Subject: Faculty Development Program on “Malware Analysis and Reverse Engineering” by Professor of Practice (PoP) Mr. Sai Satish, Indian Servers, President, AIMER Society, for Cohort E09 Faculty in association with the Academic Staff College, KLEF

Ref: KLEF/RO/FDP/Professor of Practice/2025-26

9th June 2026

Orders of the Hon'ble Vice-Chancellor dt. 09-06-2026

CIRCULAR

Sub: Faculty Development Program on “Malware Analysis and Reverse Engineering” by Professor of Practice (PoP) Mr. Sai Satish, Indian Servers, President, AIMER Society, for Cohort E09 Faculty in association with the Academic Staff College, KLEF Vaddeswaram campus – Communication - Reg.

Ref: Letter from Dr. K. Ch. Sri Kavya, Director Alumni Relations

This is to inform all faculty members of KLEF that, as part of the Professor of Practice (PoP) Program, Mr. Sai Satish, President, AIMER Society and Indian Servers, will be visiting KLEF, Vaddeswaram campus to conduct a Faculty Development Program and hands-on sessions for the Faculty members of Cohort E09.

Date : 10/06/2026 to 14/06/2026
Venue : Rose Hall
Time : 9.30 AM to 12.30 PM.

Online Assessment will be conducted on 14/06/2026.

List of faculty to attend the program is attached herewith.

All E09 Cohort faculty are directed to attend the upcoming session of the Professor of Practice Program.

Heads of Departments – School of Computing are requested to encourage faculty to participate and get benefitted from the program.

REGISTRAR

Encl: List of faculty to attend the program.

Mail & Hard copy to: Hon'ble President, KLEF

Mail to: Hon'ble Vice-Presidents, KLEF

Mail & Hard copy to: Hon'ble Pro Chancellor

Mail & Hard copy to: Hon'ble Vice-Chancellor

Mail & Hard copy to: Pro Vice-Chancellors

Mail to: Chief Coordinating Officer-Dr.A. Jagadeesh

REPORT ON Professor of Practice – Faculty Development Programme On

“Malware Analysis & Reverse Engineering”

Organized by: KL Alumni Relations in Association with Academic Staff College (ASC)

Date: 10th -14th June 2026

Venue: Rose Hall, Vaddeswaram Campus

Resource Person:

Mr. Sai Satish

CEO, Indian Servers

MCA (2012–14). KL-Alumni

Introduction

KL Alumni Relations, in association with the Academic Staff College (ASC), successfully organized a five-day Professor of Practice – Faculty Development Programme (FDP) on **“Malware Analysis & Reverse Engineering”** from 10th to 14th June 2026 at Rose Hall, Vaddeswaram Campus. The programme was delivered by distinguished alumnus Mr. Sai Satish, CEO of Indian Servers, who shared extensive industry expertise in cybersecurity, malware investigation, reverse engineering, cyber defense mechanisms, and threat intelligence.

The programme was designed to strengthen the cybersecurity knowledge and practical skills of faculty members by exposing them to contemporary cyber threats, malware analysis techniques, reverse engineering methodologies, and emerging cybersecurity technologies. Through expert lectures, demonstrations, case studies, and hands-on sessions, participants gained valuable insights into the rapidly evolving cybersecurity landscape and the challenges faced by organizations in protecting digital assets.

Objectives of the Programme

The programme was organized with the following objectives:

- To provide faculty members with comprehensive knowledge of malware analysis and reverse engineering.
- To familiarize participants with modern cybersecurity threats and attack methodologies.
- To introduce static and dynamic malware analysis techniques.
- To develop practical skills in reverse engineering and digital forensics.
- To enhance awareness of cyber threat intelligence and incident response practices.
- To promote cybersecurity research, innovation, and curriculum enhancement.
- To bridge academia and industry through expert interaction and practical exposure.

Inaugural Session

The programme commenced with an inaugural session attended by university administrators, faculty members, and participants from various departments. The dignitaries highlighted the increasing significance of cybersecurity in the digital era and emphasized the role of higher education institutions in producing industry-ready cybersecurity professionals.

The resource person, Mr. Sai Satish, shared insights into the contemporary cyber threat landscape and stressed the importance of continuous learning and skill development in cybersecurity. Participants were encouraged to actively engage in the sessions and leverage the opportunity to gain practical industry knowledge.

Mrs. Manjusha Chinta from Academic Staff College, delivered the Welcome Address and warmly welcomed the dignitaries, resource person, and participants. In her address, she emphasized the importance of continuous professional development in higher education and highlighted the need for educators to adopt innovative pedagogical practices and learner-centered approaches to meet the evolving demands of twenty-first-century education. She expressed confidence that the programme would equip participants with valuable knowledge and practical strategies to enhance teaching effectiveness and student learning outcomes.

Day 1 – 10th June 2026

Fundamentals of Cybersecurity and Malware Ecosystem

The first day of the Faculty Development Programme focused on establishing a strong foundation in cybersecurity concepts and the evolving malware ecosystem. The sessions began with an overview of the modern cybersecurity landscape, highlighting the increasing frequency and sophistication of cyberattacks targeting governments, enterprises, educational institutions, and individuals. Participants were introduced to the core principles of information security, including confidentiality, integrity, availability, authentication, and non-repudiation.

The resource person discussed the motivations behind cybercrime, including financial gain, espionage, hacktivism, cyber warfare, and data theft. Participants explored how cybercriminals

exploit vulnerabilities in operating systems, applications, and human behavior through social engineering attacks. The evolution of malware from simple computer viruses to advanced persistent threats (APTs) and fileless malware was explained through real-world examples.

