE358	Mr. Vignesh M	Karpagam Academy of Higher Education	Sr.Assistant Professor
359	ETCE359	Dr. Vigneshwar. R. V. K	SRM Institute of Science and Technology, Ramapuram	Assistant Professor
360	ETCE360	Mr. VIJAY SANKAR K	Sri Ranganathar Institute of Engineering and Technology	Assistant Professor
361	ETCE361	Mr. VIJAYAKUMAR SUREBAN	Angadi Institute of Technology and Management Belagavi Karnataka	Assistant Professor
362	ETCE362	Mr. VIKRANTKUMAR AMRUTLAL PATEL	Sankalchand Patel College of Engineering, Sankalchand Patel University, Visnagar	Assistant Professor

Koneru Lakshmaiah Education Foundation (Deemed to be University)
Green Fields, Vaddeswaram Guntur Dist-522 502
FDP on Emerging Trends in Civil Engineering (7th July 2025 - 11th July 2025)

363	ETCE363	Mr. Vinaykumar Hunagund	BITM, BALLARI	Assistant Professor
364	ETCE364	Dr. Vinod N T	Ballari Institute of Technology & Management	Assistant Professor
365	ETCE365	Ms. Vishakha Yadav	ITM Gwalior	Assistant Professor
366	ETCE366	Mr. Vivek prasad H G	JSS science and Technology university, mysore	Assistant Professor
367	ETCE367	Mrs. Yagala Adi Lakshmi	NBKRIST	Assistant Professor
368	ETCE368	Mr. Yeddala Sathish	Sree rama engineering college	Research Scholar
369	ETCE369	Mr. Yernagula Pratap	Gayatri Vidya Parishad college of Engineering (A)	Assistant Professor
370	ETCE370	Dr. YERRAMSETTY HIMATH KUMAR	K L E F	Assistant Professor

The END

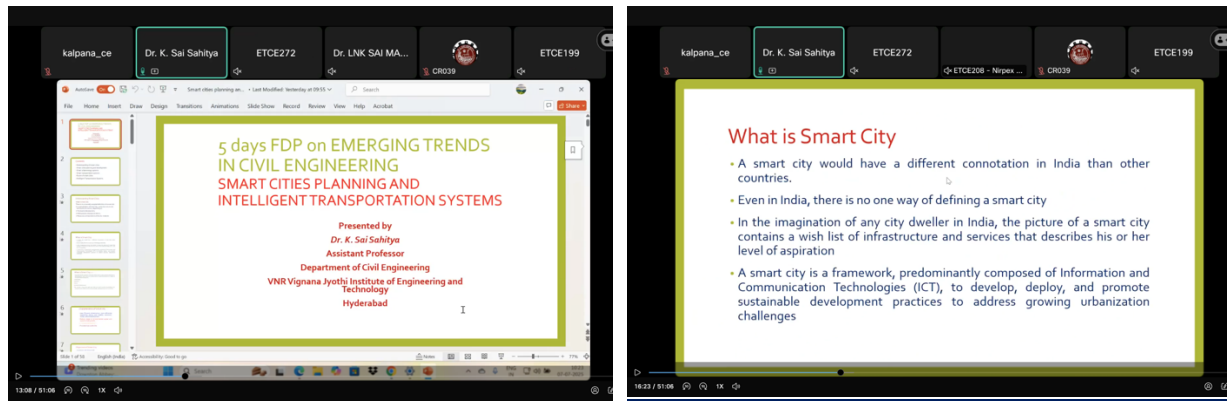

SUMMARY OF SESSIONS

SESSION 1:

TOPIC : Smart Cities Planning and Intelligent Transportation Systems.

Speaker : Dr. K. Sai Sahitya, VNR Vignana Jyothi Institute of Engg & Tech, Hyderabad.

Email : saisahitya_k@vnrvijet.in

In her presentation, " Smart Cities Planning and Intelligent Transportation Systems", Dr. K. Sai Sahitya, VNR Vignana Jyothi Institute of Engg & Tech, Hyderabad, explores Artificial Intelligence (AI) is revolutionizing civil In her pre smart cities represent the fusion of advanced digital technologies with urban planning to create more efficient, sustainable, and liveable environments. A key component of smart city development is the Intelligent Transportation System (ITS), which leverages technologies such as IoT, AI, GPS, and real-time data analytics to improve mobility and reduce traffic-related issues. Through ITS, cities can monitor and manage traffic flow, reduce congestion, and enhance road safety. Smart transportation includes integrated public transit systems that are efficient, cashless, and responsive to demand, as well as smart parking solutions that guide drivers to available spaces, reducing fuel consumption and emissions. Electric vehicles and their supporting infrastructure, like smart charging stations, play a critical role in promoting eco-friendly mobility. Urban planning also focuses on last-mile connectivity through pedestrian-friendly streets and smart cycling paths. These innovations enable data-driven decision-making that enhances travel efficiency, cuts down carbon footprints, and ensures a better quality of life for citizens. Overall, smart city planning combined with intelligent transportation systems sets the foundation for a sustainable, connected, and future-ready urban ecosystem.

