Orders of the Vice-Chancellor dt. 25-06-2020

CIRCULAR

Sub: Organizing Awareness programme **"HEALTH CAMP ON HEMOGLOBIN TESTING"** – Reg.

Ref: Letter dt.25-06-2020 from Dr.M. Sreedevi, Professor, CSE & Convenor, Women's Forum.

This is to inform that Women's Wing of Department of Bio-Technology is organizing awareness programme **"HEALTH CAMP ON HEMOGLOBIN TESTING"** as per the details given below.

Date : 27.06.2020 (Saturday)
Time : 11.00 a.m. to 5.00 p.m.
Venue : KLEF

All the interested students and faculty members can attend the programme.

All the Heads of the Departments are requested to bring this information to the notice of all the students and faculty members of their respective departments.

HEALTH CAMP ON HEMOGLOBIN TESTING

Date : 27.06.2020
Time : 11.00 A.M to 5.00 P.M
Venue : KLEF

OBJECTIVES :

The objective of the Health Camp on Hemoglobin Testing is to promote and safeguard the health and well-being of individuals by providing access to essential hemoglobin screening and information. This health camp aims to raise awareness about the importance of maintaining healthy hemoglobin levels, particularly among vulnerable populations such as children, pregnant women, and individuals at risk of anemia. It seeks to facilitate early detection of hemoglobin-related health issues, offer counseling and guidance on nutrition and lifestyle improvements, and provide necessary referrals and interventions where required. Ultimately, the goal is to empower participants to take proactive steps toward better health, prevent anemia-related complications, and promote overall well-being through informed choices and timely interventions.

DESCRIPTION :

The Hemoglobin Testing Health Camp, held on 27.06.2020 at KLEF, was a significant healthcare initiative aimed at promoting awareness of hemoglobin levels and their impact on overall health. The camp provided free hemoglobin testing services to participants, with a focus on identifying and addressing anemia-related concerns. This report summarizes the key highlights, objectives, activities, and outcomes of the health camp.

KLEF Women's forum conducted health camp on "Hemoglobin Testing in Blood" Program for the faculty, Staff on 27.06.20 at C Block Room no C-511 Bio-Tech Lab from 11.00 A.M to 1.00 P.M. A hemoglobin test measures the amount of hemoglobin in your blood. Hemoglobin is a protein in your red blood cells that carries oxygen to your body's organs and tissues and transports carbon dioxide from your organs and tissues back to your lungs. If a hemoglobin test reveals that your

hemoglobin level is lower than normal, it means you have a low red blood cell count (anemia).

Anemia can have many different causes, including vitamin deficiencies, bleeding and chronic diseases. The normal range for hemoglobin is:

For men, 13.5 to 17.5 grams per deciliter

For women, 12.0 to 15.5 grams per deciliter

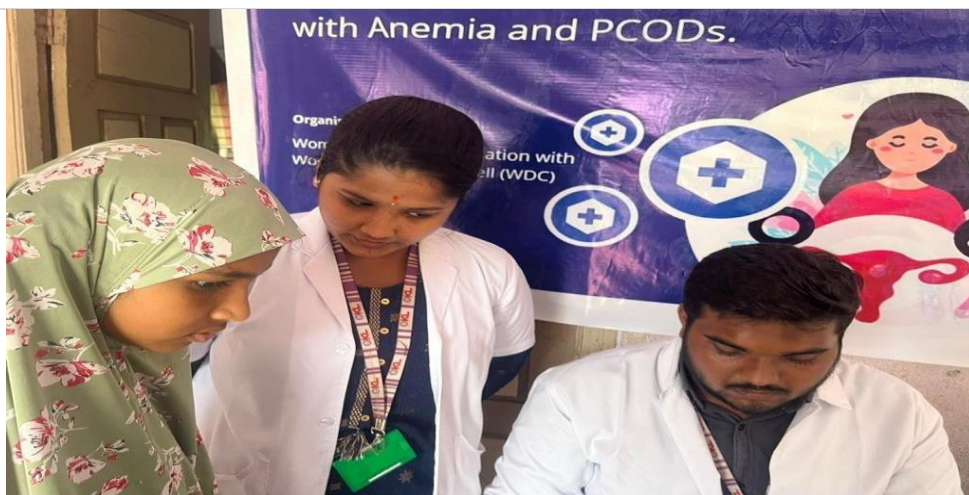

OUTCOMES:

The outcomes of the Health Camp on Hemoglobin Testing are significant and health-enhancing. Participants benefit from early detection of hemoglobin-related health issues, allowing for timely interventions and treatment. This leads to improved health outcomes, reduced instances of anemia, and a better quality of life for individuals, especially vulnerable populations such as children and pregnant women. The health camp raises awareness about the importance of nutrition and lifestyle choices, inspiring participants to make healthier decisions for themselves and their families. Additionally, the camp fosters a culture of proactive health management and community support, creating a network of individuals who are more informed and empowered to take charge of their health. Ultimately, these outcomes contribute to a healthier and more resilient community where individuals are better equipped to prevent and address anemia-related health challenges.
