Objectives

The primary objective of the workshop **“Tackling the Decreasing Girl Child Ratio in India”** is to raise awareness among girls' students and teaching staff about the alarming decrease in the girl child ratio in India. The workshop aims to explore the social, economic, and cultural factors contributing to this trend and promote understanding of its broader implications on society. By the end of the workshop, participants should be empowered with the knowledge and tools to address this issue, advocate for gender equality, and actively contribute to initiatives that promote the welfare of the girl child.

Description

This workshop is designed to focus on one of the most critical social challenges India faces today: the decreasing girl child ratio. The event will feature expert speakers and thought leaders who will delve into the root causes behind the declining female child population, such as societal norms, gender discrimination, and imbalanced sex ratios. Participants will be guided through interactive sessions that provide deeper insights into gender equality, the importance of female empowerment, and the roles that communities, governments, and individuals can play in reversing this trend. The session will include discussions, case studies, and real-life examples to drive the point home.

Outcomes

By the end of the workshop, participants will have gained a deeper understanding of the factors contributing to the decreasing girl child ratio and its implications for the future of the nation. They will be equipped with actionable insights on how to contribute toward solving this problem, both as individuals and as part of a collective effort. The workshop will foster critical thinking about gender biases, and participants will leave with strategies for advocating for gender equality and promoting policies aimed at improving the conditions for the girl child in society. Additionally, participants will be more aware of the significance of supporting initiatives that create a better, more inclusive environment for young girls in India.