SESSION 2:

TOPIC: AI Driven smart materials transforming of further of Civil Engineering.

Speaker : Dr. Perumal K, Assistant Professor Godavari Global University, Rajamahendravaram

Email : raviperumal33@gmail.com

**AI-Driven Smart Materials:
Transforming the Future
of Civil Engineering**

Dr. K. Perumal M.E., Ph.D.,
Assistant Professor
Department of Civil Engineering
Godavari Global University, Rajamundry

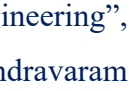

1. Introduction to SHM

SHM is the process of implementing a damage detection and characterization strategy for structures.

- **Damage due to:**
 - ✓ Mismanagement in construction,
 - ✓ Lack of quality control,
 - ✓ Temperature variation,
 - ✓ Initiation of cracks due to cyclic loadings.
- **Damage changes:**
 - ✓ Geometry properties,
 - ✓ Boundary conditions,
 - ✓ Characteristics of the system.

Why SHM?

1. Safety.
2. Replace schedule-driven maintenance with condition-based maintenance.
3. Increase Structure's Longevity.
4. Addressing Issues of Scale (e.g. monitoring millions of structure).
5. Detecting damage in early stage to enable proactive responses.
6. Total Cost Reduction.

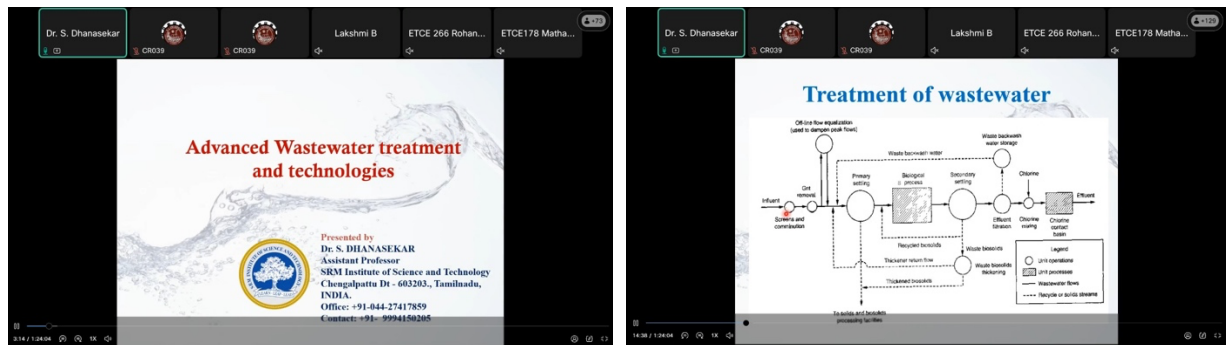

SHM Analogy	
Human Health monitoring	Structural Health Monitoring
	
	
	
	

In his presentation, "AI Driven smart materials transforming of further of Civil Engineering", Dr. Perumal K, Assistant Professor Godavari Global University, Rajamahendravaram explores Artificial Intelligence (AI) is revolutionizing civil engineering by enabling the development and application of smart materials that can adapt, respond, and even repair themselves under changing conditions. These AI-integrated materials, such as self-healing concrete, shape-memory alloys, and smart sensors, are designed to enhance the durability, safety, and efficiency of infrastructure. AI algorithms help in analyzing large datasets from these materials to predict structural performance, detect faults early, and automate maintenance. For example, embedded sensors powered by AI can monitor stress, temperature, and cracks in real time, allowing engineers to take preventive measures before failures occur. These advancements reduce maintenance costs, extend the lifespan of structures, and promote sustainability. Moreover, AI assists in material design by optimizing mix ratios and properties for specific applications using machine learning. As civil engineering faces the challenges of climate change, urbanization, and resource constraints, AI-driven smart materials offer innovative solutions for building resilient, intelligent, and future-ready infrastructure.

SESSION 3:

TOPIC: Advanced Wastewater Treatment and Technologies

Speaker: Dr. Dhanasekaran, SRM Institute Of Science & Technology, Chennai

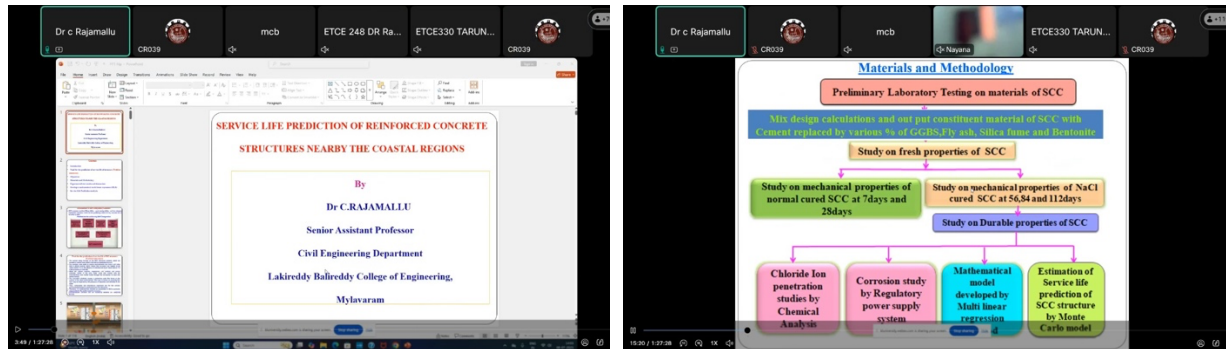

In his presentation, "Advanced Wastewater Treatment and Technologies," Dr. Dhanasekaran, SRM Institute Of Science & Technology, Chennai explores Advanced wastewater treatment technologies are essential for addressing growing water pollution and scarcity issues in urban and industrial areas. These modern systems go beyond conventional treatment by removing not just suspended solids and organic matter, but also nutrients, heavy metals, micro-pollutants, and pathogens. Technologies such as Membrane Bioreactors (MBR), Reverse Osmosis (RO), and Ultraviolet (UV) Disinfection offer high-efficiency filtration and purification. Advanced Oxidation Processes (AOPs) use chemical reactions to break down toxic contaminants that are resistant to traditional treatment. Electrocoagulation and nanotechnology-based filters are also gaining attention for their precision and low environmental impact. Additionally, AI and IoT integration in wastewater plants enables real-time monitoring, process automation, and predictive maintenance, improving treatment performance and operational efficiency. These advanced methods not only ensure safe discharge and reuse of water but also support sustainable water management in smart cities and industries.

SESSION 4:

TOPIC : Service life prediction of reinforced concrete structures nearby the coastal regions

Speaker : Dr. Rajamallu C, Lakireddy Bali Reddy College of Engineering, Mylavaram

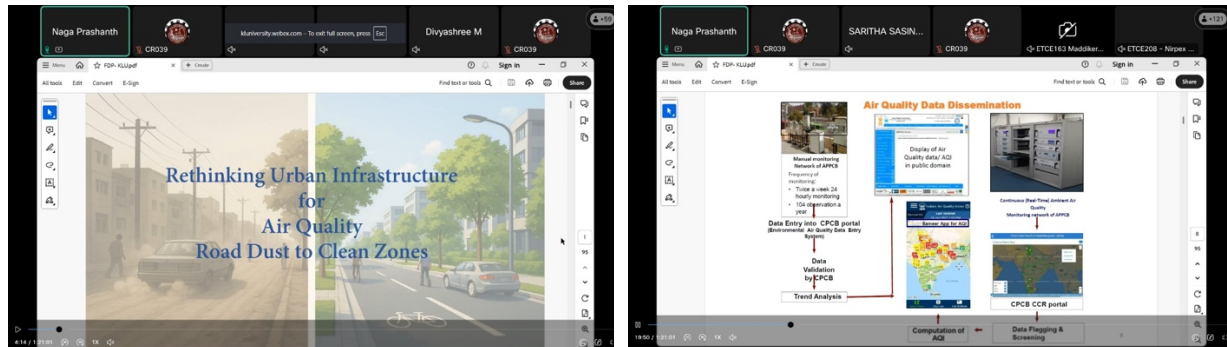

In his presentation, "Service life prediction of reinforced concrete structures nearby the coastal regions," Dr. Rajamallu C explores the Reinforced concrete structures in coastal regions are highly vulnerable to deterioration due to harsh environmental conditions, especially chloride-induced corrosion from seawater and salt-laden air. Predicting the service life of such structures is crucial for ensuring safety, durability, and cost-effective maintenance. The service life prediction involves assessing factors like chloride penetration, carbonation depth, moisture content, crack development, and reinforcement corrosion rates. Advanced modeling techniques, such as probabilistic deterioration models, finite element analysis, and AI-based predictive algorithms, are now widely used to simulate degradation processes over time. Non-destructive testing methods, including half-cell potential, ground-penetrating radar, and electrochemical techniques, provide real-time data for accurate condition assessment. Incorporating corrosion-resistant materials, protective coatings, and high-performance concrete can significantly enhance durability. By integrating environmental data, material properties, and structural response, engineers can make reliable service life predictions and plan timely interventions, ultimately extending the life and performance of coastal infrastructure.