Practical demonstrations illustrated how malware infiltrates systems, spreads across networks, and compromises organizational assets. Participants observed examples of phishing emails, ransomware attacks, and malware infection chains. The sessions provided valuable insights into the current cybersecurity challenges faced by organizations and emphasized the importance of adopting proactive defense mechanisms, cybersecurity awareness, and risk management strategies.

Day 2 – 11th June 2026

Static Malware Analysis Techniques

The second day concentrated on static malware analysis techniques, enabling participants to investigate malicious software without executing it. The sessions emphasized the importance of safe malware analysis practices and the role of static analysis in identifying malware characteristics during the early stages of investigation.

Participants learned about executable file structures and the significance of Portable Executable (PE) formats used in Windows operating systems. The resource person demonstrated how malware analysts examine executable headers, imported libraries, strings, metadata, and embedded resources

to identify suspicious indicators. Discussions also covered the use of cryptographic hashes, signatures, and reputation-based analysis for malware identification.

Participants were introduced to industry-standard malware analysis tools and learned how these tools assist analysts in identifying suspicious artifacts and malicious intent. Several case studies demonstrated how static analysis helps security teams detect malware before execution and supports incident response investigations.

Day 3 – 12th June 2026

Dynamic Malware Analysis and Behavioral Monitoring

The third day focused on dynamic malware analysis techniques that enable analysts to observe malware behavior during execution within controlled environments. The sessions highlighted the limitations of static analysis and demonstrated how behavioral monitoring provides deeper insights into malware functionality.

Participants were introduced to secure malware analysis environments, including isolated sandboxes and virtual machines. The resource person explained the importance of containment strategies for safely executing suspicious programs without risking production systems. Through hands-on demonstrations, participants observed malware interactions with operating systems, file systems, processes, memory, and network resources.

Practical exercises demonstrated how malware establishes persistence mechanisms, modifies system configurations, communicates with remote servers, and attempts to evade detection. Participants learned how to identify malicious behaviors using monitoring tools and forensic techniques. The discussions emphasized the importance of dynamic analysis in modern threat hunting, digital forensics, and incident response operations.

Day 4 – 13th June 2026

Reverse Engineering Methodologies

The fourth day provided comprehensive exposure to reverse engineering concepts and methodologies used by cybersecurity professionals to understand malware internals. The sessions focused on techniques used to deconstruct software binaries and uncover hidden functionalities that may not be evident through conventional analysis methods.

Participants were introduced to assembly language fundamentals and gained an understanding of processor instructions, memory management, and program execution flow. The resource person demonstrated how disassemblers and debuggers are used to inspect executable code and analyze malware behavior at a low level.

Real-world malware samples were analyzed to demonstrate how cybersecurity analysts identify malicious logic, command-and-control mechanisms, credential theft routines, and persistence techniques. Participants gained valuable insights into the methodologies used by security researchers to uncover attacker intentions and develop effective countermeasures.

Day 5 – 14th June 2026

Threat Intelligence, Cyber Defense, and Emerging Trends

The final day focused on cyber threat intelligence, advanced defense mechanisms, and emerging trends shaping the future of cybersecurity. The sessions emphasized the growing importance of intelligence-driven security operations in detecting, preventing, and responding to cyber threats.

Participants explored the lifecycle of threat intelligence and learned how security organizations collect, analyze, and disseminate intelligence related to cyber adversaries. Discussions covered indicators of compromise, threat actor profiling, attack attribution, and intelligence-sharing frameworks used across industries.

The resource person demonstrated how AI and machine learning technologies are being integrated into cybersecurity systems to improve threat detection, anomaly identification, and automated response mechanisms. Participants examined future cybersecurity

challenges arising from cloud computing, Internet of Things (IoT), artificial intelligence, and emerging attack vectors. The sessions highlighted the importance of continuous monitoring, intelligence-sharing, and adaptive defense strategies in maintaining organizational cybersecurity resilience.

Feedback collected from participants indicated exceptionally high levels of satisfaction regarding content quality, technical depth, practical relevance, and industry applicability. Participants particularly appreciated the real-world case studies, hands-on demonstrations, and direct interaction with an accomplished cybersecurity expert. Many participants expressed interest in pursuing advanced cybersecurity certifications and initiating cybersecurity-focused research projects.

The programme concluded with the distribution of participation certificates and a vote of thanks acknowledging the contributions of the resource person, organizing committee, KL Alumni Relations, Academic Staff College, and all participants.

Key Outcomes

- Enhanced understanding of malware analysis and reverse engineering concepts.
- Improved practical knowledge of cybersecurity investigation methodologies.
- Increased awareness of emerging cyber threats and defense mechanisms.
- Exposure to industry-standard malware analysis tools and forensic techniques.
- Strengthened research interests in cybersecurity, malware analysis, and digital forensics.

The programme successfully provided faculty members with comprehensive exposure to modern cybersecurity practices, malware investigation techniques, reverse engineering methodologies, threat intelligence frameworks, and emerging cyber-defense technologies. Through expert lectures, practical demonstrations, real-world case studies, collaborative discussions, and hands-on activities, participants acquired valuable theoretical and practical knowledge necessary for addressing contemporary cybersecurity challenges.

The programme served as an effective platform for connecting academic learning with industry expertise and reinforced the importance of cybersecurity education in higher education institutions. The knowledge and skills acquired during the programme are

expected to contribute significantly to curriculum enhancement, faculty development, research initiatives, student mentoring, and the overall advancement of cybersecurity education, research, and innovation at KL Deemed to be University.
