WORKSHOP ON CYBER CRIMES

Date : 4/01/2023
Time : 10.00 A. M TO 12:00 Noon
Venue : Peacock Hall, KLEF

OBJECTIVES

The primary objectives of organizing a workshop on cyber crimes for women and girls students are to empower them with essential knowledge and skills to protect themselves in the digital realm. This workshop aims to educate participants about the various forms of cybercrimes, including online harassment, identity theft, and cyber bullying, and equip them with strategies for online safety and responsible digital behavior. By raising awareness and enhancing digital literacy, the workshop seeks to reduce the vulnerability of women and girls to cybercrimes, promote their confidence in navigating the internet, and encourage them to become advocates for online security. Additionally, it aims to bridge the gender gap in cyber security knowledge, ultimately fostering a safer online environment and promoting gender equality in the digital space.

DESCRIPTION

The workshop on cybercrimes for women and girls students proved to be a highly informative and empowering event. This workshop is organized by KLEF Women Development Cell/ Women's Forum. Resource person to this workshop is Mr. Sai Satish, CEO Indian servers. Participants actively engaged in discussions and activities aimed at enhancing their digital literacy and online safety awareness. Throughout the workshop, attendees gained a comprehensive understanding of various cybercrimes, including online harassment and identity theft, and learned practical strategies to protect themselves and their personal information. The event also fostered a sense of empowerment, equipping women and girls with the confidence to navigate the digital world securely. Moreover, the workshop addressed the gender gap in cyber security knowledge, empowering female students to take charge of their online presence and advocate for online security. Overall, the workshop significantly contributed to creating a safer and more informed online community for women and girls, aligning with the broader goal of promoting gender equality in the digital sphere. The following aspects were discussed

Cyber crimes against women and children are on the raise and they have been drastically victimized in the cyberspace. Some illegal persons try to defame women and children by sending obscene e-mails, stalking women and children by using chat rooms, websites etc, developing pornographic videos where women and children are depicted in compromising positions mostly created without their consent, spoofing e-mails, morphing of images for pornographic content etc. Massive awareness needs to be created among women and children regarding the safe use of Mobile Phones, Computers and the Internet

How can women prevent cyber crime? The legal system has approved a variety of legislation to address cybercrime against women. Cyber Crime Prevention against Women & Children (CCPWC) scheme.

1. Spreading awareness about cyber crimes.
2. Indian Cyber Crime Coordination Centre (I4C)
3. National Cyber Crime Reporting Portal.

The primary purpose of a cyber awareness program is to educate people about possible cyber threats and avoid a data breach. However, no method can guarantee complete security from the attacks but can help reduce their occurrence and equip endusers and professionals with practical knowledge to mitigate such risks

OUTCOMES

The outcomes of organizing the workshop on cybercrimes for women and girls students have been profoundly positive. Participants emerged from the workshop with increased awareness of cyber threats and a heightened ability to protect themselves online, thereby reducing their vulnerability to cybercrimes. The event empowered them with the knowledge and skills to recognize and respond to online harassment, cyber bullying, and identity theft. Moreover, it fostered a sense of confidence and digital literacy among women and girls, enabling them to navigate the internet securely. Importantly, the workshop contributed to bridging the gender gap in cyber security knowledge, promoting gender equality in the digital space, and creating a safer online environment for all. As informed advocates for online security, these students are now better equipped to champion cyber security awareness within their communities and beyond.