SESSION 5:

TOPIC : Rethinking urban infrastructure for air quality road dust to clean zones

Speaker : Er. Naga Prashanth, CPCB, New Delhi

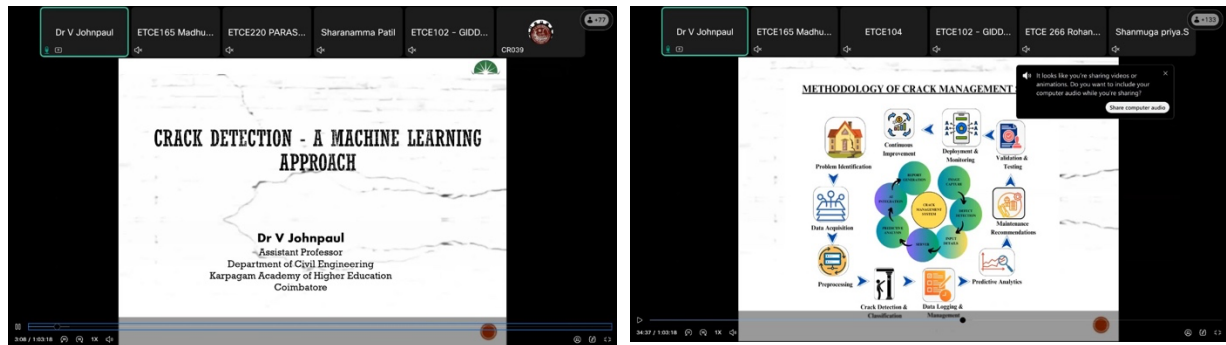

Urban infrastructure plays a crucial role in shaping air quality, especially in rapidly growing cities where road dust and vehicular emissions are major contributors to pollution. Rethinking infrastructure involves designing cities with a focus on reducing particulate matter and creating clean zones for healthier living. This includes the use of dust-binding road surfaces, permeable pavements, and vegetated buffers that trap and reduce airborne particles. Integrating smart traffic systems can help minimize congestion and emissions, while urban green spaces act as natural air filters. Technologies like real-time air quality monitoring, automatic street vacuum systems, and solar-powered air purifiers are being implemented to actively manage and improve local air quality. Additionally, promoting non-motorized transport through well-designed pedestrian and cycling paths reduces road dust generation. By prioritizing sustainable materials, intelligent design, and pollution control technologies, urban planners can transform polluted zones into breathable, clean, and resilient urban environments.

SESSION 6:

TOPIC : Crack detection -A machine learning approach

Speaker: Dr. John Paul V, Karpagam Academy of Higher Education, Deemed to be University.

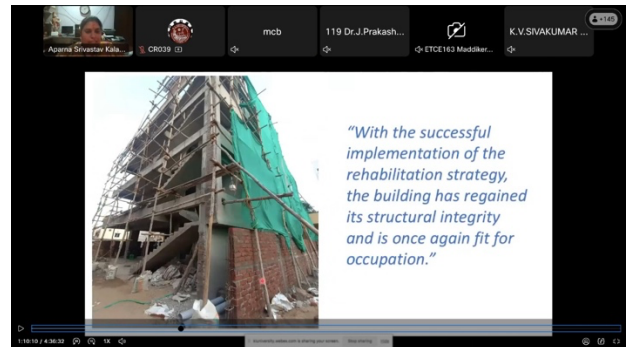

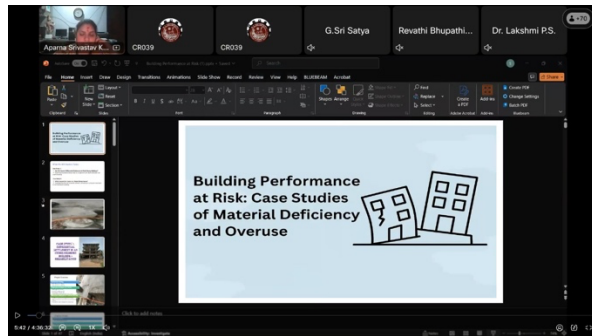

Crack detection in structures is critical for ensuring safety, durability, and timely maintenance, and machine learning (ML) is transforming how this task is performed. Traditional visual inspections are time-consuming, subjective, and prone to human error, whereas ML offers automated, fast, and accurate crack identification using image data. Techniques like Convolutional Neural Networks (CNNs) are widely used to analyze images of concrete or structural surfaces, detecting and classifying cracks based on their size, type, and severity. These models are trained on large datasets of crack and non-crack images, learning to differentiate patterns with high precision. Combined with drone or mobile robot imaging, ML enables large-scale inspection of bridges, buildings, and pavements with minimal human intervention. Further, deep learning approaches enhance detection accuracy under varying lighting, texture, and noise conditions. This intelligent method improves maintenance planning, reduces costs, and enhances the overall safety and reliability of civil infrastructure systems.

SESSION 7:

TOPIC : Building performance at Risk : case studies of material deficiency and overuse.

Speaker : Er.Aparna Srivastav Kalapatapu, Sri Karthikeya Consultant Services.

