

Orders of Honourable Vice-Chancellor Dt. 20-06-2026**CIRCULAR**

Subject: Faculty Development Program on “Designing Big Data Systems” by Professor of Practice Mr. Rama Krishna Prasad Vemana, Vice President, Morgan Stanley, for Faculty members of Cohort E11, in association with Academic Staff College, KLEF Vaddeswaram campus – Communication – Reg. .

Ref: Letter from Dr. K. Ch. Sri Kavya, Director Alumni Relations .

This is to inform all faculty members of KLEF Vaddeswaram campus that, as part of Professor of Practice Program in association with Academic Staff College, **Mr. Rama Krishna Prasad Vemana, Vice President, Morgan Stanley**, will be visiting KLEF to conduct **FDP** on “**Designing Big Data Systems**” for faculty members of Cohort E11, as detailed below:

Date : 22/06/26 to 24/06/26

Venue : Jasmine Hall

Time : 2.00 PM to 5.00 PM.

Heads of Departments – School of Computing are requested to encourage their faculty to participate and benefit from the program.

List of Faculty members to attend the program is attached herewith.

Poster is attached herewith.

All Faculty members of **E11 Cohort faculty** are directed to attend the upcoming session of the **Professor of Practice Program**.

REGISTRAR

Mail & Hard copy to: Dr. K. Ch. Sri Kavya, Director Alumni Relations

Mail to: Mail & Hard copy to: Hon'ble President, KLEF

Mail to: Hon'ble Vice-Presidents, KLEF

Mail & Hard copy to: Hon'ble Pro Chancellor

Mail & Hard copy to: Hon'ble Vice-Chancellor

Mail & Hard copy to: Pro Vice-Chancellors

Mail to: Chief Coordinating Officer-Dr.A. Jagadeesh

Mail to: Special Officer -Dr.A. Vani

Mail to: All Advisors / All Deans / All Additional Deans / Controller of Examinations / All Sr.Directors / All Directors / All Principals / All Vice-Principals

Mail to: KL H - Principal Off Campus Centre, Aziz Nagar Campus / KL H - Principal Off Campus Centre, Bowrampet

Mail to: All HoDs of Vaddeswaram campus

Mail to: All HoDs of Off-campus Centres-Aziz Nagar & Bowrampet , Hyderabad

Mail to: Dr. K. Ch. Sri Kavya, Director, Alumni Relations

Dean (MH&IR)

All HoDs of Departments of MBA, BBA & B.Com, Vaddeswaram campus

Through ERP: All Associate Deans / Deputy Deans / PR Head

Through ERP: Joint Registrar / Deputy Registrar / AR-Dr.MVAL Narasimha Rao

Through ERP: All Alternate HoDs / All Dy. HoDs of Vadeswaram campus

Through ERP: KL H Associate Deans of Off-campus Centres-Aziz Nagar / Bowrampet / GBS

Through ERP: Librarian

Through ERP: Webmaster-Mr.LV

Through ERP: Chief Technical Officer (CTO)-Mr.A.Satya Kalyan

Mr. Raja Sekhar, Emp. No. 2482, Jr. Network Administrator (E-mail: rajasekhar_syte@kluniversity.in)

Through ERP: Professor In-charge, EduTech, Animation-Dr. M. Siva Kumar, Assoc. Professor, ECE

Through ERP: Dr. K. Sony, Assistant Director, Alumni Relations

All Faculty members of School of Computing of Vaddeswaram campus

Individuals concerned

Thanks & Regards

Report on Faculty Orientation Programme on “Designing Big Data Systems” (under PoP for Cohort-E11)

Organized by: KL Alumni Relations in Association with Academic Staff College (ASC)

Date: 22-06-2026 to 24-06-2026.

Venue: Jasmine Hall, C-Block

Resource Person: Mr. Ramakrishna Prasad Vemana, Vice President, Morgan Stanley

Introduction

The Academic Staff College (ASC), in association with the KL-Alumni Relations, organized a three-day Faculty Orientation Programme on “**Designing Big Data Systems**” under the Professor of Practice (PoP) initiative for Cohort-E11 from 22-06-2026 to 24-06-2026.

The programme was designed to strengthen faculty members’ understanding of contemporary Big Data engineering practices and to provide meaningful exposure to industry-oriented approaches for designing scalable and efficient data systems. The sessions were conducted by Mr. Ramakrishna Prasad Vemana, Vice President, Morgan Stanley, who brought valuable industry perspectives and practical insights into the design and implementation of Big Data solutions for real-world applications.

The orientation programme served as an important platform for bridging the gap between academic concepts and current industrial practices in the field of Big Data engineering. Through the three-day engagement, faculty members were exposed to modern data architectures, distributed computing frameworks, cloud-based data processing approaches, and scalable analytics solutions.

Around **49** faculty members from various departments of KLEF participated in the programme.

Programme Details and Session Coverage

The Faculty Orientation Programme focused on the key principles and practices involved in designing robust, scalable, and efficient Big Data systems. The sessions emphasized the transition from conventional data-processing approaches to modern architectures capable of handling large-scale, high-volume, and continuously generated data.

Understanding Big Data Systems and Industry Requirements

The programme provided faculty members with an orientation to the significance of Big Data systems in contemporary industries and digital applications. The discussions emphasized the increasing importance of data-driven decision-making and the need for systems that can efficiently manage large and complex datasets.

The resource person highlighted the importance of designing data solutions with scalability, efficiency, reliability, and practical usability in mind. Industry-oriented perspectives helped participants understand how Big Data concepts are translated into solutions for real-world organizational requirements.

