Academic Staff College

Report on training on ERP

12.04.2018 & 25.04.2018 to 26.04.2018

Training on ERP by Dr.K.Arulraj, ERP Project Manager was organised by academic staff college in Jasmine Hall for all faculty of KLEF from 12.04.2018 & 25.04.2018 to 26.04.2018.

The resource person has explained that ERP is process management software that allows an organization to use a system of integrated applications to manage the business and automate many back office functions related to technology, services and human resources.

ERP software typically integrates all facets of an operation — including product planning, development, manufacturing, sales and marketing — in a single database, application and user interface.
ERP software is considered to be a type of enterprise application, that is software designed to be used by larger businesses and often requires dedicated teams to customize and analyze the data and to handle upgrades and deployment.

ERP software typically consists of multiple enterprise software modules that are individually purchased, based on what best meets the specific needs and technical capabilities of the organization. Each ERP module is focused on one area of business processes, such as product development or marketing.

He also explained the usage of some of the most common ERP modules included for the KLEF those for product planning, material purchasing, inventory control, distribution, accounting, marketing, finance and HR. A business will typically use a combination of different modules to manage back-office activities and tasks including the following:

- Distribution process management
- Supply chain management
- Services knowledge base
- Configure prices
- Improve accuracy of financial data
- Facilitate better project planning
- Automate the employee life-cycle
- Standardize critical business procedures
- Reduce redundant tasks
- Assess business needs
- Accounting and financial applications
- Lower purchasing costs
- Manage human resources and payroll

Resource Person : Dr.K.Arul Raj, ERP Project Manager