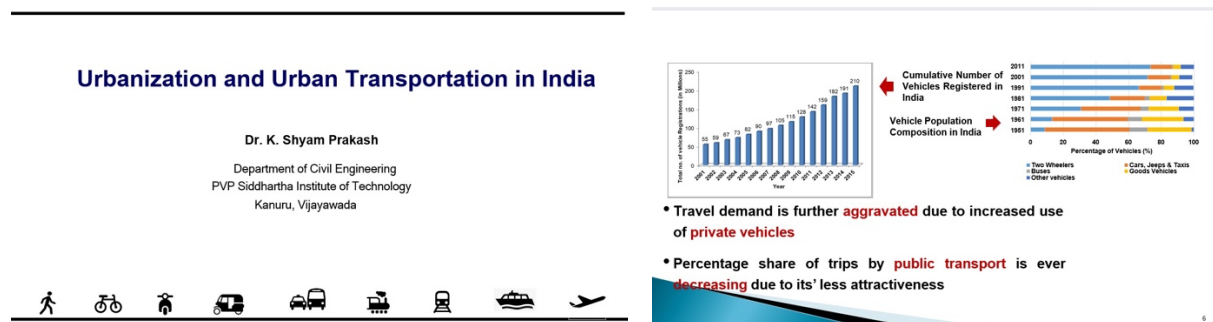

The performance and longevity of buildings are directly influenced by the quality and quantity of construction materials used. Several case studies reveal that both material deficiency and material overuse can significantly compromise structural integrity, safety, and sustainability. In many instances, underuse or poor-quality materials such as low-grade concrete, substandard steel, or insufficient reinforcement have led to premature cracking, water leakage, and even structural failure. Conversely, the overuse of materials, driven by overdesign or lack of optimization, results in unnecessary weight, increased cost, and higher carbon footprint, without improving performance. For example, in some high-rise projects, excessive concrete usage has not only increased dead load but also affected seismic resilience. Case studies from coastal and earthquake-prone regions show that neglecting material compatibility and durability has led to accelerated degradation. These failures emphasize the importance of material testing, design optimization, and adherence to codes and standards. By learning from such real-world cases, engineers and planners can adopt smarter, more balanced approaches to ensure safe, efficient, and sustainable building performance

SESSION 8:

TOPIC : Urbanization and Urban Transportation in India.

Speaker : Dr. Shyam Praksh K, Prasad V. Potluri Siddhartha Institute of Technology.

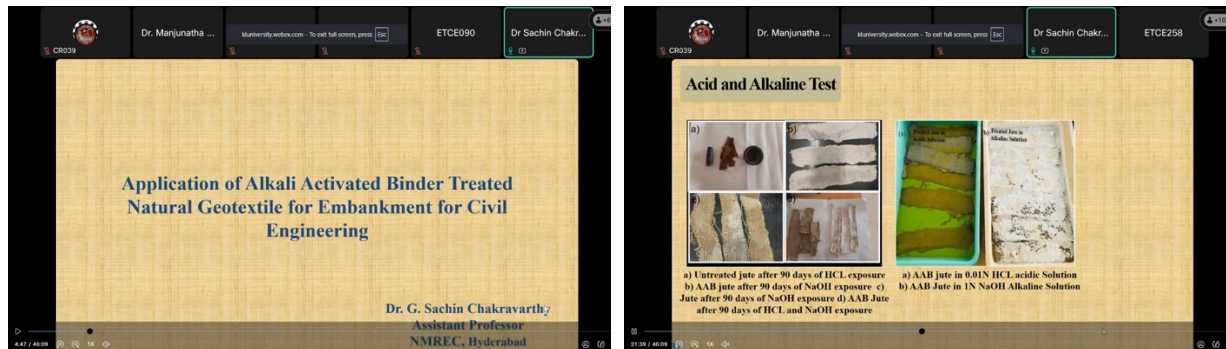

Urbanization in India is occurring at an unprecedented pace, driven by economic growth, migration, and population expansion. As cities grow, the demand for efficient and sustainable urban transportation systems becomes increasingly critical. However, many Indian cities face challenges such as traffic congestion, inadequate public transport, poor road infrastructure, and rising pollution levels. To address these issues, India is investing in metro rail systems, bus rapid transit (BRT), electric mobility, and smart traffic management solutions. The integration of non-motorized transport options, such as cycling and walking infrastructure, is also gaining attention for improving accessibility and reducing emissions. Urban transportation planning now focuses on creating multi-modal, inclusive, and environmentally friendly systems that can keep up with the demands of rapid urban growth. As India moves toward smart city development, modernizing urban transport is vital for enhancing quality of life, supporting economic development, and building resilient urban futures.

SESSION 9:

TOPIC : Application of alkali activated binder treated natural geotextile for embankment for civil engineering.

Speaker : Dr. Sachin Chakravarthy, NMREC, Hyderabad.

