SEMINAR ON INTELLECTUAL PROPERTY RIGHTS AND PATENT FILING

Date : 4/02/2023
Time : 10:00 A.M to 12:30 Noon
Venue : Sunflower Hall, KLEF

OBJECTIVES

The primary objectives of organizing a seminar on intellectual property rights and patent filing are to educate participants about the fundamental concepts of intellectual property, including patents, copyrights, trademarks, and trade secrets, enabling them to understand the value and protection of their creative and innovative work. This seminar aims to equip attendees with practical knowledge and skills related to patent filing procedures, patent search techniques, and the legal aspects of intellectual property. By doing so, it seeks to empower individuals, entrepreneurs, and innovators to protect their inventions and intellectual assets, foster innovation, and navigate the complexities of intellectual property rights in a rapidly evolving global economy. Additionally, the seminar aims to bridge the knowledge gap in this critical area, promoting awareness and compliance with intellectual property laws to encourage creativity and entrepreneurship while safeguarding the interests of creators and inventors.

DESCRIPTION

Women Development Cell (WDC) in association with KL Intellectual Property Facilitation Center (KL IPFC) organized Event on “Importance and benefit of IPRs filing and Patent Drafting to Grant for Academic Community “on 04th February 2023 by resource person Satish Kumar Asst. Director, IPR Division, DCMSME, Govt. of India, New Delhi. This Event is conducted to transfer overall knowledge on the usefulness of Patents and copyrights for Academic Community and Researchers. The need and benefits of IPR for the all the participants explained with examples. The Event gave an overall edge on the need of patents , how to draft patent, what are the important factors to achieve grant of patent and usefulness in building financial strength to the individuals career and a whole how does it benefit the Academic community 1. Patents recognize and reward invent or for their commercially successful inventions. As such they serve as an incentive for inventors to invent. With a patent, an inventor or small business knows there is a good chance that they will get a return on the time, effort, and money they invested in developing a technology. In sum, it means they can earn a living from their work. 2. When a new technology comes onto the market, society stands to benefit – both directly, because it may enable us to do

something that was previously not possible, and indirectly in terms of the economic opportunities (business development and employment) that can flow from it. 3. The revenues generated from commercially successful patent-protected technologies make it possible to finance further technological research and development (R&D), thereby improving the chances of even better technology becoming available in the future. 4. A patent effectively turns an inventor's know-how into a commercially tradeable asset, opening opportunities for business growth and job creation through licensing and joint ventures, for example. The event gave an overall view and the process to be adopted starting from ideation to filing of patent. This was well received by all the participants of the event – students, faculty, Startups, MSMEs and other industry participants.

OUTCOMES

The outcomes of organizing the seminar on intellectual property rights and patent filing have been highly beneficial and transformative. Participants emerged with a comprehensive understanding of intellectual property concepts, including patents, copyrights, trademarks, and trade secrets, enabling them to appreciate the value of their creative and innovative work. They acquired practical knowledge and skills in patent filing procedures and intellectual property protection, empowering them to safeguard their inventions and intellectual assets effectively. Moreover, the seminar fostered a culture of innovation, inspiring individuals and entrepreneurs to pursue creative endeavors with confidence while ensuring their legal rights are protected. By promoting awareness and compliance with intellectual property laws, the seminar has contributed to a more innovative and equitable environment that encourages and rewards creativity, benefiting both inventors and society at large.
