Academic Staff College

Flipped classroom

30.11.2017 to 02.12.2017

A 3-day workshop on “Flipped Model Classroom” was organised by Academic Staff College from 30.11.2017 to 02.12.2017 for the faculty members who would be implementing the flipped model of teaching for their courses in the classroom by Prof.Rama Patnaik, ASC and Mr.Hari Kiran Vege, Associate Dean, TLP in sunflower Hall.

Flipped class means what is typically given as homework is done in class with the assistance of the teacher. What is typically presented in class (i.e. lectures, content, background knowledge, or real life

Experiences) by a live teacher, students receive at home via a podcast, YouTube video, and/or other online resources.

Flipped classroom is an instructional strategy and a type of blended learning that reverses the traditional learning environment by delivering instructional content, often online, outside of the **classroom**. It moves activities, including those that may have traditionally been considered homework, into the **classroom**.

Prior to the workshop the information about the flipped model workshop is made available to all the participant faculty members through KLEF LMS- MOODLE so that the participants will read the material on flipped model and as well go through the videos to be ready to understand the flipped model classroom.

Mr.Hari Kiran Vege, Associate Dean for Teaching, Learning Process have explained the following points on second day of the workshop

1. to understand the purpose of various tools available on Learning Management Systems and MOOCs that support Flipped model Class work.
2. to apply at least 3 different IT enabled tools for value addition into their flipped class work.
3. to design a session plan and its related content through IT enabled tools for effective delivery through Flipped class work
4. to assess the effectiveness of flipped model classes through various reports that can be generated from IT enabled tools.

The workshop came to an end with oral feedback from the Participants and the certificate distribution.