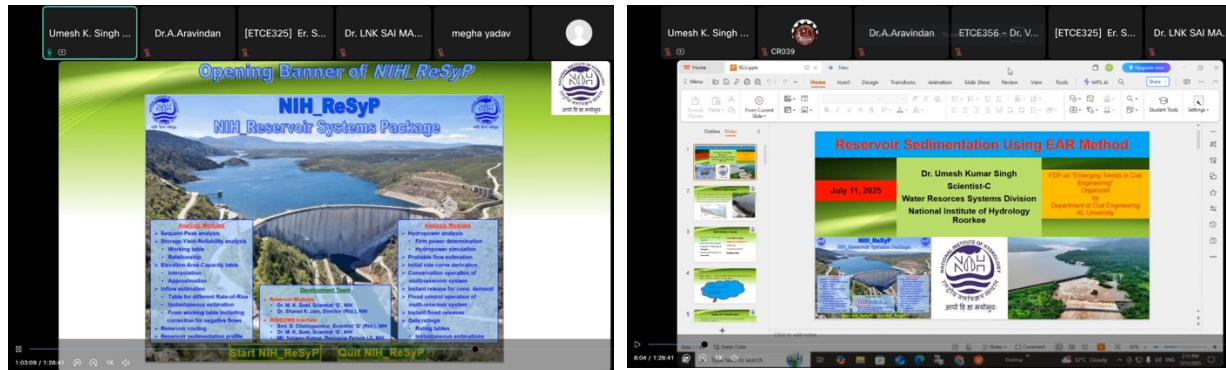

The use of alkali activated binder (AAB) treated natural geotextiles presents a sustainable and high-performance solution for embankment stabilization in civil engineering. Natural geotextiles, such as those made from jute, coir, or hemp, are biodegradable, cost-effective, and environmentally friendly, but their durability in harsh soil environments is limited. Treating these natural fibers with alkali activated binders derived from industrial byproducts like fly ash, slag, or metakaolin enhances their mechanical strength, resistance to biodegradation, and bonding with soil particles. When applied to embankments, AAB-treated geotextiles improve erosion control, slope stability, and soil reinforcement. They also contribute to reducing settlement and shear failure by distributing loads more effectively. This approach supports the development of eco-friendly infrastructure, reduces dependence on synthetic materials, and aligns with the goals of green and sustainable engineering. Ongoing research indicates that such treated geotextiles can offer comparable performance to traditional polymer-based alternatives while significantly reducing the environmental footprint of geotechnical projects.

SESSION 10:

TOPIC : Reservoir sedimentation using EAR method.

Speaker : Dr. Umesh Kumar Singh, NIH, Roorkee

Reservoir sedimentation is a critical issue that reduces water storage capacity, affects dam safety, and limits the operational efficiency of reservoirs. The Empirical Area Reduction (EAR) method is a widely used approach for estimating and analysing sediment deposition in reservoirs over time. This method is based on the empirical relationship between the original and reduced area of water spread at various elevations, allowing engineers to predict the sediment distribution pattern without detailed bathymetric data. The EAR method helps in estimating the loss of reservoir capacity due to sedimentation by comparing current surface area measurements with original capacity curves. It is especially useful in data-scarce regions where detailed surveys are not feasible. By applying this method, water resource managers can plan for desiltation, silt flushing, and catchment treatment measures to prolong reservoir life and optimize water storage. The EAR method thus plays a vital role in the sustainable management of reservoirs and the planning of future water infrastructure projects.

FEEDBACK

SESSION 1

Topic: Smart Cities Planning and Intelligent Transportation Systems

Speaker: Dr. K. Sai Sahitya

- "The session offered a futuristic perspective on urban development. The integration of AI and IoT into transportation systems was particularly compelling and showed how technology can solve real-world urban challenges."
- "I appreciated the clarity with which the speaker explained Intelligent Transportation Systems. The session highlighted actionable solutions for reducing congestion and improving mobility in our cities."
- "This session inspired me to explore how smart city concepts can be incorporated into curriculum and research. The emphasis on eco-friendly mobility was both timely and important."

SESSION 2

Topic: AI Driven Smart Materials in Civil Engineering

Speaker: Dr. Perumal K

- "Learning about self-healing concrete and smart sensors was eye-opening. These innovations truly represent the future of infrastructure resilience."
- "The way AI was linked to material behavior and predictive maintenance was brilliant. It helped me understand how data-driven approaches can improve safety and efficiency."
- "The session broadened my knowledge of material science and AI applications. I'm excited to explore the practical use of these technologies in ongoing research."

SESSION 3

Topic: Advanced Wastewater Treatment and Technologies

Speaker: Dr. Dhanasekaran

- "This session provided valuable insight into cutting-edge water treatment methods. The explanation of MBR and AOP technologies was both clear and practical."
- "I was particularly impressed by the integration of AI and IoT in wastewater management systems. This forward-thinking approach will definitely influence future project planning."
- "The focus on sustainability and safe water reuse was commendable. It gave me a deeper appreciation for advanced solutions in urban water management."

SESSION 4

Topic: Service Life Prediction of Reinforced Concrete Structures in Coastal Areas

Speaker: Dr. Rajamallu C

- "The speaker's deep understanding of corrosion modeling and deterioration prediction was impressive. The session was highly technical yet easy to follow."
- "I found the focus on real-time condition assessment using NDT techniques particularly valuable. It gave me ideas for research in concrete durability."
- "This session emphasized proactive infrastructure maintenance. It's inspired me to adopt predictive strategies in structural design and monitoring."

