Sub: Hands-On FDP on “Text Mining, Word Embeddings, and Voice Technologies “by Professor of Practice **Dr BBM Krishnakanth, Lead Data Scientist (GenAI), Persistent Systems**, for cohort E02 Faculty, in association with the Academic Staff College. – Communication - Reg.

Ref: Letter dated received from Dr.K.Ch. Sri Kavya, Director (Alumni Relations) and forwarded by Dr. I. Govardhini, Principal, Academic Staff College.

This is to inform all faculty of KLEF as part of the Professor of Practice Program in association with the Academic Staff College, **Dr BBM Krishnakanth, Lead Data Scientist(GenAI), Persistent Systems**, will be visiting KLEF to conduct A Hands-On FDP on “Text Mining, Word Embeddings, and Voice Technologies.”

Cohort E02 Faculty of AI&ML are informed to attend the session.

Date : 12/07/2025

Venue : Sunflower hall

Time : 9:30 AM to 12.30 PM, 2.00 PM to 4.00 PM.

All **E02 Cohort faculty** are requested to attend the upcoming session of the **Professor of Practice Program**.

Heads of Departments – School of Computing (CSE-1, CSE-2, CSE-3, CSE-4, CS& IT and AI&DS) are directed to ensure attendance of the earmarked faculty members (list attached) to participate in the programme and get benefitted from the program.

Report On

Faculty Development Program on “Text Mining, Word Embeddings, and Voice Technologies”

Organized by: Academic Staff College, KLEF

Venue: Sunflower Hall, C-Block, KLEF, Vaddeswaram

Date: 12th July 2025

Timings: 9:30 AM – 12:30 PM & 2:00 PM – 4:00 PM

Target Participants: Cohort E02 Faculty Members

Resource Person: Dr BBM Krishnakanth, Lead Data Scientist (GenAI), Persistent Systems

The Academic Staff College of KLEF conducted a one-day Faculty Development Programme (FDP) on “**Text Mining, Word Embeddings, and Voice Technologies**” on 12-07-2025 at Sunflower Hall, KLEF Vaddeswaram. This FDP was designed exclusively for Cohort E02 faculty members to provide a deep understanding of advanced Natural Language Processing (NLP) concepts, modern word representation techniques, and cutting-edge voice technology applications. The session combined theoretical concepts with practical demonstrations, enabling faculty to enhance their subject delivery and explore research opportunities in AI-driven language technologies.

Objectives of the FDP

The programme aimed to:

- Introduce text mining techniques and their relevance in academic and industry projects.
- Explain word embedding models and their role in improving NLP applications.
- Demonstrate the applications of voice technologies in real-world systems.
- Provide faculty with practical exposure to modern NLP tools and frameworks.
- Encourage faculty to integrate these concepts into curriculum and research.

Morning Session (9:30 AM – 12:30 PM)

The morning session commenced with an inaugural address by Dr. I. Govardhani, Principal, Academic Staff College, KLEF, who emphasized the importance of faculty development initiatives in keeping educators aligned with emerging technological advancements. She highlighted the growing relevance of Natural Language Processing (NLP) and text analytics in modern research and academic applications, encouraging faculty members to explore these technologies for both teaching and interdisciplinary research.

Following the inaugural address, the technical session introduced participants to the fundamentals of Text Mining, focusing on essential preprocessing techniques required for effective textual data analysis. The resource person explained various preprocessing steps such as data cleaning, tokenization, stop-word removal, and stemming or lemmatization, which are crucial for preparing raw textual data for computational analysis. Participants were also introduced to statistical and semantic approaches to text analysis, enabling them to understand how patterns and meaning can be extracted from large volumes of textual data.

The session further explored word embeddings, which play a critical role in representing textual information in numerical form for machine learning models. Various embedding techniques such as Word2Vec, GloVe, and FastText were discussed, along with modern contextual embedding models such as BERT and GPT, which capture deeper contextual relationships between words. The session included practical demonstrations on generating and visualizing word embeddings, allowing participants to gain hands-on insight into how semantic relationships between words can be represented and analyzed computationally.

Afternoon Session (2:00 PM – 4:00 PM)

The afternoon session focused on Voice Technologies and their growing significance in intelligent systems and human–computer interaction. The session began with an overview of the fundamental components of voice technology, including speech recognition, text-to-speech systems, and voice assistants. The resource person explained how these technologies are transforming the way users interact with digital systems, enabling more natural and accessible communication.

Participants were introduced to several APIs and frameworks used for developing voice-enabled applications, including platforms such as Google Speech-to-Text, Azure Cognitive Services, and OpenAI's Whisper model. The discussion highlighted the capabilities of these tools in building applications that can interpret spoken language, generate voice responses, and integrate speech interfaces into software systems.

To illustrate the practical impact of voice technologies, the session included case studies demonstrating their implementation in sectors such as healthcare, education, and assistive technologies. These examples showcased how voice-enabled systems can support medical documentation, enhance accessibility for individuals with disabilities, and facilitate interactive learning environments.

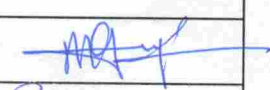

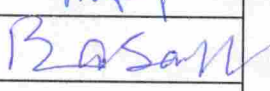

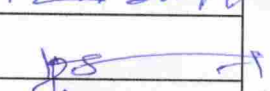

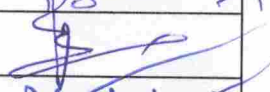

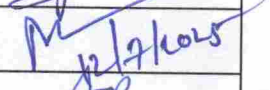

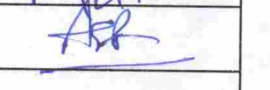

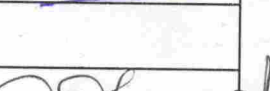

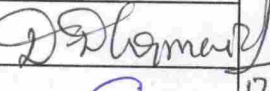

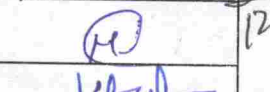

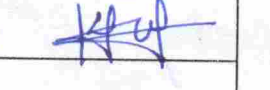

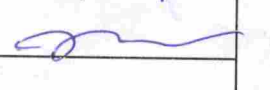

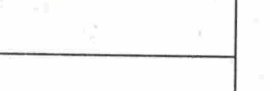

The session concluded with an interactive question-and-answer segment, where participants engaged in discussions on future research directions and emerging trends in Natural Language Processing and voice technologies.
