CIRCULAR

Sub: Conduction of "Blood Donation Camp" on 03-04-2025 by Youth Red Cross (YRC) on 01-04-2025 - Communication – Reg.

Ref: Letter received from Dr.K.R.S. Prasad, In-charge, Dean (Student Affairs)

Youth Red Cross (YRC) & National Service Scheme (NSS), KLEF is organizing a **"Blood donation camp"** on 03-04-2025 in association with the Indian Red Cross Society, Guntur & Government General Hospital, Vijayawada for all faculty, staff, and students.

Blood donation is a simple act, it can save up to three lives with just one donation. It helps accident victims, surgery patients, and those with medical conditions like anemia and cancer.

Details of the Blood donation camp:

Venue: Ground floor, New Sports Complex,

Date & Time: 3rd April, 2025 & 9.30 AM- 5.30 PM

Registration link:

https://docs.google.com/forms/d/e/1FAIpQLScqYuSp3PpTNL9gKg3wgfj0zUvE_I96TsK7XWBrFDf2Bfc_uQ/viewform?vc=0&c=0&w=1&flr=0

Event Co-ordinators: Dr.P.Srikanth Reddy (NSS Co-Ordinator)

Dr. R. Supriya (YRC Prof In-charge)

nandhanasupriya@gmail.com, 8367541364

The HoDs / Functionaries / In-charges of Offices are directed to ensure that this information is brought to the notice of all the Faculty members, Staff and Students of their respective departments.

Objective:

Blood donation is to save lives by providing a critical resource for medical treatments and emergencies. Blood donations are essential for surgeries, cancer treatments, trauma care, and managing various blood disorders. Each donation can help multiple patients, as blood can be separated into components like red cells, platelets, and plasma, each serving different medical needs. Additionally, blood donation fosters a sense of community, compassion, and responsibility, encouraging people to support one another. By donating blood, individuals contribute to a healthier society, bridging the gap between those who can give and those in need.

Description:

Blood donation is a life-saving act where individuals voluntarily give blood to help those in medical need. Donated blood is essential for a range of medical procedures, including surgeries, treatment for injuries, and support for patients with conditions like anaemia, cancer, and blood disorders. The process is safe, quick, and overseen by trained medical staff, ensuring that donors and recipients are protected. Each donation can save multiple lives, as a single unit of blood can be separated into components like red cells, plasma, and platelets, each serving different medical needs.

The need for blood donations is constant, as blood supplies can deplete quickly and have a limited shelf life. Many countries have established regular donation programs to maintain a steady supply, and awareness campaigns encourage individuals to become regular donors. Blood donation events are often held at hospitals, community centres, and workplaces, making it convenient for people to participate. By donating blood, individuals contribute to public health, helping to ensure that blood is available whenever and wherever it is urgently needed.

Procedure of the Event

1. GGH, Vijayawda & Indian Red Cross Society team arrived in the venue at 9:40 AM.
2. They commenced the event by explaining the importance and purpose of blood donation to the villagers.
3. Students from different branches were actively participated and donated blood in the camp.
4. The organizing team conducted various blood tests (Blood grouping, Hemoglobin) before the donation to check the eligibility to donate.
5. The organizing team measured the weight of each participant before the donation.
6. Organized by the YRC volunteers from KL University.

Outcome of the event:

Donating blood has a profound impact on both the donor and the recipient. For the recipient, blood donation can be a life-saving intervention, especially in critical cases such as accidents, surgeries, cancer treatments, or for those with blood disorders like anaemia. A single blood donation can potentially save up to three lives, providing recipients with essential blood components like red blood cells, plasma, and platelets needed for recovery and survival. This lifesaving act supports healthcare systems and ensures that hospitals have a ready supply of blood for emergencies.

For the donor, the process of giving blood has significant personal and health benefits. Studies suggest that regular blood donation can improve cardiovascular health by reducing iron levels in the blood, which may lower the risk of heart attacks. It also offers the donor a sense of personal fulfilment, knowing they are helping to save lives. Additionally, during the donation process, donors often undergo a quick health check, which may help them keep track of their general health status.

From a societal perspective, blood donation helps create a stronger, healthier community. It fosters a culture of volunteerism and compassion, bringing people

together for a common cause. Blood donation campaigns often raise awareness about the importance of regular donations, which can help reduce blood shortages globally and ensure healthcare facilities are well-prepared for emergencies. By donating blood, individuals not only make a direct impact on patients' lives but also contribute to building a resilient and compassionate society.