SESSION 5

Topic: Rethinking Urban Infrastructure for Air Quality

Speaker: Er. Naga Prashanth

- "This session made me rethink the role of urban design in public health. The speaker's insights into air quality control through infrastructure were compelling."
- "Innovative solutions like smart traffic systems and dust-binding surfaces were well presented. I'll definitely consider these in future sustainable urban planning projects."
- "I appreciated how the speaker connected technology, environment, and policy. It was a great example of interdisciplinary application in civil engineering."

SESSION 6

Topic: Crack Detection – A Machine Learning Approach

Speaker: Dr. John Paul V

- "The use of machine learning for structural monitoring was fascinating. It's a breakthrough in ensuring safety with minimal manual effort."
- "The explanation of CNNs and image-based detection techniques was technical yet accessible. I now have a better understanding of AI in structural diagnostics."
- "This session opened up new possibilities for using drones and robotics in infrastructure inspection. It was innovative and inspiring."

SESSION 7

Topic: Building Performance at Risk – Case Studies on Material Deficiency and Overuse

Speaker: Er. Aparna Srivastav Kalapatapu

- "The case-based approach was powerful. Real-life examples illustrated how critical material selection and optimization are in construction."

- "I found the discussion on overdesign and resource waste particularly enlightening. It's a reminder to always balance safety with sustainability."
- "The session encouraged me to be more conscious of material quality and quantity in my future designs."

SESSION 8

Topic: Urbanization and Urban Transportation in India

Speaker: Dr. Shyam Praksh K

- "This session effectively contextualized urban transportation within the Indian scenario. The challenges and solutions were very relatable."
- "The speaker highlighted a comprehensive vision for sustainable mobility. It gave me a broader understanding of multi-modal transport planning."
- "I'm motivated to look deeper into policy frameworks and infrastructure development for urban mobility after attending this session."

SESSION 9

Topic: Application of AAB-Treated Natural Geotextile for Embankments

Speaker: Dr. Sachin Chakravarthy

- "The concept of enhancing natural geotextiles with alkali-activated binders was both innovative and eco-friendly. It provided a new perspective on green geotechnics."
- "I appreciated the focus on performance, durability, and environmental compatibility. This session showcased a sustainable alternative to synthetic materials."
- "This topic was new to me and has sparked interest in incorporating natural materials into future research and teaching."

SESSION 10

Topic: Reservoir Sedimentation using the EAR Method

Speaker: Dr. Umesh Kumar Singh

- "The EAR method was clearly explained and presented as a practical solution for sediment management. It's particularly useful for field engineers."
- "This session emphasized data-driven water resource management. It gave me actionable ideas for reservoir analysis in low-data contexts."
- "The topic was very relevant to India's water challenges. It highlighted the importance of predictive tools in sustainable resource planning."

OUTCOMES AND RECOMMENDATIONS

Outcomes of the FDP

The 5-day Faculty Development Program on *"Emerging Trends in Civil Engineering"* conducted from **7th to 11th July 2025**, yielded several impactful outcomes that are expected to enhance academic excellence, promote research, and encourage the adoption of innovative practices in civil engineering:

◆ Enhanced Multidisciplinary Awareness

Participants gained exposure to a wide range of emerging topics such as smart cities, AI-driven smart materials, wastewater treatment technologies, sustainable geotechnics, and machine learning applications in structural engineering. These sessions broadened their technical horizon beyond traditional civil engineering disciplines.

◆ Integration into Academic Practice

Faculty members expressed intentions to incorporate new knowledge into teaching modules, lab sessions, and project-based learning activities. Topics like intelligent transportation systems, smart materials, and green infrastructure are likely to be embedded in curriculum design and course delivery.

◆ Research and Innovation Boost

The sessions inspired new research directions, particularly in AI applications, self-healing materials, sustainable construction, and data-driven decision-making. Participants are expected to initiate research projects and explore interdisciplinary collaborations in these areas.

◆ Strengthened Industry-Academia Interface

Guest sessions by experts from reputed institutions and organizations (such as NIH Roorkee, CPCB, SRMIST, and Godavari Global University) offered real-world perspectives, enhancing participants' understanding of practical challenges and applied research opportunities.

◆ Collaborative Opportunities and Knowledge Sharing

The FDP served as a platform for academic networking, encouraging future collaborations, joint publications, and knowledge exchange across institutions. This also supports the spirit of the National Education Policy (NEP 2020) by promoting multidisciplinary engagement and lifelong learning.

Recommendations for Future Programs

To build upon the success and feedback from this FDP, the following recommendations are proposed for future faculty development initiatives:

Include Hands-On Demonstrations and Case-Based Learning

Incorporate hands-on virtual labs, software demonstrations, and problem-solving case studies to provide experiential learning in structural modelling, transportation analytics, and water treatment technologies.

Broaden Technological Focus

Expand sessions to include emerging topics such as:

- 3D printing and automation in construction
- Carbon capture in building materials
- Geospatial technologies and digital twins
- Resilience-based design under climate change scenarios

Encourage International Participation

Inviting international experts and showcasing global case studies can offer diverse perspectives on sustainable infrastructure, climate-resilient cities, and data-driven engineering, enriching the learning experience.