Modern Data Architectures

A significant focus of the programme was on understanding modern data architectures and the principles involved in designing scalable data-processing environments.

Faculty members were introduced to approaches for structuring data systems in a manner that supports efficient data ingestion, processing, storage, and analytics. The discussions helped participants appreciate how architectural decisions influence system performance, scalability, maintainability, and the ability to respond to changing data requirements.

The industry perspective shared during the sessions enabled participants to relate theoretical concepts taught in academic environments to the architectural considerations followed in professional settings.

Distributed Computing and Scalable Processing

The orientation also emphasized the role of distributed computing frameworks in Big Data engineering. Participants gained an understanding of how large-scale data-processing requirements can be addressed through distributed approaches rather than relying solely on traditional centralized systems.

The sessions highlighted the importance of distributing computational workloads effectively to achieve scalability and efficient processing. Such exposure enabled faculty members to better understand the principles behind systems designed to process large volumes of data across scalable computing environments.

Cloud-Based Data Processing

Another important area covered during the programme was cloud-based data processing. The discussions provided industry-oriented insights into the use of cloud environments for developing and managing scalable data systems.

Participants gained an appreciation of how cloud-based approaches can support flexible computing and data-processing requirements. The sessions also reinforced the importance of selecting appropriate architectures and technologies based on application requirements, scalability considerations, and operational needs.

Scalable Analytics Solutions

The programme further addressed the design of scalable analytics solutions for extracting value from large-scale datasets. Participants were exposed to the broader process of developing data systems that can support analytics requirements while maintaining efficiency and scalability.

The resource person connected these concepts with real-world industrial applications, enabling faculty members to understand how organizations design data ecosystems to support data-driven operations and decision-making.

Industry-Academia Knowledge Integration

A major strength of the programme was its emphasis on bridging academic learning with industrial practice. The direct interaction with an experienced industry professional provided faculty members with an opportunity to understand the expectations, challenges, and practical considerations associated with Big Data engineering in professional environments.

The industry-oriented discussions encouraged faculty members to reflect on how contemporary Big Data technologies and system-design practices could be incorporated into teaching, curriculum delivery, project guidance, and student skill development.

Faculty Interaction and Learning

The orientation programme provided an interactive platform for faculty members to engage with contemporary Big Data practices and gain insights directly from an industry expert. Participants benefited from practical perspectives on the challenges involved in developing scalable and efficient data solutions.

The programme encouraged faculty members to connect their existing academic knowledge with current industry practices. The exposure was particularly useful in understanding the practical dimensions of Big Data system design and the importance of adopting scalable approaches when dealing with large and complex data environments.

The interaction with the resource person also enabled participants to gain a broader understanding of the skills and competencies expected from graduates entering the Big Data and data engineering domains.

Key Outcomes of the Programme

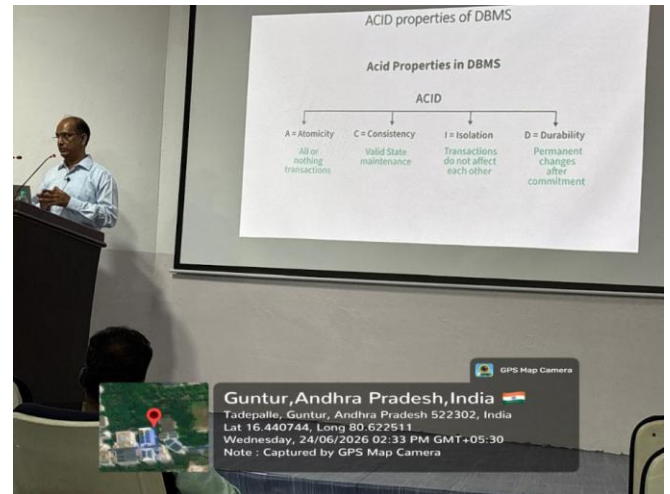

The three-day Faculty Orientation Programme resulted in several important learning outcomes:

- Faculty members gained enhanced awareness of Big Data system design principles and their industrial applications.
- Participants developed better understanding of modern data architectures used for scalable data solutions.
- The programme provided exposure to distributed computing approaches for large-scale data processing.
- Faculty members gained insights into cloud-based data-processing environments and their relevance to scalable systems.
- Participants developed a broader perspective on designing efficient, reliable, and scalable analytics solutions.
- The programme strengthened the connection between academic concepts and industry practices in Big Data engineering.
- Faculty members gained industry-oriented perspectives that can support teaching, project mentoring, curriculum delivery, and student skill development.

- The programme contributed to the objectives of the Professor of Practice initiative by facilitating direct interaction between faculty and experienced industry professionals.

Photos

Conclusion

The three-day Faculty Orientation Programme on “Designing Big Data Systems” successfully provided faculty members of Cohort-E11 with valuable exposure to contemporary Big Data engineering practices and industry-oriented system-design approaches.

The sessions conducted by Mr. Ramakrishna Prasad Vemana, Vice President, Morgan Stanley, offered participants meaningful insights into designing scalable and efficient Big Data solutions for real-world applications. The programme effectively addressed modern data architectures, distributed computing, cloud-based data processing, and scalable analytics while emphasizing the practical considerations involved in developing robust data systems.

With the participation of **49** faculty members from various departments, the programme contributed significantly to faculty capacity building and strengthened the integration of industry perspectives into academic practices. The initiative also reinforced the objectives of the Professor of Practice programme and the collaborative efforts of the Academic Staff College and KL-Alumni Relations in promoting industry–academia engagement and continuous professional development.