Establish Thematic Research Clusters

Encourage participants to form theme-based working groups (e.g., Smart Materials, Green Construction, AI in Civil Engineering) that can evolve into collaborative research units or proposal-writing teams for government or industry funding.

Foster Continuous Engagement

Create a post-FDP learning ecosystem through:

- Follow-up webinars and alumni meet-ups
- Access to recorded sessions and resource materials
- Periodic newsletters on developments in civil engineering innovations

CONCLUSION

The Faculty Development Program on "Emerging Trends in Civil Engineering" was a resounding success, offering participants a diverse and forward-looking perspective on the future of civil infrastructure. Through expert-led sessions, in-depth technical discussions, and multidisciplinary themes, the FDP enriched the knowledge base of faculty members, researchers, and professionals across the country. The program provided deep insights into smart cities, AI-integrated materials, sustainable construction techniques, modern transportation systems, and environmental innovations equipping participants with the tools and ideas needed to modernize civil engineering education, research, and practice. By fostering academic dialogue and industry interaction, the FDP built a strong professional network committed to exploring intelligent, resilient, and sustainable engineering solutions. The positive response and engagement throughout the program underscore its pivotal role in inspiring innovation, promoting sustainability, and advancing knowledge in civil engineering domains. This FDP has set a benchmark for future capacity-building initiatives, ensuring that participants are better prepared to tackle evolving challenges and shape the built environment responsibly and efficiently.

The END

ACKNOWLEDGMENTS

We extend our heartfelt gratitude to all the distinguished speakers for graciously sharing their expertise, insights, and experiences during the Faculty Development Program on "*Emerging Trends in Civil Engineering*". Their valuable contributions played a crucial role in the success and impact of this program. We also express our sincere appreciation to the **Organizing Committee**, whose dedicated efforts, meticulous planning, and seamless coordination ensured the smooth conduct of all sessions. A special note of thanks to the **Academic Staff College, KLEF** for their continued support and collaboration, and to the **management of KLEF** for providing the platform and encouragement to conduct this academic initiative. We are equally thankful to our **participants** for their active engagement and enthusiasm throughout the sessions. We gratefully acknowledge the support of our **sponsors and stakeholders**, whose financial and logistical assistance significantly contributed to the successful execution of the FDP.

This is to certify that

Mr. MAHANTESH PATIL

has Actively Participated in 5 Day Online Faculty Development Program (FDP) on **“Emerging Trends in Civil Engineering”** held on 7th July 2025 to 11th July 2025, Organized by the Department of Civil Engineering, KLEF, in association with the KLEF-Academic Staff College, Green Fields, Vaddeswaram, Guntur district, Andhra Pradesh-522302, India.

Dr. Lingeshwaran N
Assistant Professor,
Dept. of CE, KLEF

Dr. Aravindan A
Professor,
Dept. of CE, KLEF

Dr. Chaitanya Kumar J D
Assistant Professor & HOD,
Dept. of CE

Dr. T. K. Rama Krishna
Principal
College of Engineering

Dr. I. Govardhani
Principal
Academic Staff College

Department of
Civil Engineering

Academic
Staff College

CERTIFICATE OF PARTICIPATION

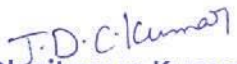

This is to certify that

Mr. Mahendra Umare

has Actively Participated in 5 Day Online Faculty Development Program (FDP) on **“Emerging Trends in Civil Engineering”** held on 7th July 2025 to 11th July 2025, Organized by the Department of Civil Engineering, KLEF, in association with the KLEF-Academic Staff College, Green Fields, Vaddeswaram, Guntur district, Andhra Pradesh-522302, India.

Dr. Lingeshwaran N
Assistant Professor,
Dept. of CE, KLEF

Dr. Aravindan A
Professor,
Dept. of CE, KLEF

Dr. Chaitanya Kumar J D
Assistant Professor & HOD,
Dept. of CE

Dr. T. K. Rama Krishna
Principal
College of Engineering

Dr. I. Govardhani
Principal
Academic Staff College

Department of
Civil Engineering

Academic
Staff College

CERTIFICATE OF PARTICIPATION

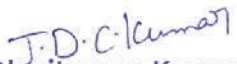

This is to certify that

Mr. Maheshbabu Kurva

has Actively Participated in 5 Day Online Faculty Development Program (FDP) on **“Emerging Trends in Civil Engineering”** held on 7th July 2025 to 11th July 2025, Organized by the Department of Civil Engineering, KLEF, in association with the KLEF-Academic Staff College, Green Fields, Vaddeswaram, Guntur district, Andhra Pradesh-522302, India.

Dr. Lingeshwaran N
Assistant Professor,
Dept. of CE, KLEF

Dr. Aravindan A
Professor,
Dept. of CE, KLEF

Dr. Chaitanya Kumar J D
Assistant Professor & HOD,
Dept. of CE

Dr. T. K. Rama Krishna
Principal
